Your certificates

It is recommended that new users use TOTP, rather than certificates, for privileged access to MyAPNIC. Click [here](#) to go to the TOTP tab.

An APNIC certificate is required to perform certain operations such as Resource Certification and Online Voting. It is also required for a Corporate Contact to approve certificate requests for other account contacts. A certificate is valid for 12 months from the date of issue.

For more information, please see [APNIC Digital Certificates](#).

[Download Certificate](#)

CA certificates

The APNIC Root CA Certificate is also provided for users that need a trusted authority in their email software, and the email software of correspondents that require secure communication.

[Download CA Certificate](#)

[Download Root CA Certificate](#)

If you have any other queries, please email helpdesk@apnic.net for assistance.

The certificate will be downloaded into the Downloads Folder .

Download Certificate

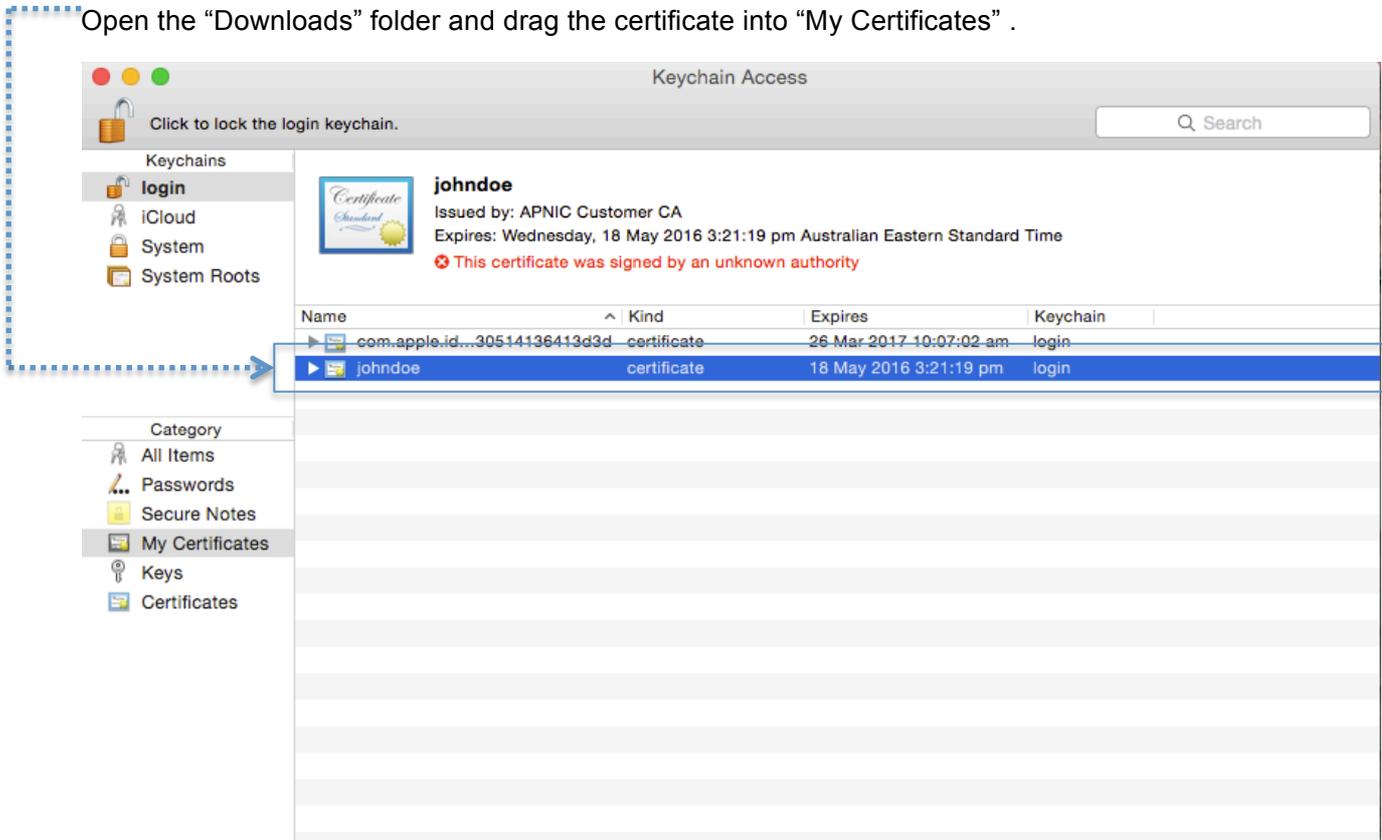

Your certificate request has been approved.

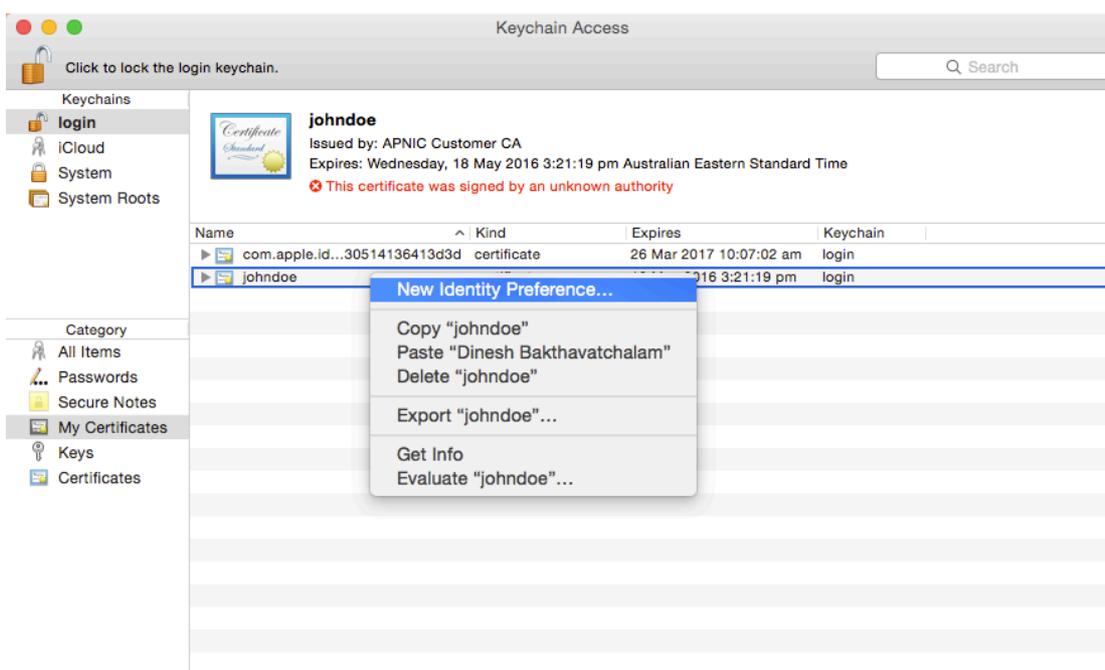

© APNIC | [Feedback](#) | [About MyAPNIC](#) | [Need help?](#)

Open Keychain Access

Open the “Downloads” folder and drag the certificate into “My Certificates” .

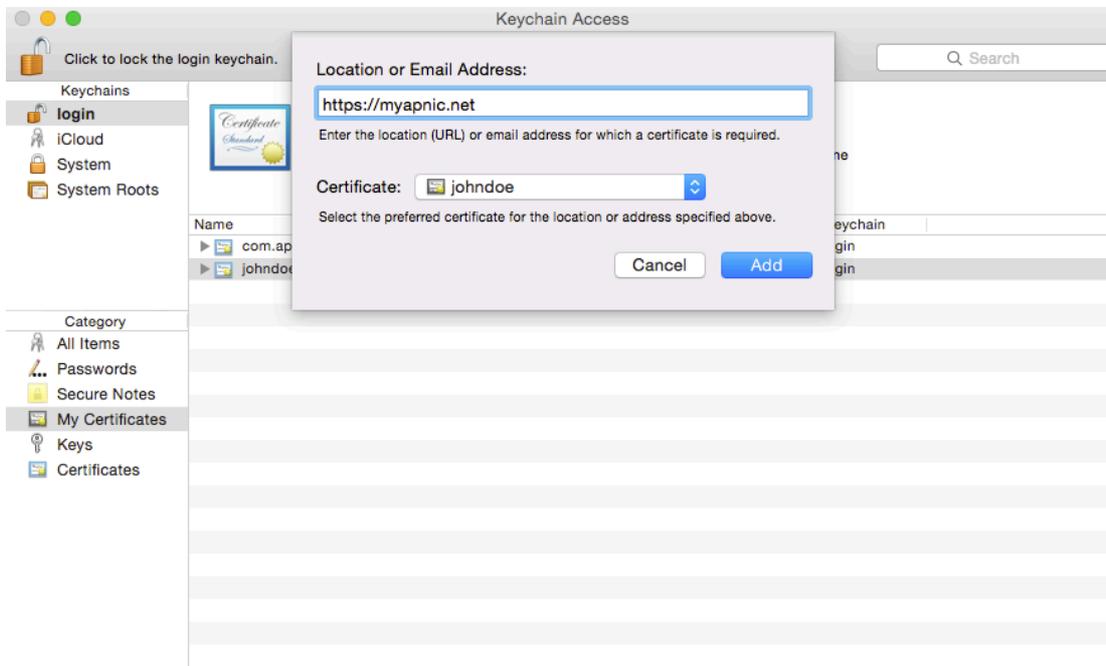

Right click on the certificate and select “New Identity Preference”.

Under “Location or Email Address” type **https://myapnic.net**.

Click on **Add**.

Quit Safari browser.

Re-launch Safari browser and log into MyAPNIC.

If you see the certificate icon, you are currently accessing MyAPNIC with a valid Digital Certificate.

If you do not see the certificate icon, it could be one of the following reasons:

- No certificate is detected in the browser
- No certificate is issued to user
- The incorrect certificate is in the browser (different APNIC account for example)
- The digital certificate has expired
