Position: Network Administrator
Billing: Yes

Save changes

Add another account
Click on “Setup TOTP”.

Scan the QR code or enter the secret code into your authentication app. You will receive a six-digit security code.
Key in the six-digit security code and click on “Confirm”.

The below message will be displayed after which you need to log out and log into MyAPNIC again.
Please keep a record of the one-time back code.
If your six-digit security code does not match, please check that your phone has automatic time zone setting selected.

Key in your credentials and click “Login”.

Enter the six-digit security code from your authenticator app or enter your backup code and click “Authenticate”.
Once your TOTP Two Factor Authentication is enabled, you will see a padlock symbol on the top right corner of your screen.
