Your Certificates

You have been issued with the following certificate(s):

Serial number	Expiry date
536C3AAA2C4905D4	2011-08-02 09:50:44

If you require an additional certificate, you are advised to use a backup copy of your current valid certificate.

Please only request an additional certificate when you are not able to recover your backup copy.

An APNIC certificate is required to perform certain operations such as Resource Certification and Online Voting. It is also required for a Corporate Contact to approve certificate requests for other account contacts. A certificate is valid for 12 months from the date of issue.

For more information on APNIC certificates, please see <http://www.apnic.net/services/manage-resources/digital-certificates>.

If you have any other queries, please email helpdesk@apnic.net for assistance.

[Request a certificate](#)

Request approval

Your certificate request has been sent to APNIC Member Services. You will receive an email when your request is approved.

Whois Updates

APNIC

The screenshot shows the MyAPNIC Whois Update page. The navigation bar at the top includes 'Home', 'Resources', 'Administration', 'Training', and 'Tools'. Under 'Administration', 'Whois updates' is highlighted with an orange box. Below the navigation bar, the breadcrumb trail reads 'Home / Resource management / Whois update'. The main heading is 'MyAPNIC Whois Update'. A text block states: 'The information you register will be available publicly in the APNIC Whois database, unless the 'Private' option is available and specified.' Below this, a toolbar contains 'Add', 'Update', 'Delete', and 'Bulk Whois Updates' buttons. The 'Update' button is highlighted with an orange box. To the right of the 'Update' button is a dropdown menu for 'Object type' with 'Please select' at the top. The dropdown is open, showing a list of object types: 'as-set', 'aut-num', 'domain', 'filter-set', 'inet-rtr', 'inet6num', 'inetnum' (highlighted), 'irt', 'mntner', 'peering-set', 'person', 'role', 'route', 'route-set', 'route6', and 'rtr-set'. A search box is visible below the 'Object type' dropdown.

Maintainer list

When using MyAPNIC to manage your Whois objects, MyAPNIC will retrieve the maintainer and its password from this list. You should ensure that all maintainers referenced by the Whois objects you manage are added to this list. To add a maintainer, please supply the maintainer name and its plain text password in the fields below. If you have reset the password, you must update the password saved in this list.

Registered maintainers	Authentication method	Password	Update password	Delete
MAINT-AU-APNICTRAINING	MD5-PW	<input type="password"/> Password invalid, please update.	<div>Update</div>	<div>Delete</div>
MAINT-AU-VIVEK	CRYPT-PW	Valid password		<div>Delete</div>

Home / Resource management / IRT list

IRT list

The APNIC Whois Database now requires the IRT object to be referenced by your inetnum, inet6num, and aut-num objects.

You should ensure that all IRT objects referenced by the whois objects you are managing are added to this list.

Name	Delete
IRT-MYAPNIC-TEST-AP	Delete

Bulk Reverse DNS

Add reverse DNS delegation

Important: The information you provide in the form below will be used to create your domain object in the APNIC Whois Database. Please make sure that your name servers are running and are authoritative for the zone, or your reverse DNS delegation might not function correctly.

Address range:

Use CIDR address prefix notation. Multiple range allowed, one range per line.

202.125.97.0/24

Example:

202.12.28.0/22
202.120.0.0/20

Name servers:

List fully qualified domain name of at least one server.

Important: Do not list IP addresses or reverse DNS names.

ns1.apnic.net

Example:

ns1.example.com
ns2.example.com

Maintainer:

MAINT-AU-VIVEK

Example:

MAINT-AU-EXAMPLE

Next

Add reverse DNS delegation

The following reverse domain objects have been created in the APNIC Whois Database. This information will be merged into the APNIC master zone file within the next 2 hours.

To include DNSSEC for your domain objects, you can click on the individual domain objects below, or use the [Whois bulk update form](#).

For more information on DNSSEC, please see

- <http://www.apnic.net/dnssec>

Reverse domain	Zone contact	Primary server	Maintained by	Delete
97.125.202.in-addr.arpa	AH256-AP	ns1.apnic.net	MAINT-AU-VIVEK	Delete

MyAPNIC Whois Update

The information you register will be available publicly in the APNIC Whois database, unless the 'Private' option is available and specified.

IPv6 Tools

IPv6 Sparse Assignment

The IPv6 Sparse Assignment tool enables you to create assignments that are spaced apart from one another, ensuring assignments can grow as needed while maintaining route aggregation.

Enter an IPv6 address of a block where the assignments will come from (beginning address & prefix length), number of assignments you need to make, and the minimum size of the assignment (optional).

Beginning address *	<input type="text" value="2401:4600::"/>	
Prefix length *	<input type="text" value="32"/>	e.g. 32
Number of assignments *	<input type="text" value="16"/>	e.g. 5
Minimum assignment size	<input type="text"/>	e.g. 35
<input type="button" value="Submit"/>
