

Enabling IPv6 on the FTTH network of ctc

28th August 2013

**Chubu Telecommunications Co.,Inc.
Shinichi Yamamoto**

Table of contents

1. Corporate profile
2. IPv6 deployment on “commufa HIKARI”
3. IPv6 service development of “commufa HIKARI”
4. IPv6 statistics of “commufa HIKARI”
5. Conclusion

Table of contents

1. Corporate profile
2. IPv6 deployment on “commufa HIKARI”
3. IPv6 service development of “commufa HIKARI”
4. IPv6 statistics of “commufa HIKARI”
5. Conclusion

Corporate profile

- Chubu Telecommunications Co.,Inc. = ctc
- A telecommunications carrier in central Japan
- Number of Employees:

660 persons

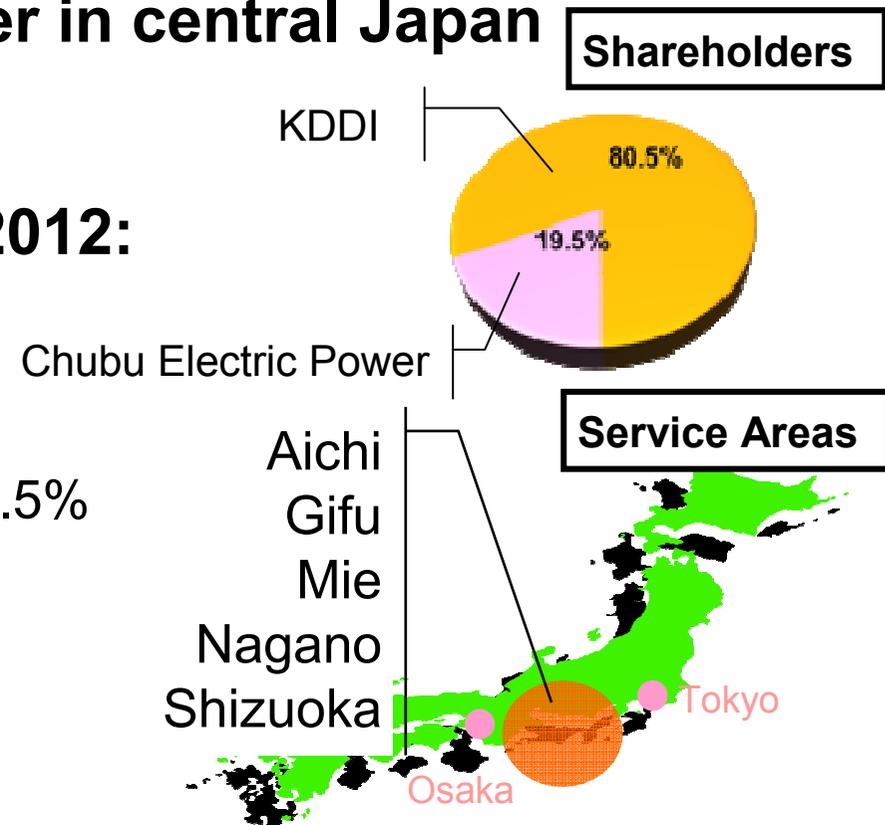

Total amount of sales in FY2012:

USD 681 million *USD1=JPY98

Shareholders

KDDI CORPORATION : 80.5%

Chubu Electric Power Co.,Inc. : 19.5%

- The total length of optical fiber network built by ourselves is 94,000km.
(about 2.5 times longer than the circumference of the earth)

Services overview

Many kinds of telecom services are providing based on our optical fiber network

- Services for business
- Service for consumers (the service name is “commufa HIKARI”)

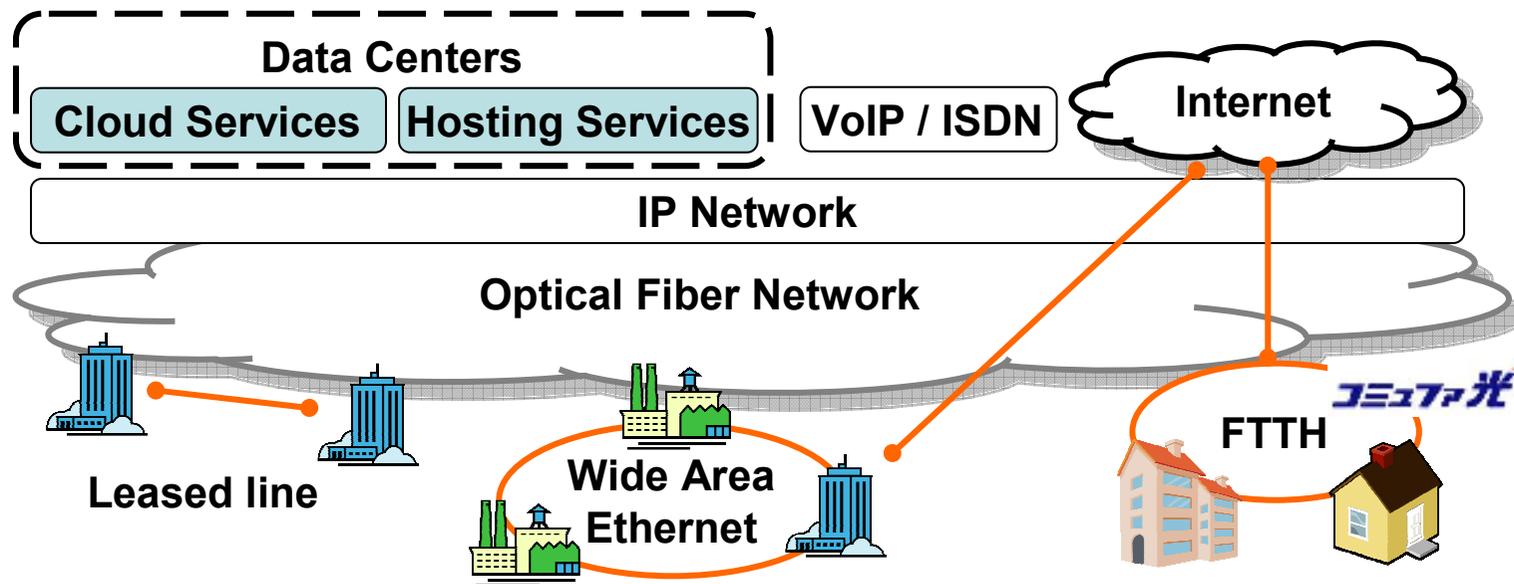

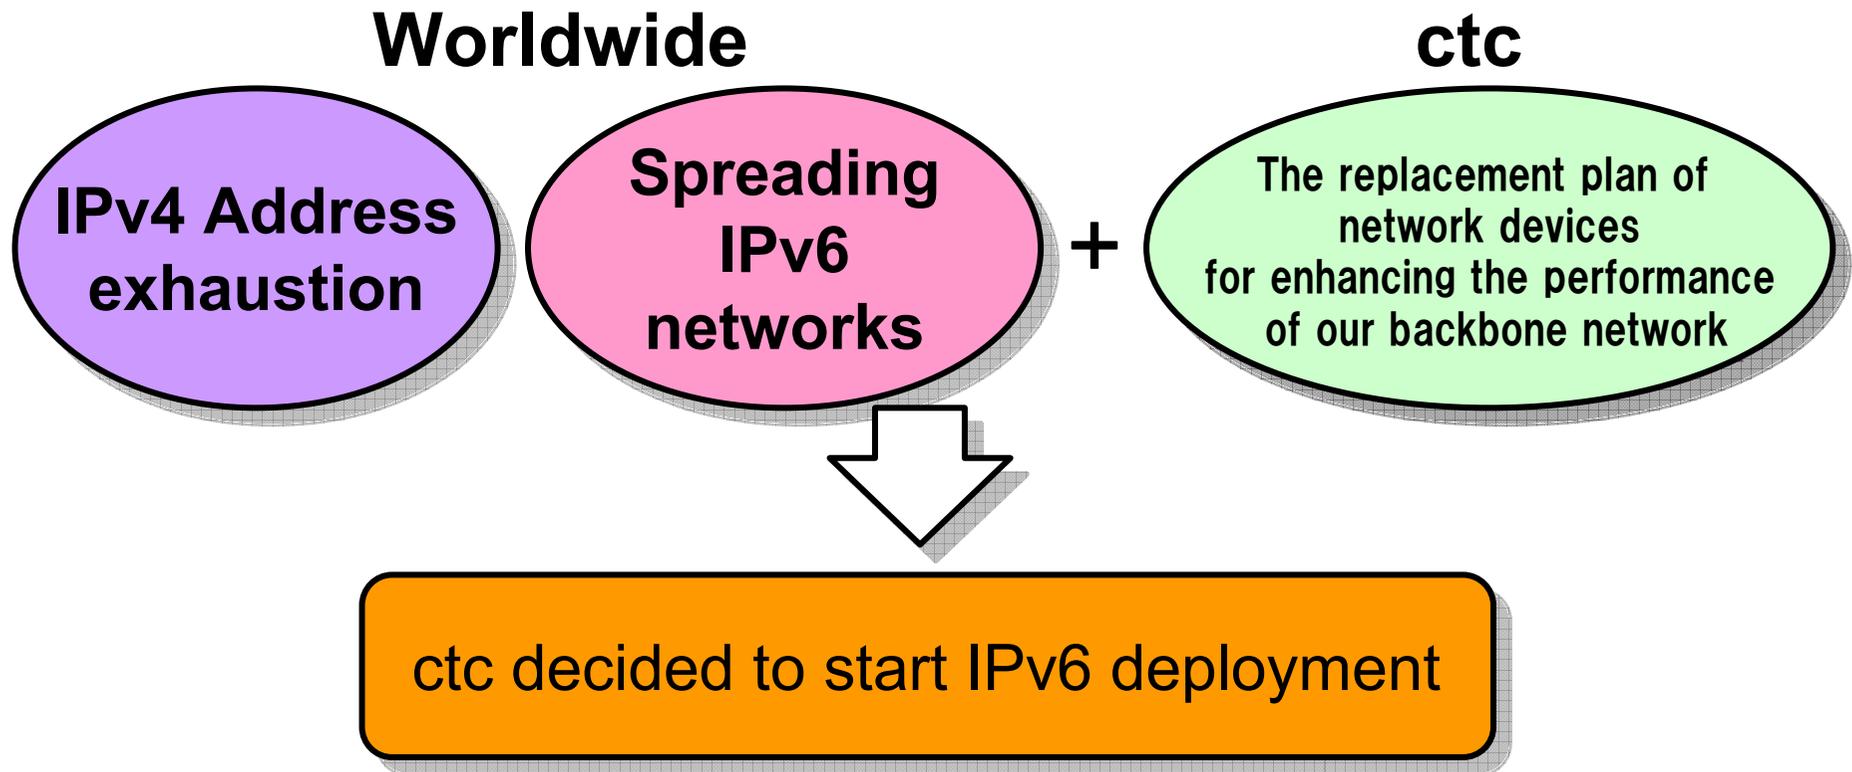

Table of contents

1. Corporate profile
2. IPv6 deployment on “commufa HIKARI”
3. IPv6 service development of “commufa HIKARI”
4. IPv6 statistics of “commufa HIKARI”
5. Conclusion

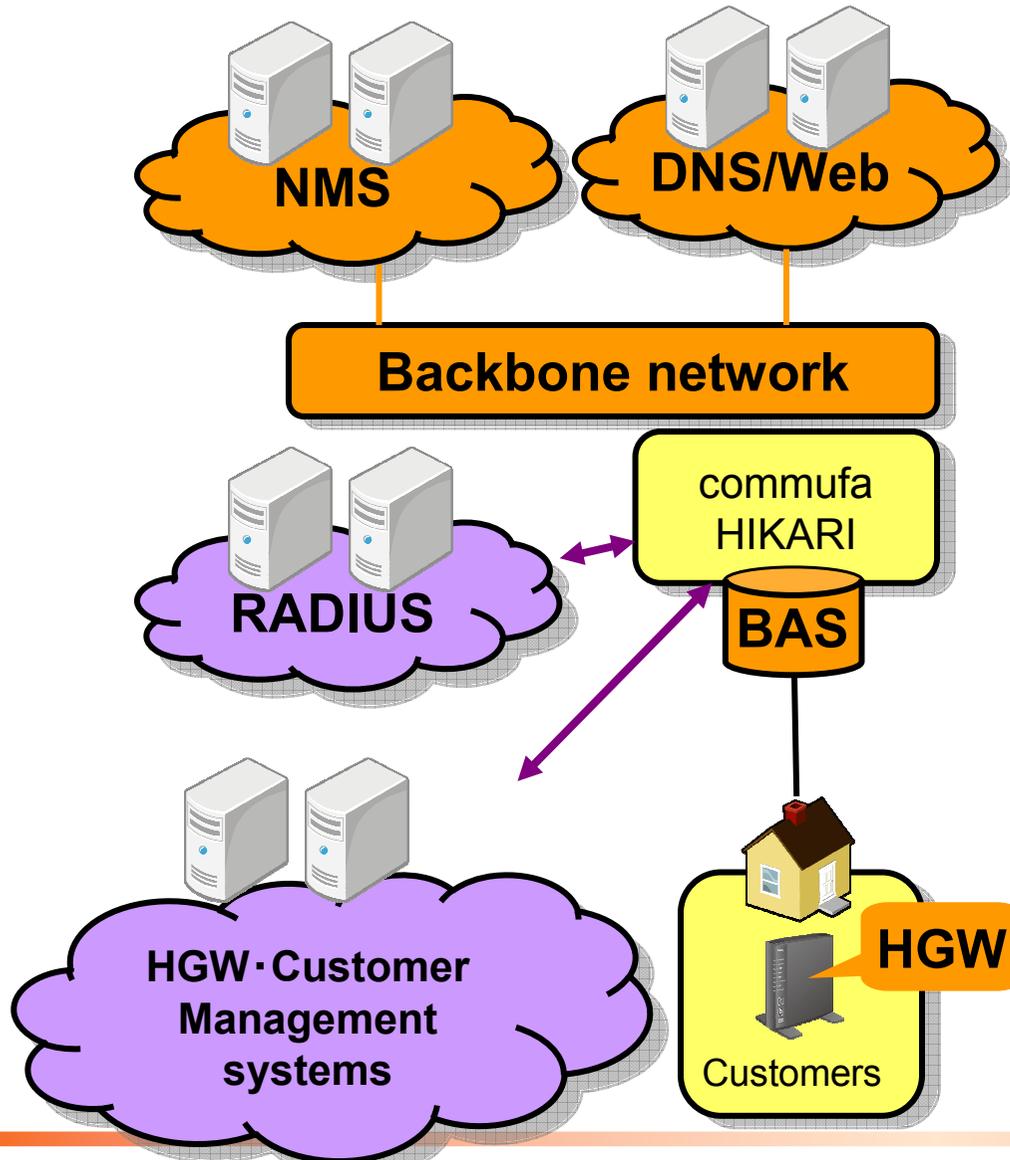

Our motivation for IPv6 deployment

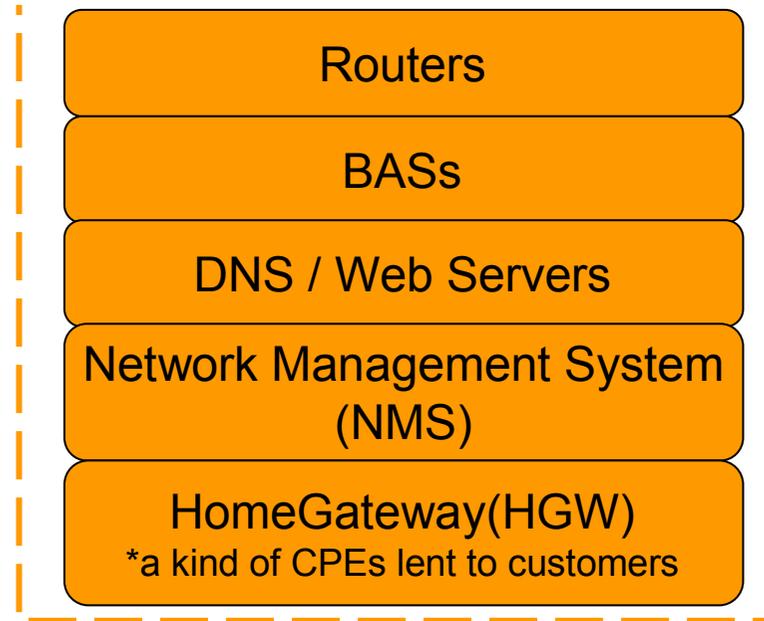

Mar. 2010 Start researching how to deploy IPv6

Mar. 2011 Start IPv6 deployment project

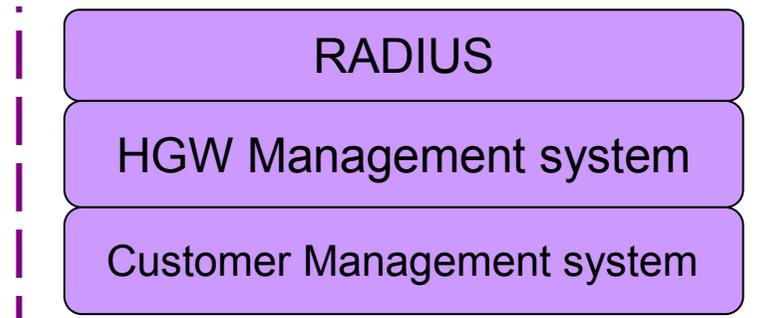

IPv6 deployment project overview

IPv4/IPv6 Dual Stack Devices

Upgrading systems

1 year and a half later...

22nd August 2012
IPv6 access service was started
on “commufa HIKARI” !!

The results of IPv6 Deployment on “Commufa HIKARI”

1 year later...

 World IPv6 Launch measurement as of 20th August 2013

IPv6 deployment : 20.53%

(Our rank sorted by IPv6 deployment : 36th / 216 entries)

 APNIC IPv6 measurement by AS number as of 20th August 2013

v6 capable : 29.63%

(Our rank sorted by v6 capable : 28th)

⇒ about 178,000 subscribers are IPv6 capable

Table of contents

1. Corporate profile
2. IPv6 deployment on “commufa HIKARI”
3. IPv6 service development of “commufa HIKARI”
4. IPv6 statistics of “commufa HIKARI”
5. Conclusion

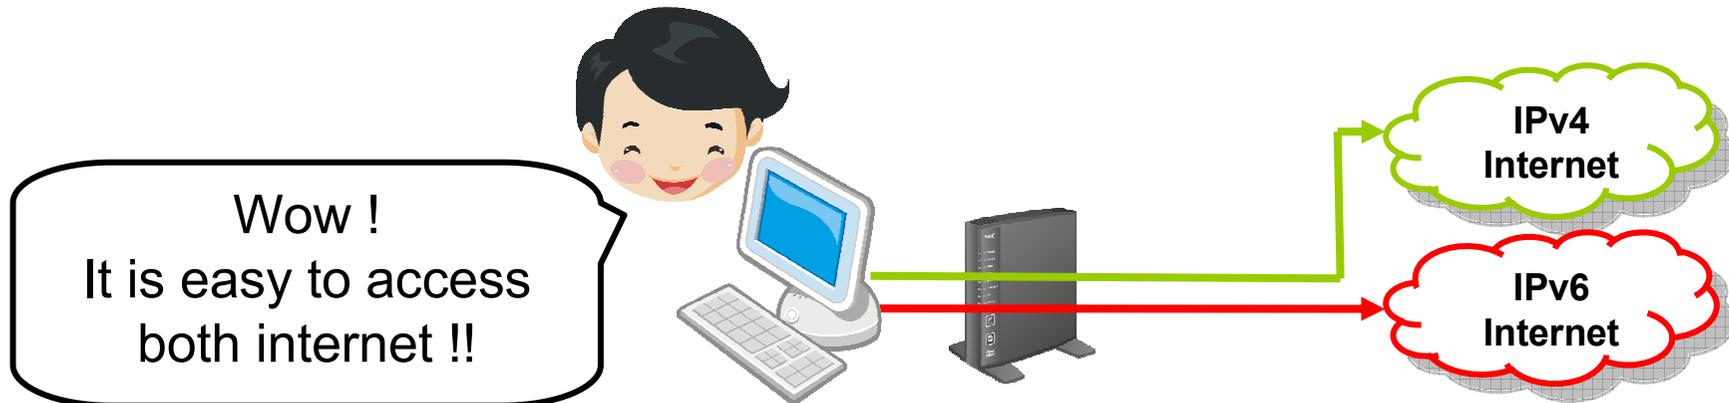

Service policy for IPv6 access service

Our idea for providing IPv6 access service

Customers easily access IPv4/IPv6 internet without care of IPv4 and IPv6 connectivity.

Providing the automatic IPv4/IPv6 internet connections

Approaches for automatic internet connections

 HomeGateway Development

 A new service menu

Approaches for automatic internet connections

 HomeGateway Development

 A new service menu

HomeGateway development(1)

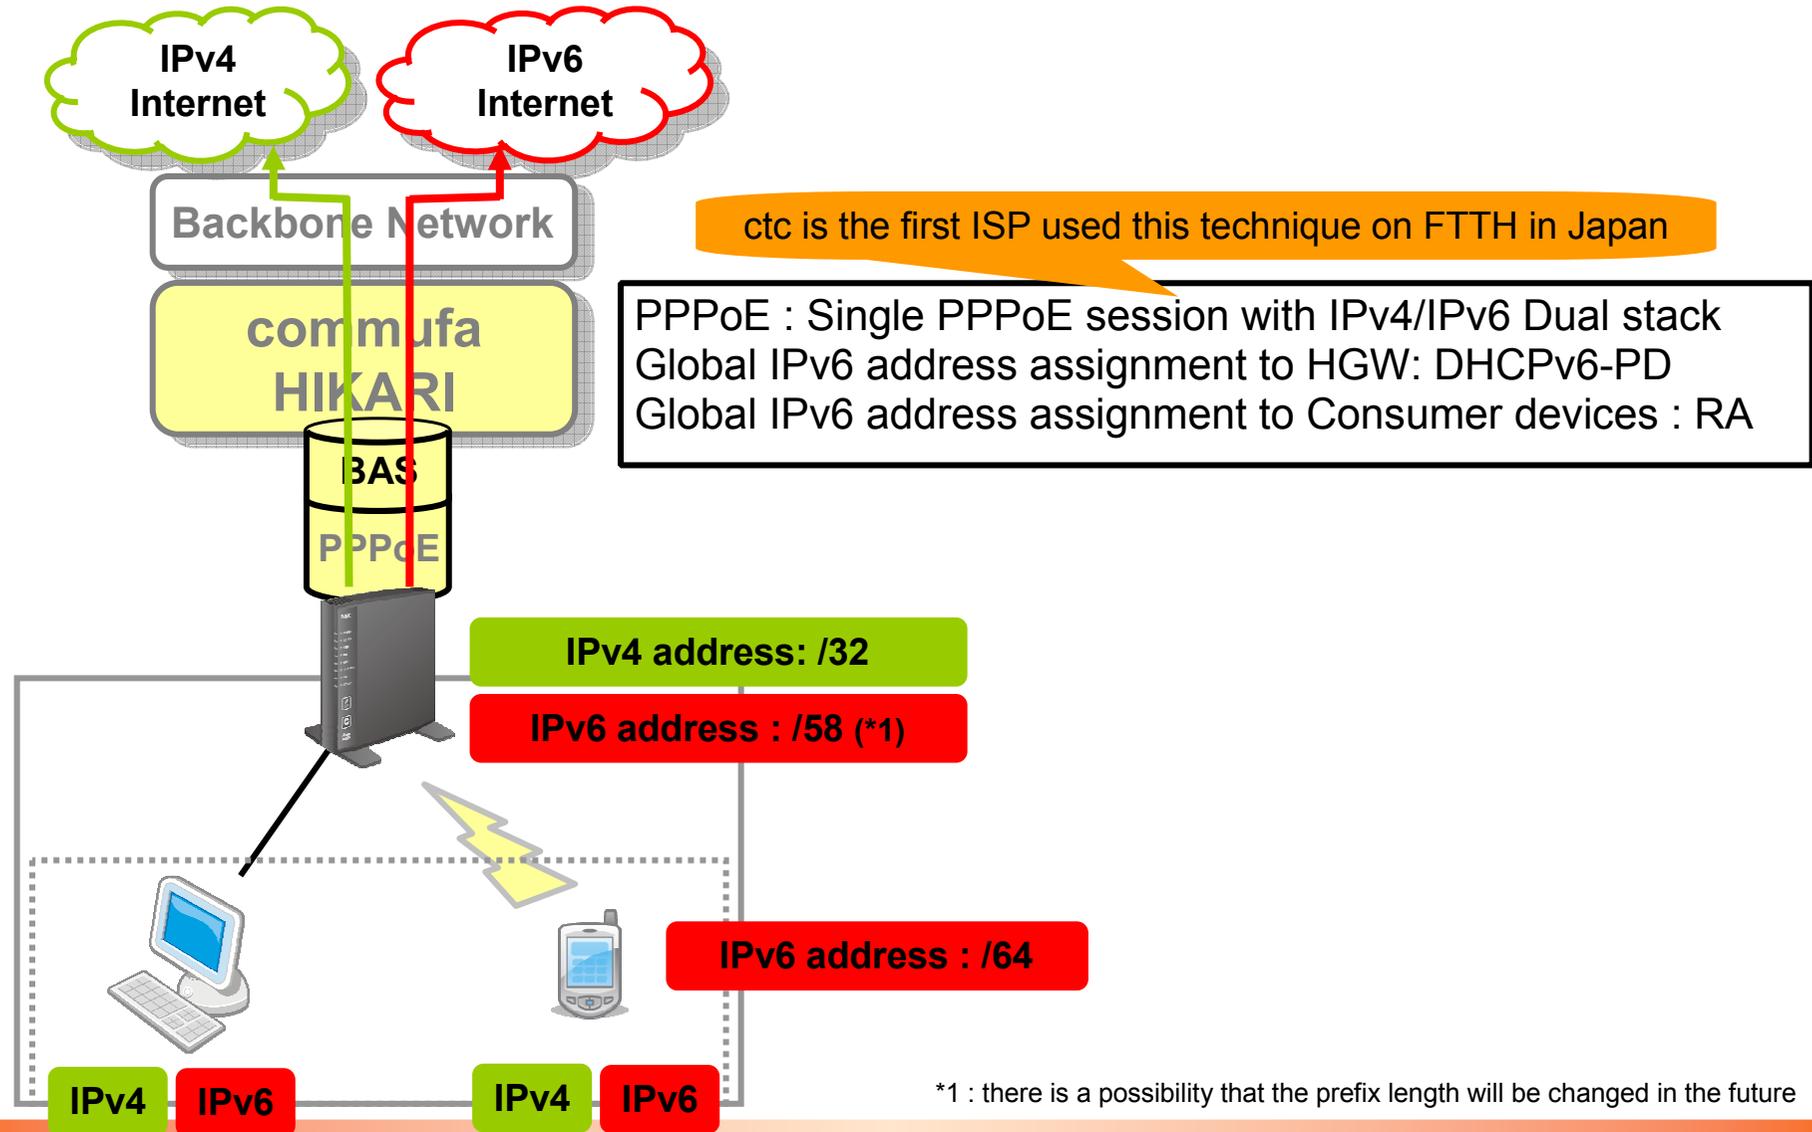

Adopting PPPoE as the access technique of subscribers for integrating IPv6 network into IPv4 network

Reasons:

1. PPPoE has been used as the access technique for providing IPv4 connectivity
2. No changes are required in existing access network

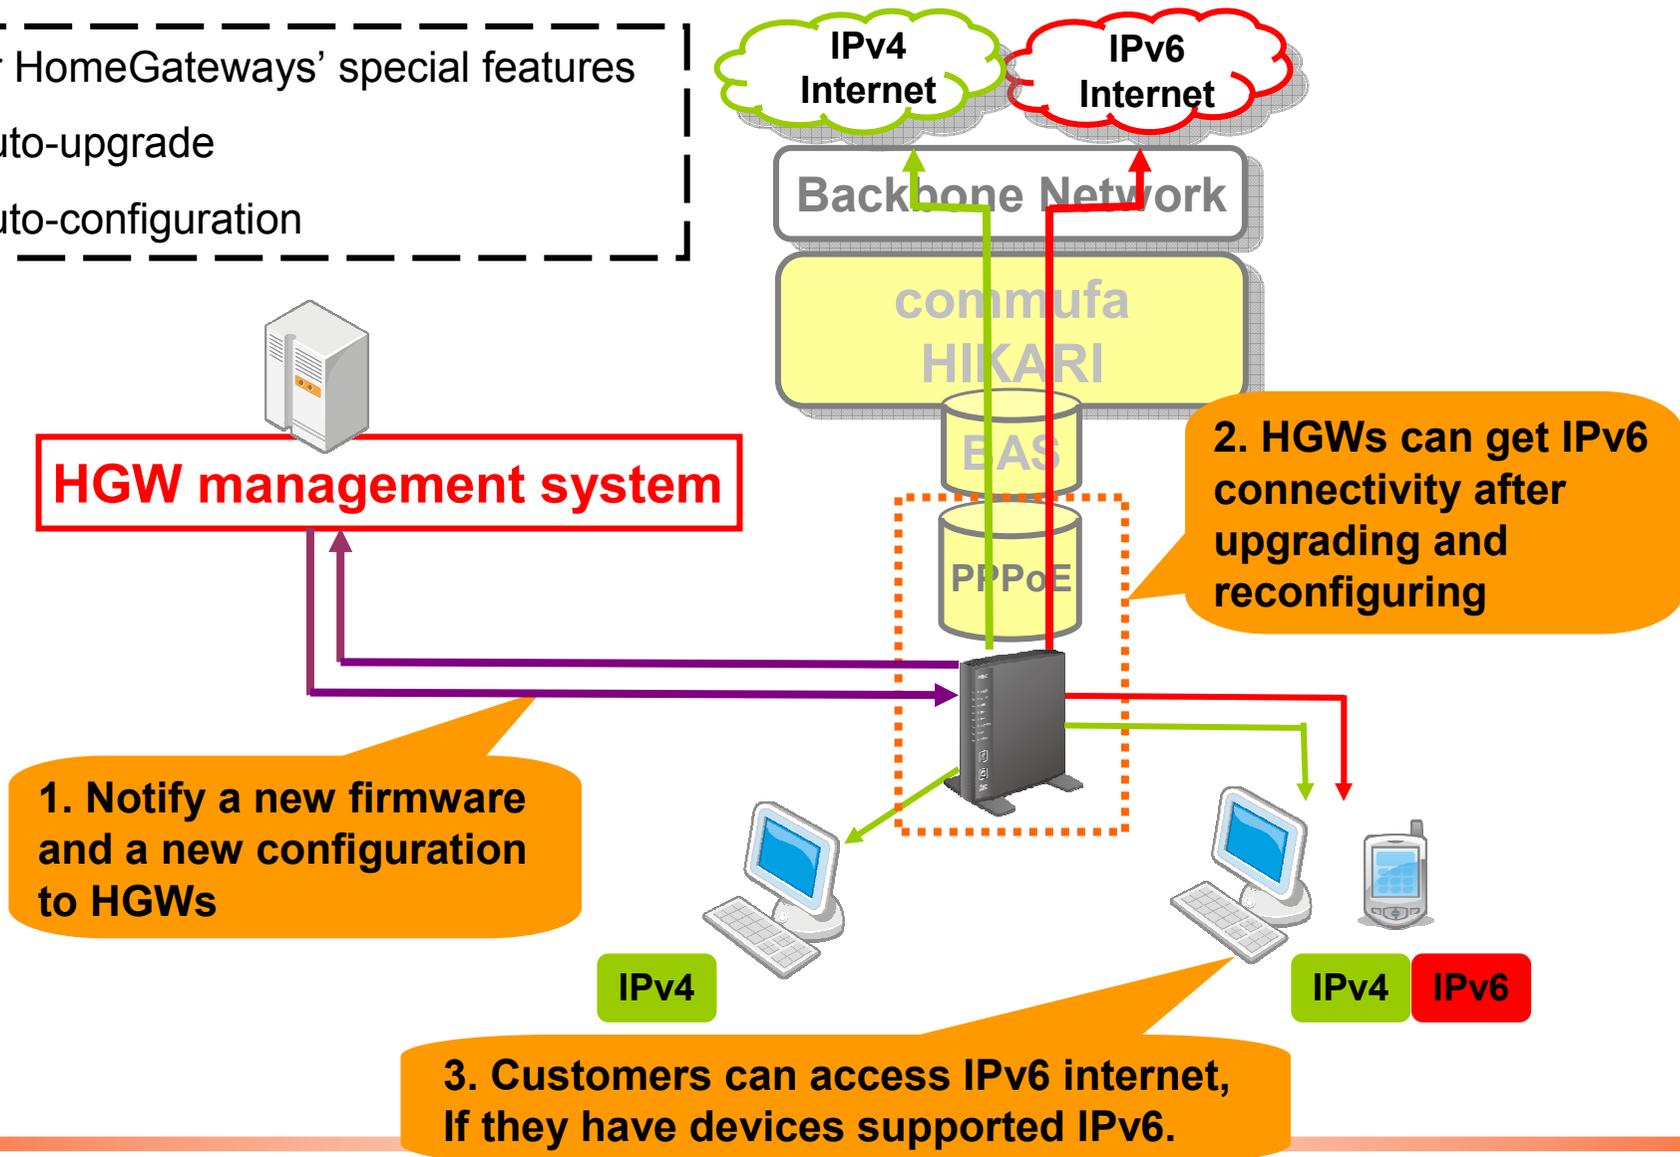

HomeGateway development(2)

*1 : there is a possibility that the prefix length will be changed in the future

How to deploy IPv6 functions to existing HGWs

- Our HomeGateways' special features
- Auto-upgrade
 - Auto-configuration

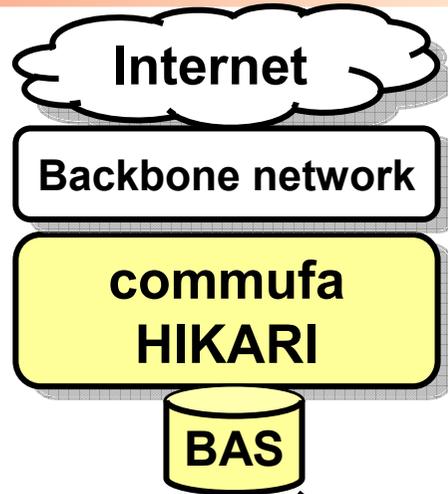

Approaches for automatic internet connections

 HomeGateway Development

 A new service menu

A new service menu

Features of a new service menu

- Providing a HomeGateway as a standard equipment
- IPv4/IPv6 internet access
- Monthly fee is max 40% off from old services

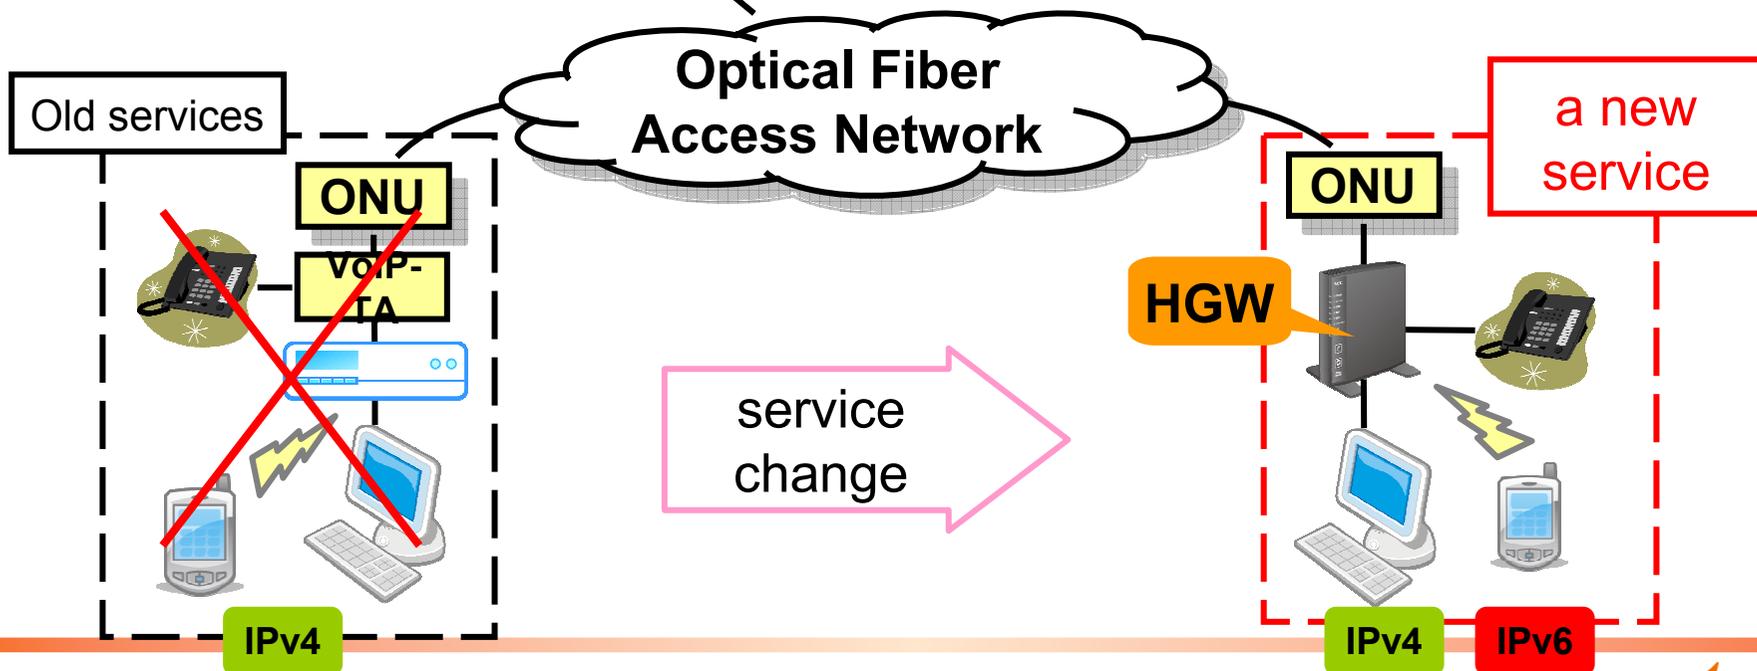

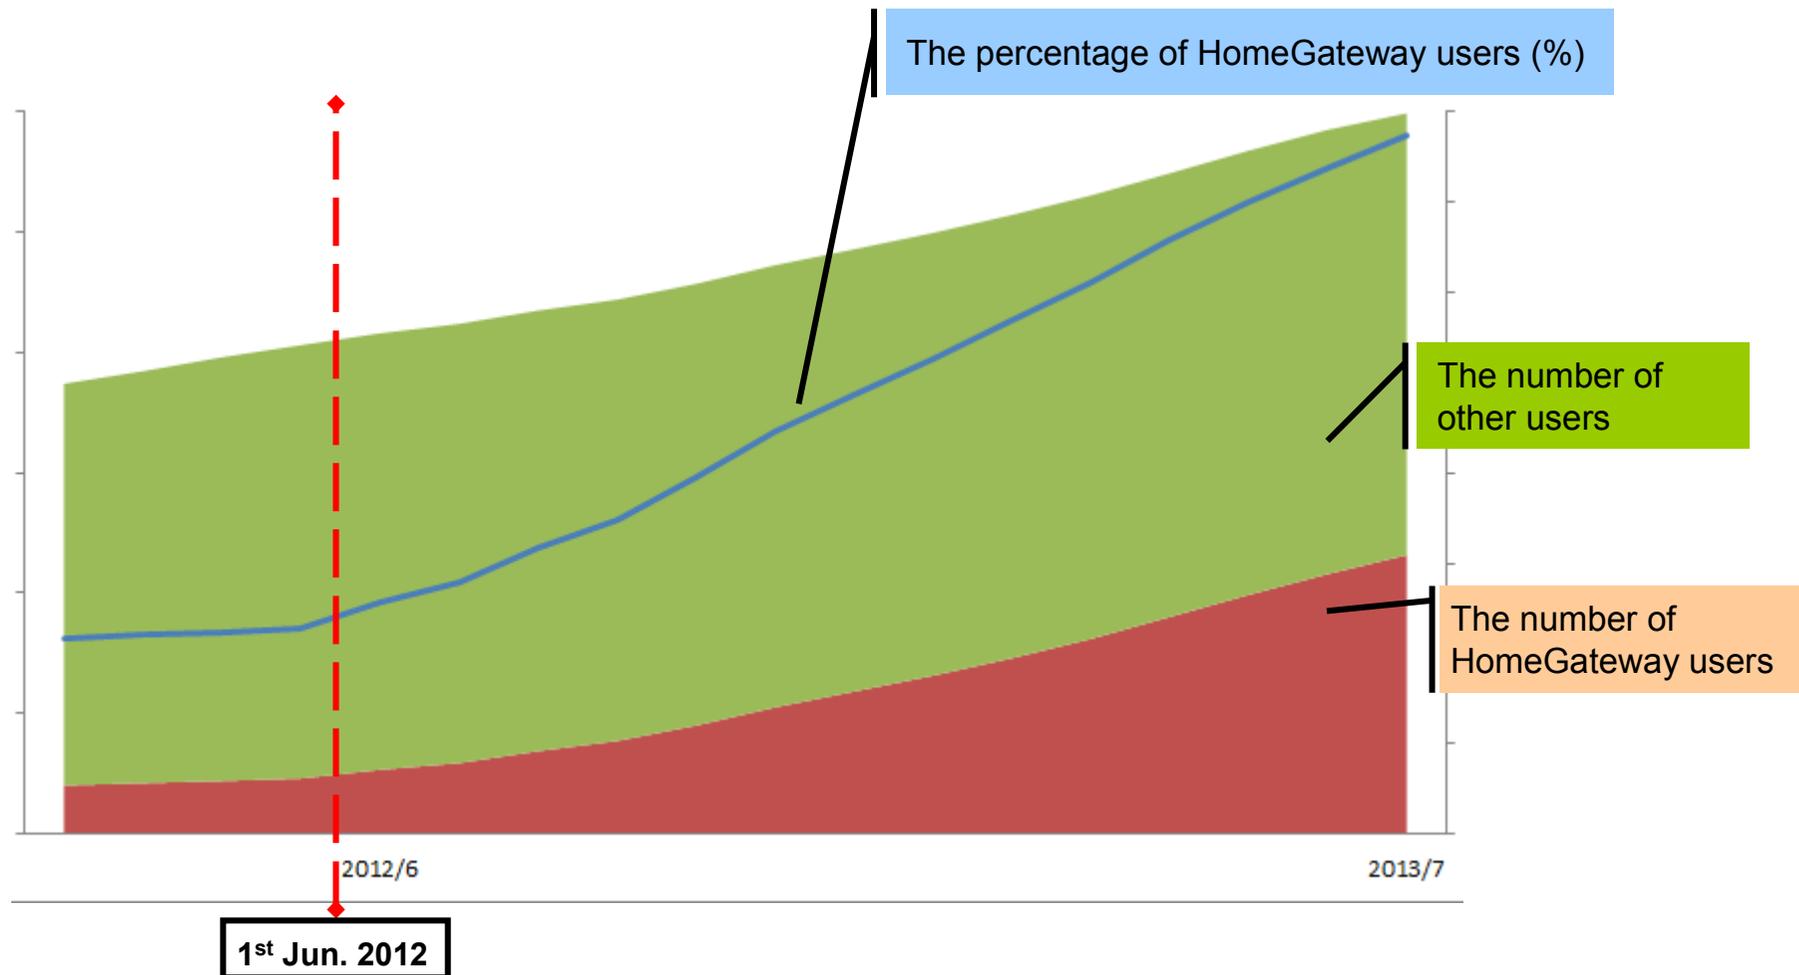

Table of contents

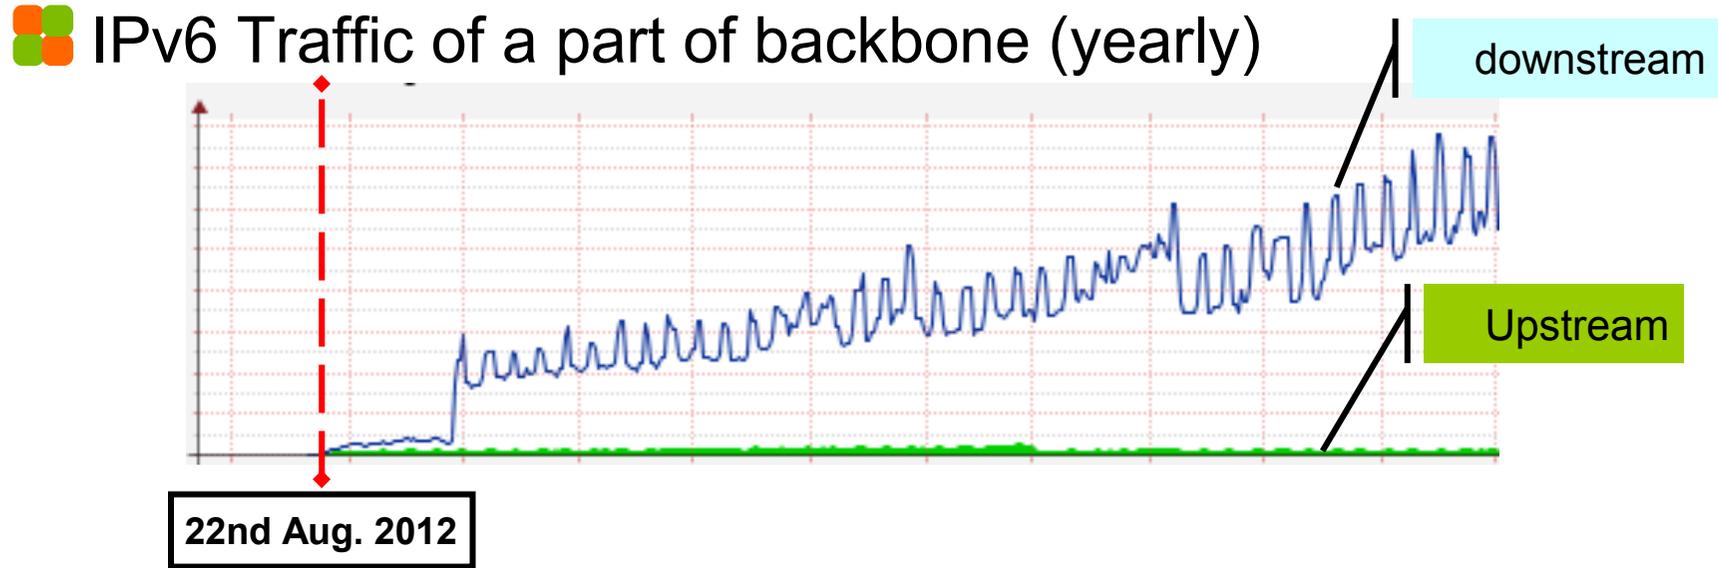

1. Corporate profile
2. IPv6 deployment on “commufa HIKARI”
3. IPv6 service development of “commufa HIKARI”
4. IPv6 statistics of “commufa HIKARI”
5. Conclusion

The graph of increasing HomeGateway users

The average increasing rate of HomeGateway users is 12% since Jun. 2012

IPv6 statistics of “commufa HIKARI”

Comparing IPv4 and IPv6 Traffic (monthly)

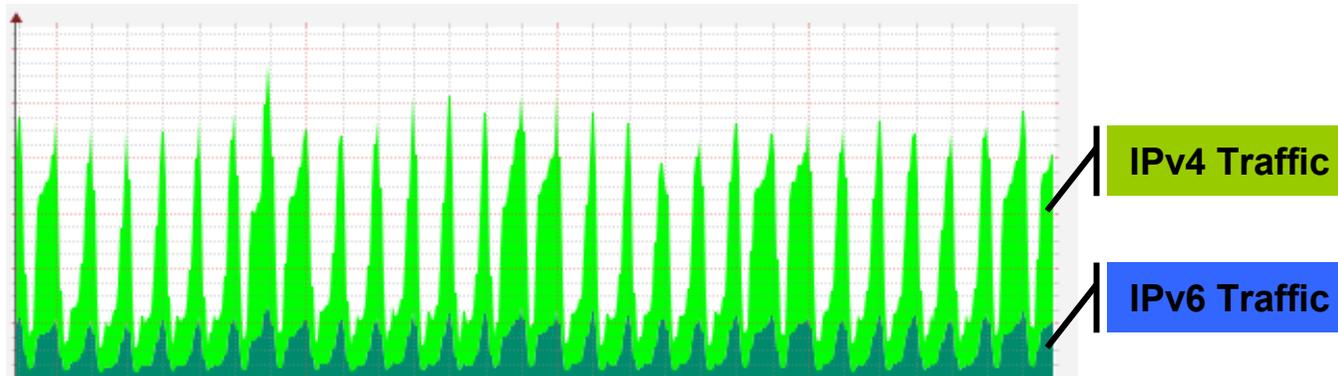

Table of contents

1. Corporate profile
2. IPv6 deployment on “commufa HIKARI”
3. IPv6 service development of “commufa HIKARI”
4. IPv6 statistics of “commufa HIKARI”
5. Conclusion

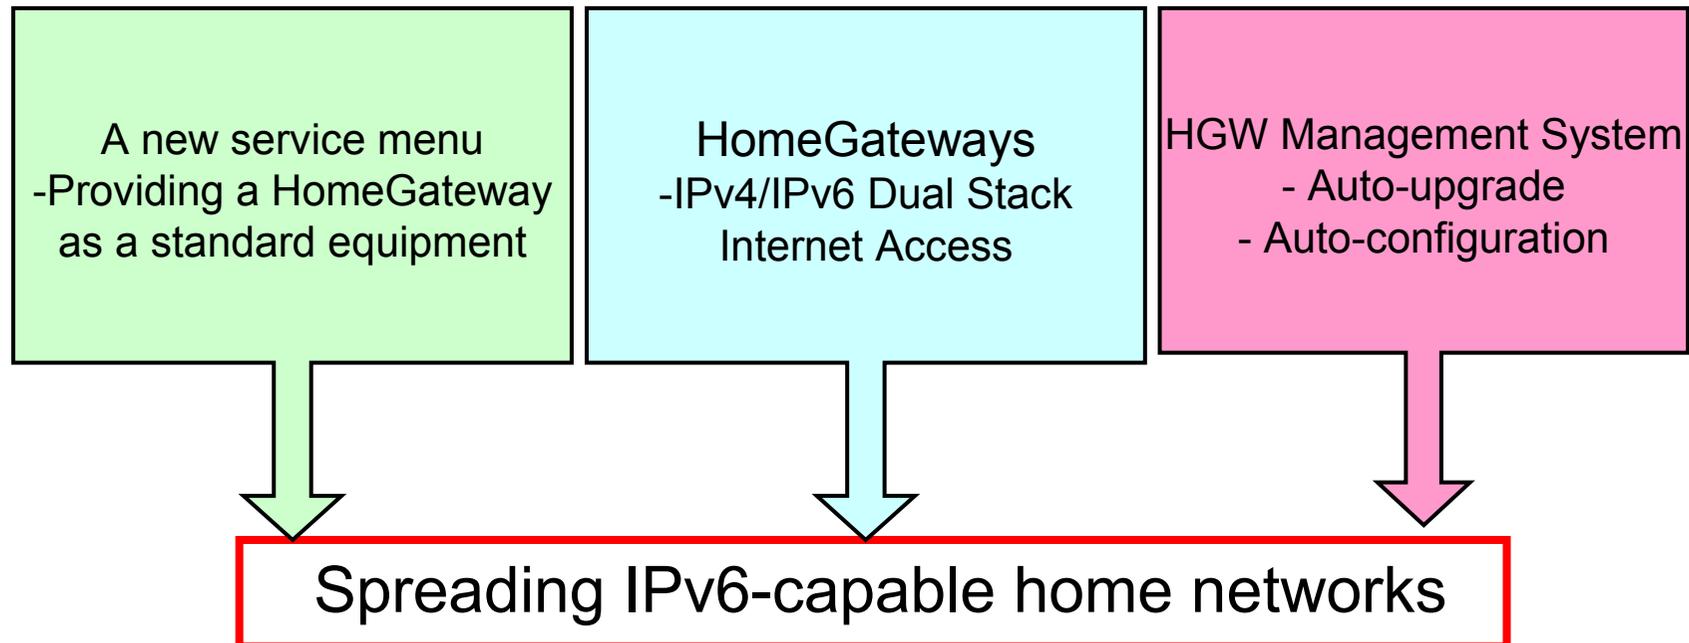

Conclusion(1)

- The replacement of network devices and systems
 - Routers and Servers became IPv4/IPv6 Dual-Stack devices.
 - HGW and Customer Management Systems, RADIUS were upgraded
- HomeGateway technical specification
 - Single PPPoE session with IPv4/IPv6 Dual Stack
 - IPv6 address assignment : DHCPv6-PD(HGW), RA(Consumer devices)
 - Auto-upgrade & Auto-configuration

Conclusion(2)

■ Features of IPv6 deployment on “commufa HIKARI”

- Providing a HomeGateway as a standard equipment
- IPv4/IPv6 Dual Stack Internet Access
- HGW Management system

Thank you
