

Policy Proposal Translations

Policy proposals to be discussed at APNIC 45

The Open Policy Meeting at APNIC 45/APRICOT 2018 in Kathmandu, Nepal, will be held on Tuesday, 27 February 2018.

APNIC Members and others interested in participating in the discussion of the following proposals, should join the Policy SIG mailing list and attend the Policy SIG meeting either in person or by remote participation.

prop-123: Modify 103/8 IPv4 transfer policy

This proposal allows the transfer of 103/8 addresses without the five-year restriction for delegations made before 14 September 2017.

prop-120: Final /8 pool exhaustion plan

Version 2 of this proposal provides guidance for exhaustion of the 103/8 pool (Final /8). Once a request cannot be fulfilled from the Final /8, the proposal suggests creating a waiting list that will be managed the same way as the Recovered Pool waiting list. APNIC will therefore manage two waiting lists – the Recovered Pool and the Final /8 Pool.

This proposal does not alter the amount of address space Members may receive from APNIC.

prop-119: Temporary transfers

A proposal to create a mechanism for temporary transfers that would allow organizations to have resources directly registered under them while they are the custodians of these resources. This could apply to “customer assignments” or to commercial leasing as an alternative to traditional ‘market’ transfer.

- <https://www.apnic.net/community/policy/proposals/prop-119>

prop-118: No need policy in APNIC region

This proposal is to remove the requirement to demonstrate need when transferring IPv4 addresses into or within the APNIC region. There is an exception where the resources are from an RIR region that requires needs-based policies, in which case, recipients must provide a plan use of at least 50% of the resources within five years. This policy would not apply to AS number transfers.
