**APNIC**

# Guide to manage the Incident Response Team (IRT) object in MyAPNIC

From **8 November 2010** IRT references are mandatory in the APNIC Whois Database. This means an 'irt' object reference will be mandatory when any 'inetnum', 'inet6um' and 'aut-num' objects are updated or created in the APNIC Whois Database.

Before you can create an IRT object you need to:

- Prepare your own 'Network abuse email contact' and processes, or
- Find an upstream ISP willing to be the contact for abuse reports related to your network

## Create an IRT Object

From 8 November 2010, when you log into MyAPNIC, you will be directed to create the IRT object [[Resources](#) → [IRTs](#) → [Add IRT Object](#)]. A partially pre-filled template will appear using your registered information. See the example below:

JOHN

APNICTRAINING-AU

LOGOUT

Home / Resources / Add IRT Object

## Add IRT Object

Info

If you want to use an IRT object that already exists in whois, click [here](#) to register that object.

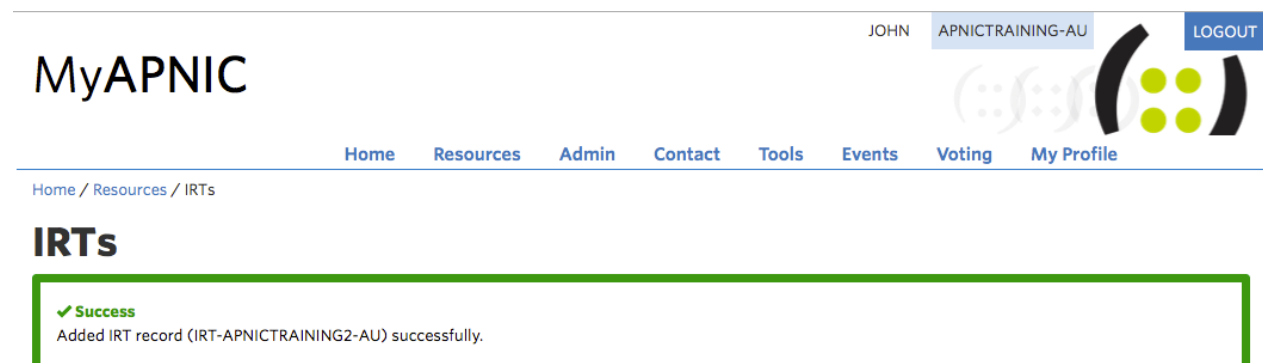

IRT name	IRT-APNICTRAINING2-AU
Network abuse email	helpdesk@apnic.net
Maintainer	MAINT-AU-APNICTRAINING
Address line 1	6 Cordelia Street
Address line 2	South Brisbane
Address line 3	QLD 4101
Address line 4	AUSTRALIA

Submit

**NOTE:**

- You can make changes to the template above; for example, you can change the address details.
- This object will be viewable in APNIC Whois Database.

3. Once you click on **'Submit'**, a **confirmation screen** like this will appear.

Add an existing IRT Object:

1. To add an existing IRT object(s) for your APNIC account, go to **Resources -> IRT** and click on **'Add Existing IRT Object'**.

A screenshot of the MyAPNIC website showing the 'Add Existing IRT Object' form. The header and navigation bar are identical to the previous screenshot. The breadcrumb trail is 'Home / Resources / Add Existing IRT Object'. The main heading is 'Add Existing IRT Object'. Below the heading, a text prompt reads: 'To add an existing IRT object in MyAPNIC, please enter the IRT object name and password below:'. The form consists of two input fields: 'IRT name' with the value 'IRT-EXAMPLE-AP' and 'Password' with the value 'MYPASSWORD&!'. A blue 'Submit' button is located below the password field.

Update existing IRT Object:

- 1. To update an IRT object, go to **Resources -> IRTs** and click on the desired IRT object in the IRT List.

[Home](#) / [Resources](#) / IRTs

# IRTs

The APNIC Whois Database now requires the IRT object to be referenced by your inetnum, inet6num, and aut-num objects. You should ensure that all IRT objects referenced by the whois objects you are managing are added to this list.

## Update multiple inetnum, inet6num and aut-num objects:

Note, you can use three methods to update your objects:

- Text file updates
- Bulk Whois Attribute Updates
- Zone File Upload

### Text file updates

1. To make bulk updates to your inetnum, inet6num and autnum objects in MyAPNIC go to:

**Resources → Bulk Whois Update**

JOHN

APNICTRAINING-AU

LOGOUT

MyAPNIC

[Home](#) [Resources](#) [Admin](#) [Contact](#) [Tools](#) [Events](#) [Voting](#) [My Profile](#)

Home / Resources / Bulk Whois Updates

## Bulk Whois Updates

### Text File Upload

Upload a plain text file containing the object templates you wish to register, update, or delete.

### Bulk Whois Attribute Updates

Update specific attributes across all of your whois objects.

### Zone File Upload

Upload a zone file to set the `nserver` and `ds-rdata` attributes for your existing domain objects.

## Bulk Updates

2. To make bulk updates to your inetnum, inet6num and autnum objects in MyAPNIC go to:  
**Resources → Bulk Whois Update**

MyAPNIC

Home Resources Admin Contact Tools Events My Profile

Home / Resources / Bulk Whois Updates / Bulk Whois Attribute Updates

## Bulk Whois Attribute Updates

### Bulk Update Requests

See the status of your current Bulk Whois Attribute Update requests.

#### Submit update request

You can do a bulk update of your inetnum, inet6num, and aut-num objects using the form below.

Whois type

Public

Object type

inetnum

Object attribute

mnt-irt

IRT-APNICTRAINING-AU

Resource range

61.45.248.0 - 61.45.255.255

Submit

1. Once a proper IRT object is selected for the resource range, click Submit.
2. If successful, following screen will be displayed.

## Bulk Whois Attribute Updates

### Bulk Update Requests

See the status of your current Bulk Whois Attribute Update requests.

#### Submit update request

##### ✓ Success

Your update request (ID 1091) has been accepted, and you will be notified via email once it is complete.

You can do a bulk update of your inetnum, inet6num, and aut-num objects using the form below.

Whois type	<input type="text" value="Public"/>
Object type	<input type="text" value="inetnum"/>
Object attribute	<input type="text" value="mnt-irt"/> <input type="text" value="IRT-APNICTRAINING-AU"/>
Resource range	<input type="text" value="61.45.248.0 - 61.45.255.255"/>
<input type="button" value="Submit"/>	

### Text File Updates

1. To do bulk updates for inetnum, inet6num, or aut-num objects, simply add the 'mnt-irt' attribute to each of the object templates.

#### NOTE:

\* All objects protected by APNIC-HM can only be updated by APNIC Hostmasters, that is, you can only make updates that are protected by your maintainer.

```
Bulk Update
inetnum: 61.45.248.0 - 61.45.248.127
netname: APNICTRAINING-AU
descr: Test Prefix
country: AU
admin-c: PJ392-AP
tech-c: PJ392-AP
status: ASSIGNED NON-PORTABLE
mnt-by: IRT-APNICTRAINING-AU
mnt-irt: IRT-APNICTRAINING-AU
changed: helpdesk@apnic.net 20160220
source: APNIC
```

2. To upload the text file click on '**Browse**' and search for the text file. Once the text file has been uploaded click on '**Submit**'
