Become a Member

APNIC
MEMBER

Be in control
Greater flexibility and reliability
with your own IP addresses

Be informed
Educational opportunities
with leading technical experts

Be involved
Connect with industry colleagues
and share best practices

APNIC Members include Internet Service Providers,
mobile/cloud operators, financial institutions, government
departments, universities and any organization with a significant
network infrastructure.

Benefits of membership

[Choose your peering and upstream providers as your IP addresses are portable

[Reduce the overhead of renumbering your network

[Access to Member-only portal to manage your Internet number resources and secure routing

❯ Receive discounted training and free online courses on a wide range of topics such as network security, IPv6, DNS, and BGP

❯ Access to technical assistance for expert advice on network operational technologies

❯ Network with other operators and industry experts, and share experiences at APNIC conferences and events throughout the year

❯ Participate in the Policy Development Process and influence how Internet number resources are managed in the Asia Pacific

❯ Free registration for up to four conference delegates per membership to the standalone APNIC conference

APNIC membership fees

As a new Member, you will pay a one-time only sign-up fee of AUD 500 and the annual membership fee before receiving resources. Membership is renewed every 12 months. Here is an example of the what the fees might be:

NEW MEMBER FEES - Example

IPv4	IPv6	ASN	Initial fee	Renewal fee
-	-	1	$1,000	$500
/24 (256 addresses)	/48	1	$1,680	$1,180
/23 (512 addresses)	/48	1	$2,034	$1,534
/23 (512 addresses)	/32	1	$2,494	$1,994

Important:

• Fees are in Australian dollars (AUD).

• Membership renewal fee is calculated based on your total IP holdings at the date of your membership anniversary.

• The amount of IP address space you receive is based on your demonstrated needs for 12 months.Organizations located in Least Developed Countries receive a 50% discount on all fees.

For more information on APNIC fees, visit: www.apnic.net/fees

What is an IP address?
An Internet Protocol (IP) address is a globally unique identifying number that devices need to communicate over the Internet. There are two versions: IPv4, which is 32 bits long, and IPv6, which is 128 bits long.

What is an AS Number?
A globally unique number that identifies a particular Autonomous System (AS). An AS is a connected group of one or more IP prefixes run by one or more network operators under a single and clearly defined routing policy.
