Minutes

1. Opening of meeting and declaration of quorum

The Chair of the Executive Council (EC Chair) welcomed all attendees to the meeting. The EC Chair declared the meeting open at 12:10 (UTC +10) on Monday, 21 February 2022, and noted that a quorum was present.

The EC Chair has designated Vincent Achie Atienza as the Chair of this meeting (Meeting Chair) and handed over the chairing of the meeting to him.

2. Agenda bashing

The Meeting Chair called for comments on the agenda. There were no new agenda items raised.

3. Declaration of interests

The Meeting Chair asked the EC members to review the Register of Interests (attached), declare any potential conflicts of interests, and for any such declaration to be recorded in the minutes.

All EC members present confirmed their entries in the Register of Interests were complete and correct.

4. Review of minutes of last meeting and record of circular resolutions passed since the last meeting

The following circular resolutions (that require the agreement of all EC members who are entitled to vote on the resolution) were passed by the EC during the period between the last EC meeting and this meeting and are recorded in these minutes for completeness.

> **Resolution 2022-01: The EC resolved to adopt the minutes of the EC meeting of 6, 7 and 9 December 2021.**

5. Matters arising from the last meeting

The following matters from the previous meetings were completed:

Action item 2021-10: The Secretariat to update the risk register. (See agenda item 18).

[Confidential information redacted]

6. **EC Chair update**

   The EC Chair provided the EC Chair update. He noted that there had not been much to report since the last meeting.

   He noted the ongoing NRO EC discussions, and noted that the DG will be giving an update on the recent NRO retreat in Dubai later in this meeting.

   He also asked the EC to consider what can be done to support those affected by the volcanic eruption and tsunami in Tonga.

   He reminded the EC to complete the annual WHS compliance training.

   He noted that the travel calendar has been updated. He suggested that the EC start planning for travels for the second half of 2022.

7. **WH&S update**

   Kam Sze Yeung spoke to the Workplace Health and Safety quarterly update.

8. **Financial reports**

   Irene Chan joined the meeting for this agenda item.

   Nathan Harvey spoke to the annual financial report presentation for 2021 (attached).

   The EC noted and discussed the annual financial report for the year ended 31 December 2021. The EC noted APNIC's equity position of AUD 38.8M, represents a 14% increase in total net assets through 2021. Total revenue was AUD 26.4M and total expenses were AUD 22.8M for the year. The operating results for the year was an operating surplus of AUD 3.6M which exceeded the budget by AUD 2.1M.

   As of 31 December 2021, APNIC had a total of 8,768 Members serving 53 economies. There were 770 new and reactivated Members and 343 Members who had closed their accounts, representing a net increase of 427 Members during 2021.

   Ernst & Young has issued an unmodified audit report on the financial report; however, the Auditor's Report has not yet been received. The EC would pass a circular resolution to accept the Auditor's Report once issued by the auditor.

   > **Resolution 2022-02: The EC resolved to adopt the Special Purpose Financial Report for 2021 as representing the financial position of APNIC as at 31 December 2021, noting that APNIC is solvent and able to pay its debts as and when they fall due.**

   Motion proposed by Kenny Huang; seconded by Yoshinobu Matsuzaki. Passed unanimously.

   [Irene Chan left the meeting at 13:08 (UTC +10)]

9. **HR report**

   Louise Tromp spoke to the HR report presentation.

Meeting adjourned at 13:26 (UTC +10), Monday, 21 February 2022

Meeting resumed at 13:50 (UTC +10), Monday, 21 February 2022

10. APNIC EC due diligence review

Jeremy Harrison spoke to the outcomes of a review into the APNIC EC governance procedures initiated in 2021, especially on the EC due diligence processes.

The EC discussed and acknowledged that the proposed recommendations were reasonable and should be implemented.

[Confidential information redacted]

11. Secretariat Report

The Director General spoke to the Secretariat Report (attached).

The EC discussed several items in the Secretariat Report at length.

The EC discussed the fee structure, membership growth and engagements in the NIR economies.

The EC considered the draft Annual General Meeting (AGM) agenda for APNIC 53 (attached).

> **Resolution 2022-03: The EC resolved to approve the draft agenda for the Annual General Meeting of 3 March 2022.**

Motion proposed by Paul Wilson; seconded by Kenny Huang. Passed unanimously.

12. APNIC fee structure

Karla Skarda spoke to the APNIC fee structure presentation related to the HRM fee changes.

The EC discussed the HRM fee changes at length and asked the Secretariat to finalize the changes set out in the APNIC Member Fee Schedule and the APNIC Non-Member Fee Schedule for EC consideration. It was suggested that this decision could be deferred until after the EC election.

13. Conference update

Tony Smith presented the APNIC 54 presentation.

The EC discussed the matter at length and agreed to hold a face-to-face component of APNIC 54 in September 2022 in a location outside the usual conference location rotation.

Action item 2022-02: The Secretariat to consider possible locations for APNIC 54 for EC consideration.

14. APNIC Foundation update

Duncan Macintosh spoke to the APNIC Foundation update presentation (attached).

The EC discussed several names for the potential board members of the APNIC Foundation.

[Confidential information redacted]

> **Resolution 2022-04: The EC resolved that Paul Wilson be appointed as APNIC's representative at the 2022 Annual General Meeting of each of APNIC Foundation Limited (Hong Kong) and APNIC Foundation Limited (Australia), with the power to make decisions and to vote on such matters as he considers appropriate or expedient at such meeting.**

Motion proposed by Kenny Huang; seconded by Yoshinobu Matsuzaki. Passed unanimously.

> **Resolution 2022-05: The EC resolved that each of: (1) Sylvia Efi Widyantari Sumarlin; (2) Tian Suning; (3) Sharad Kumar Sanghi; (4) Danish Ali Lakhani; and (5) Jun Murai be reappointed as a director of APNIC Foundation Limited (Hong Kong), subject to each of them first consenting and agreeing to be so appointed, and that Paul Wilson be authorized to sign any document or resolution on behalf of APNIC Pty Ltd to give effect to this resolution.**

Motion proposed by Yoshinobu Matsuzaki; seconded by Sumon Ahmed Sabir. Passed unanimously.

> **Resolution 2022-06: The EC resolved that each of: (1) Sylvia Efi Widyantari Sumarlin and (2) Danish Ali Lakhani be reappointed as a director of APNIC Foundation Limited (Australia), subject to each of them first consenting and agreeing to be so appointed, and that Paul Wilson be authorized to sign any document or resolution on behalf of APNIC Pty Ltd to give effect to this resolution.**

Motion proposed by Kenny Huang; seconded by Yoshinobu Matsuzaki. Passed unanimously.

15. APIDT update

Richard Brown joined the meeting for this agenda item.

Richard Brown spoke to the APIDT update presentation (attached).

[Richard Brown left the meeting at 17:10 (UTC +10)]

16. APNIC 53 EC Election procedures

Craig Ng noted that the EC election procedures remain consistent with the previous elections (attached).

> **Resolution 2022-07: The EC resolved to appoint DY Kim as Election Chair, Connie Chan and Andre Gelderblom of the APNIC Secretariat as Election Officers, and endorse the APNIC 53 EC Election procedures.**

Motion proposed by Kenny Huang; seconded by Paul Wilson. Passed without objection.

Vincent Achie Atienza, Kam Sze Yeung and Sumon Ahmed Sabir abstained from voting.

17. Risk register

Nathan Harvey spoke to the risk register presentation.

The EC noted the update on the strategic risks, and provided some comments on the current risk register.

Nathan Harvey discussed the changes and developments to be made to the risk register in the coming year.

18. Any other business

The Meeting Chair called for any other business.

a. Briefing for APNIC 53 AGM

The EC asked the Secretariat to reschedule the briefing.

Action item 2022-04: The Secretariat to reschedule the AGM briefing.

b. Travel matrix 2022

The EC would discuss the travel matrix at the mid-year EC meeting.

19. Closing the meeting

Vincent Achie Atienza handed the Chair duties back to the EC Chair. From this point, Gaurab Raj Upadhaya chaired the meeting.

The EC Chair noted that the Director General's remuneration review was to be completed. He proposed a meeting be held before the AGM.

Action item 2022-05: The Secretariat to schedule a private meeting for the EC to complete the DG's remuneration review.

Meeting adjourned at 17:35 (UTC +10), Monday, 21 February 2022

Meeting resumed at 16:55 (UTC +10), Thursday, 3 March 2022

20. Appointment of officeholders

The EC held officer elections, to take office immediately following the AGM.

In accordance with the APNIC By-laws, the Chair of the EC serves as Chair until his term as a member of the EC has expired. Gaurab Raj Upadhaya assumed the role of Chair of the Meeting. The presence of quorum was noted.
Nominations were called for the position of Treasurer. Yoshinobu Matsuzaki nominated Kenny Huang. There were no other nominations. Kenny Huang was elected unopposed as the Treasurer of the EC.

Nominations were called for the position of Secretary. Gaurab Raj Upadhaya nominated Vincent Achie Atienza. There were no other nominations. Vincent Achie Atienza was elected unopposed as the Secretary of the EC.

21. APNIC fee structure (continued)

There was a recap of the discussion from the previous meeting regarding the historical fee changes. There was significant discussion regarding the historical fee changes. The EC agreed to defer the discussion on this issue for the NIRs until the next meeting.

Action 2022-06: The Secretariat to circulate the revised fee schedules to the EC for approval.

22. Next meeting

The next EC meeting is tentatively scheduled for end of May 2022.

Meeting closed at 17:30 (UTC +10), Thursday, 3 March 2022

Agenda Item 8
Financial reports

APNIC Pty Ltd
ABN 42 081 528 010
Special purpose financial report
for the year ended 31 December 2021

Contents

Director's report

Your director submits his report on APNIC Pty Ltd (the "Company") for the year ended 31 December 2021.

Director

The sole director of the Company in office during the financial year and until the date of this report is Mr Paul Byron Wilson. The director has been in office for this entire period.

Dividends

The Company does not pay or declare dividends due to its non-profit status as determined by its constituent documents.

Principal activity

The principal activity during the year of the Company was to act as a not-for-profit internet registry organisation for the Asia-Pacific region.

There was no significant change in the nature of the activity during the year.

Operating results for the year

The net profit after tax of the Company for year ended 31 December 2021 was $4,668,679 (2020: $3,452,180). Included in the result is a $1,061,285 (2020: $650,379) gain on financial assets held at fair value through profit or loss.

The COVID-19 pandemic has continued to develop in 2021. The outbreak and the response of governments in dealing with the pandemic is interfering with general activity levels within the community and the economy. The Company's ability to carry out activities within the 56 economies under its responsibility including training and infrastructure delivery have been significantly impacted during the year as a result of travel restrictions and border closures due to the COVID-19 pandemic.

Significant changes in the state of affairs

There were no significant changes in the state of affairs of the Company during the year.

Significant events after the reporting period

There were no significant events occurring after the reporting period which may affect either the Company's operations or results of those operations or the Company's state of affairs.

Likely developments and expected results

Likely developments in the operations of the Company and the expected results of those operations in future financial years have not been included in this report as the inclusion of such information is likely to result in unreasonable prejudice to the Company.

Environmental regulation and performance

The Company is not subject to any particular or significant environmental regulation under laws of the Commonwealth or of a State or Territory.

Share options

No option to acquire shares in the Company has been granted to any person. No shares have been issued during the financial year or since the end thereof by virtue of the exercise of any options. There are no unissued shares under option at the date of this report.

Indemnification and insurance of director and officer

During the financial year, APNIC Pty Ltd paid a premium of $23,106 (2020: $22,460) to insure the director, officeholders (including executive council) and staff of the Company.

Director's report (continued)

Indemnification and insurance of director and officer (continued)

The liabilities insured are legal costs that may be incurred in defending civil or criminal proceedings that may be brought against the officers in their capacity as officers of entities in the Company, and any other payments arising from liabilities incurred by the officers in connection with such proceedings. This does not include such liabilities that arise from conduct involving a wilful breach of duty by the officers or the improper use by the officers of their position or of information to gain advantage for themselves or someone else or to cause detriment to the Company. It is not possible to apportion the premium between amounts relating to the insurance against legal costs and those relating to other liabilities.

Indemnification of auditors

To the extent permitted by law, the Company has agreed to indemnify its auditors, Ernst & Young (Australia), as part of the terms of its audit engagement agreement against claims by third parties arising from the audit (for an unspecified amount). No payment has been made to indemnify Ernst & Young (Australia) during or since the financial year.

Proceedings on behalf of the Company

No person has applied for leave of Court to bring proceedings on behalf of the Company or intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those. The Company was not a party to any such proceedings during the year.

Auditor's independence declaration

The director has received a declaration from the auditor of APNIC Pty Ltd. This has been included on page 3.

Signed in accordance with a resolution of the director.

Paul Byron Wilson
Director
Brisbane
21 February 2022

Auditor's independence declaration

{The Auditor's declaration will be provided by your Auditor.}

Notes to the financial statements

For the year ended 31 December 2021

1.   Corporate information

The financial statements of APNIC Pty Ltd (the "Company") for the year ended 31 December 2021 were authorised for issue in accordance with a resolution of the director on 21 February 2022.

APNIC Pty Ltd is a not-for-profit (NFP) company limited by shares, incorporated and domiciled in Australia.

The registered office and principal place of business of the Company is 6 Cordelia Street, South Brisbane, Queensland, 4101.

Further information on the nature of the operations and principal activity of the Company are described in the director's report.

2.   Significant accounting policies

2.1   Basis of preparation

In the director's opinion, the Company is not a reporting entity because there are no users dependent on general purpose financial reports.

These are special purpose financial statements that have been prepared at the request of the Executive Committee for the interest of the APNIC members and for the purpose of complying with the *Corporations Act 2001* requirements to prepare and distribute financial statements to the members and must not be used for any other purpose.

The financial statements have been prepared in accordance with *Corporations Act 2001* and with the recognition and measurement principles of all applicable Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board. It contains the disclosures that are mandatory under the following Accounting Standards:

AASB 101: *Presentation of Financial statements*
AASB 107: *Cash Flow Statements*
AASB 108: *Accounting Policies, Changes in Accounting Estimates and Errors*
AASB 1054: *Australian Additional Disclosures*

Accounting Standard AASB 10 *Consolidated Financial Statements* has not been adopted in the preparation of these special purpose financial statements.

These financial statements have been prepared under the historical cost convention, except for financial assets and liabilities measured at fair value.

2.2   Changes in accounting policies, disclosure, standards and interpretations

New and amended standards and interpretations

The new and amended Australian Accounting Standards and Interpretations that apply for the first time in 2021 do not materially impact the financial statements of the Company.

Accounting Standards and Interpretations issued but not yet effective

Australian Accounting Standards and Interpretations have recently been issued or amended but are not yet effective and have not been adopted by the Company for the annual reporting year ended 31 December 2021. The Company intends to adopt the new or amended standards or interpretations, when they become effective.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2.   Significant accounting policies (continued)

2.3   Summary of significant accounting policies

a) Going concern

The financial statements have been prepared on a going concern basis, which assumes continuity of normal business activities and the realisation of assets and the settlements of liabilities in the ordinary course of business. The financial statements show the Company has negative working capital of $3,099,903 (2020: $2,269,490). Whilst the Company is in a negative working capital position, there are non-current financial assets of $36,728,127 which can be realised on a short-term basis should the Company require funds to meet their current obligations.

The cash flow forecast prepared for the assessment of going concern, factors in certain estimates and assumptions which would be impacted by developments related to COVID-19 and the impact on the performance of financial assets and customer demand. The financial forecasts in response to COVID-19 have been adjusted, to account for the current and possible future impacts to revenue, expenses and cash flows.

For the year ended 31 December 2021, there was a cash inflow from operating activities amounting to $4,221,434 (2020: $5,394,728). As at this date, the Company had cash and cash equivalents amounting to $7,065,707 (2020: $7,081,222) and total net assets of $38,845,563 (2020: $34,176,884). With the strong cash and financial position, the director believes it remains appropriate to prepare the financial statements on a going concern basis.

b) Current versus non-current classification

The Company presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

•   Expected to be realised or intended to be sold or consumed in the normal operating cycle;

•   Held primarily for the purpose of trading;

•   Expected to be realised within twelve months after the reporting period, or

•   Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

•   It is expected to be settled in the normal operating cycle;

•   It is held primarily for the purpose of trading;

•   It is due to be settled within twelve months after the reporting period, or

•   There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and deferred tax liabilities are classified as non-current assets and non-current liabilities respectively.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2. Significant accounting policies (continued)

2.3 Summary of significant accounting policies (continued)

c) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Australian dollars ($), which is the Company's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

d) Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and on hand.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash, as defined above.

e) Trade and other receivables

Trade receivables are amounts due from customers for services performed in the ordinary course of business. They are generally due for settlement within 30 days and therefore are all classified as current. Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The Company holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest rate (EIR) method, less loss allowance.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectible are written off by reducing the carrying amount directly. An allowance account (future expected credit losses) is used when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the impairment allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original EIR. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

The amount of the impairment loss is recognised in profit or loss within other expenses. When a trade receivable for which an impairment allowance had been recognised becomes uncollectible in a subsequent period, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against other expenses in profit or loss.

f) Investments and other financial assets

(i) Classification

The Company classifies its financial assets in the following measurement categories:

• those to be measured subsequently at fair value (either through other comprehensive income (OCI) or through profit or loss), and

• those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows. For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. It has been elected that changes in fair value be designated through profit and loss.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2.   Significant accounting policies (continued)

2.3   Summary of significant accounting policies (continued)

f)   Investments and other financial assets (continued)

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Company commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the EIR method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss and other comprehensive income.

- Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the EIR method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss and other comprehensive income.

- Fair value through profit or loss (FVPL): Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment.

Dividends from such investments continue to be recognised in profit or loss as other income when the Company's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of profit or loss and other comprehensive income as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

(iv) Impairment

From 1 January 2019, the Company assesses on a forward-looking basis, the expected credit losses associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables, the Company applies the simplified approach permitted by AASB 9 *Financial Instruments*, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2. Significant accounting policies (continued)

2.3 Summary of significant accounting policies (continued)

f) Investments and other financial assets (continued)

Impairment losses on equity instruments that were recognised in profit or loss were not reversed through profit or loss in a subsequent year.

Subsequent measurement

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Company establishes fair value by obtaining independent valuation statements or by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity specific inputs.

g) Contract liabilities

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier) from a customer before the Company transfers the related goods or services. Contract liabilities are recognised as revenue when the Company performs under the contract (i.e., transfers control of the related goods or services to the customer).

h) Property, plant and equipment

Property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting year in which they are incurred.

Depreciation on assets acquired are calculated using the straight-line method to allocate their cost or revalued amounts, net of their residual values, over their estimated useful lives as follows:

Property related assets	2.5%-50%
Computer equipment	5%-50%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting year. Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss.

i) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU)'s fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2.   Significant accounting policies (continued)

2.3   Summary of significant accounting policies (continued)

i)   Impairment of non-financial assets (continued)

The Company bases its impairment calculation on most recent budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses are recognised in the statement of profit or loss and other comprehensive income as an expense.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss and other comprehensive income.

j)   Employee benefit liabilities

Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits, bonus, time-in-lieu and annual leave expected to be settled within 12 months after the end of the period in which the employees render the related service are recognised in respect of employee's services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liability for annual leave is recognised in the provision for employee benefits. All other short-term employee benefit obligations are presented as payables.

Other long-term employee benefit obligations

The Company also has liabilities for long service leave and annual leave that are not expected to be settled wholly within 12 months after the end of the year in which the employees render the related service. These obligations are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting year using the projected unit credit method.

Consideration is given to expected future wage and salary levels, experience of employee departures and years of service.

Expected future payments are discounted using market yields at the end of the reporting year of high-quality corporate bonds with terms and currencies that match, as closely as possible, the estimated future cash outflows. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

The obligations are presented as current liabilities in the statement of financial position if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting date, regardless of when the actual settlement is expected to occur.

k)   Issued capital

Ordinary shares are classified as equity.

l)   Revenue from contracts with customers

The Company has applied revenue recognition methodologies provided both under AASB 1058 *Income of not-for-profit entities* as well as AASB 15 for the purpose of recognising revenue.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2.   Significant accounting policies (continued)

2.3   Summary of significant accounting policies (continued)

l)   Revenue from contracts with customers (continued)

Revenue recognition under AASB 15

Under AASB 15, the Company recognises revenue when the control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements because it typically controls the goods or services before transferring them to the customer.

Revenue recognition and application of AASB 1058

AASB 1058 provides that an entity receiving certain 'volunteer services' or entering to 'certain transactions' and where the consideration to acquire an asset is significantly less than the fair value of the asset. In the latter case, the entity will recognise and measure the asset at fair value in accordance with the applicable Australian Accounting Standard (e.g. AASB 116 *Property, Plant and Equipment*).

AASB 1058 does not apply when a transaction completely falls under the scope of AASB 15 as a contract with a customer. This is when the transaction has the all the following characteristics:

- The transaction is enforceable and has sufficiently specific obligations;

- The goods or services are not retained by the entity for its own use; and

- The transaction is neither a donation transaction nor a volunteer service.

Accordingly, AASB 1058 applies to entity's transactions that are not ordinarily contracts at fair value with customers. The timing of income recognition depends on whether such a transaction gives rise to a liability or other performance obligation (a promise to transfer a good or service), or a contribution by owners, related to an asset (such as cash or another asset) received by an entity.

The Company has confirmed that there are no transactions significantly below the fair value, therefore AASB 1058 has no application on the entity, and therefore revenue is recognised for the major business activities using the methods outlined under AASB 15 as provided below:

(i) Member fees

Member fees are recognised over time where the performance obligation is satisfied over the period of membership. Member fees received in advance of the service being provided are classified as unearned income. Transfer fees, reactivation fees and application fees are recognised at a point in time where the performance obligation is satisfied when the service is performed.

Under AASB 1058, if the above fees include a donation element, the same is treated as 'donation' transactions and the value of the same is required to be recognised in the financial statements. A donation component, and thereby a donation transaction, exists if:

- The consideration to acquire an asset is significantly less than its fair value; and

- The intent is to primarily to enable the NFP entity to further its objectives

At present, there are no significant 'donation' components included within member fees. Therefore, there are no donation transactions to be recognised in the financial statements.

(ii) Volunteer services

Volunteer services received by the Company are recognised by principles enunciated under AASB 1058 to ascertain donation element contained in them and recognise the equivalent fair market value in the books of accounts.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2.   Significant accounting policies (continued)

2.3   Summary of significant accounting policies (continued)

l)   Revenue from contracts with customers (continued)

Under AASB 1058 a NFP entity may, as an accounting policy choice to recognise volunteer services, or a class of volunteer services, if the fair value of those services can be measured reliably, whether the services would have been purchased if they had not been donated. The value of such volunteer services shall be measured at fair value. On the initial recognition of volunteer services as an asset or an expense, an entity shall recognise any related amounts as well. The entity shall recognise the excess of the fair value of the volunteer services over the recognised related amounts as income immediately in profit or loss account.

The Company has represented to us that it cannot reliably measure the value of volunteer services received by it given the nature of its business, sparsity of volunteering received apart from inability to obtain comparative market estimates. Therefore, the Company has not recognised the value of volunteering services in its financial statements in accordance with the exemption provided by the AASB 1058.

Under AASB 1058, if the volunteer services include a donation element, the same is treated as 'donation' transactions and the value of the same is required to be recognised in the financial statements. A donation component, and thereby a donation transaction, exists if:

•   The consideration to acquire an asset is significantly less than its fair value; and

•   The intent is to primarily to enable the NFP entity to further its objectives

At present, there are no significant 'donation' components included in the volunteer services. Therefore, there are no donation transactions to be recognised in the financial statements.

(iii) Grants

Grants relating to costs are deferred and recognised in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

Grants are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

(iv) Dividends

Dividends received from investments in equity instruments are recognised in profit or loss, as other income, when the Company's right to receive payment is established.

m)   Taxes

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the applicable income tax rate adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the country where the Company operates and generates taxable income.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects either accounting nor taxable profit or loss.

Notes to the financial statements (continued)

For the year ended 31 December 2021

2.   Significant accounting policies (continued)

2.3   Summary of significant accounting policies (continued)

m) Taxes (continued)

Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled. Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

The Company has self-assessed that the "principle of mutuality" applies to its affairs and has calculated its income tax using this principle for the year ended 31 December 2021.

n) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the taxation authority, are presented as operating cash flows.

o) Comparative amounts

Where necessary, comparatives have been reclassified and repositioned for consistency with current period disclosures.

p) Significant accounting judgements, estimates and assumptions

The director evaluates estimates and judgements incorporated into the financial report based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Company.

There were no critical accounting judgements, estimates or assumptions exercised by management.

Notes to the financial statements (continued)

For the year ended 31 December 2021

3.   Revenue from contracts with customers

3.1   Disaggregated revenue information

Set out below is the disaggregation of the Company's revenue from contracts with customers:

1 fully paid ordinary share (2020: 1)	**1**	**1**

Ordinary shares entitle the holder to participate in dividends and the proceeds on winding up of the Company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote.

Ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

There were no movements in issued capital during the year (2020: none).

14. Commitments and contingencies

Commitments

The Company had no capital commitments at 31 December 2021 (2020: $nil).

Contingencies

The Company had no contingent assets or contingent liabilities at 31 December 2021 (2020: $nil).

Notes to the financial statements (continued)

For the year ended 31 December 2021

15.   Auditor's remuneration

The auditor of APNIC Pty Ltd is Ernst & Young (Australia) (2020: Deloitte Touche Tohmatsu).

	2021 $	2020 $
Amounts received or due and receivable by Ernst & Young (Australia) for:		
An audit or review of the financial report of the entity	37,000	31,000
Other services	5,000	4,000
	42,000	35,000

16.   Events after the reporting period

There were no significant events occurring after the reporting period which may affect either the Company's operations or results of those operations or the Company's state of affairs.

Director's declaration

In accordance with a resolution of the director of APNIC Pty Ltd, I state that:

In the opinion of the director:

    (a)   the Company is not a reporting entity as defined in the Australian Accounting Standards;

    (b)   the financial statements and notes of the Company are in accordance with the *Corporations Act 2001,* including:

        (i)   giving a true and fair view of the the Company's financial position as at 31 December 2021 and its performance for the year ended on that date; and

        (ii)   complying with Australian Accounting Standards to the extent described in Note 2.1 to the financial statements and complying with the *Corporations Regulations 2001*;

    (c)   there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Paul Byron Wilson
Director
Brisbane
21 February 2022

Independent auditor's report

{The Auditor's report will be provided by your Auditor.}

2021 Financial Report

All dollar values are denoted in Australian dollars (unless otherwise stated)

APNIC

Highlights

- Operating surplus of $3.6m exceeded budget by $2.1m ✔

- Revenue $550k below budget (2% of budget)

- Expenses $2.7m below budget ✔

- Equity position increased by $4.7m compared to FY2020 ✔

- Fair value surplus on financial assets $1.1m ✔

- Financial stability measure at 18.28* Months of Operating Expenses ✔

- Successful audit outcome ✔

*Calculation is based on the average monthly operating expenses of 2021 approved budget as it better reflects APNIC operating cost base in a COVID-free course of business

Revenue

Overall revenue was below budget by 2% ($550k)

Operating Revenue:

Membership fees and Sign-Up fees
- These fees finished slightly below budget with highlights as follows:
  - New members for the year was 763 (63 per month), below the budget estimate of 804
  - Average fees for new members was $1,423, below the budget assumption of $1,451
  - 33.6% of new members originated from LDC economies, above the budget assumption of 27.5%
  - Closure for the year was 343 (29 per month), above the budget estimate of 240

Sundry Income
- These include funding from lab research activities, Foundation receipts, sponsorship and fees from training registrations:
  - Foundation receipts were below budget due to the ongoing COVID-19 travel restrictions
  - COVID-19 travel restrictions also impacted the revenue for sponsorship and registration fees from training events
  - $100k not-for-profit COVID-19 business stimulus package from the Australian Government was voluntarily repaid

Revenue – Investment Income

Investment Income:

- Total investment income achieved $865k, exceeded budget by $103k

  - Investment returns were higher due to the injection of the additional $4m into the portfolio during the year

  - Since inception, the portfolio has returned 5.52% (after fees) against the benchmark (CPI +2.5%) or 4.34%

Investment Income against benchmarks:

APNIC

Expenses

Total expenses were below budget by 11% ($2.7m).

COVID-19 impacts ($1.6m savings on budget against travel and travel related expense categories):

- Border closures and ongoing travel restrictions

- No face-to-face meeting and training opportunities

- Limited sponsorship expenses

Communication expenses (-38%, $386k below budget):

- Delayed start in installation of root servers overseas as well as network presence and peering projects.

- The decision to drop setting up 24-hour network operation center also attributed to the reduction in expenses

Computer expenses (-13%, $228k below budget):

- Deferral of online community platform and source code vulnerability scanner projects to 2022

- Part year effect of implementing SSO APNIC login, managed vulnerability reporting program and security information and event management has also resulted in lower than budgeted expenses

Expenses cont'd

Contribution to APNIC Foundation (-100%, $566k below budget)

- The contingency provision was not drawn on due to the Foundation receiving sufficient funding from APIDT to support its activities.

Professional fees (-12%, $307k below budget)

- Savings due to conversion and recruitment of full-time employees originally budgeted as contractors.

- A corresponding increase in salary & personnel costs has been recognized.

APNIC

Expenses by Pillars

Total expenses was below budget by 11% ($2.7m). Major variance are:

Membership (-14%, $747k below budget):
- Membership engagement events were delivered remotely due to COVID-19 travel restrictions, which resulted in savings in travel related member services activities

Registry (-20%, $804k below budget):
- Registry activity communication expenses for the year was lower than budget due to delayed start in installation of root servers overseas as well as network presence and peering projects. The decision to drop setting up 24-hour network operation center also attributed to the reduction in registry expenses. Registry outreach activities were being conducted online due to COVID-19 travel restrictions

Development (-31%, $2.2m below budget):
- All training and APNIC conferences were being delivered online upon COVID-19 travel restrictions, which resulted in lower than budget development engagement activities travel expenses. The contingency provision for Foundation support activities was not being drawn on

Information (12%, $218k higher than budget):
- Higher than budgeted due to increase on information products management and blog activities. The increase was offset by the savings in related travel activities due to COVID travel restrictions

Capability (10%, $741k above budget):
- Increase on Internal Technical Infrastructure personnel activities to enhance the network infrastructure, internal security operations, and enterprise application management while savings on various activity expenses.

Membership Growth

Membership by Economy

Membership – LDC Graduation Timeline

2023		
Bhutan: 15 members	2024	
	Solomon Islands: 8 members	2026
		Bangladesh: 1,171 members **Laos:** 25 members **Nepal:** 138 members

1,357 members to graduate by 2026:
- 15.4% of existing total members
- BD is fastest growing APNIC economy - 25.5% of new members in 2021.
- All 2021 new accounts in graduating economies were very small (79%) and small (21%)

APNIC

Audit

New Auditor Appointment:

- Ernst & Young undertook the audit of 2021 accounts

- Previous Auditor, Deloitte (appointed in 2020 for and initial 2 years term) advised they were unable to complete audit within APNIC timeframes due to resourcing issues

- APNIC approached Tier 1 Auditors PwC & EY. Only EY had capacity to complete audit within required timeframes

Audit Outcome:

- Ernst & Young issued an unmodified audit report:

  - The accounts give a true and fair view of APNIC's financial position

  - Comply with the relevant accounting standards

January 2022 APNIC Financial Report

All dollar values are denoted in Australian dollars

APNIC

Highlights

- Operating surplus of $666k exceeded budget by $508k

- Revenue $373k below budget

- Expenses $880k below budget

- Equity position decreased by $452K as compared to FY2021

- Fair value loss on financial assets $1.1m

- Financial stability measure at 16.81* Months of Operating Expenses

Calculation is based on the average monthly operating expenses of 2022 approved budget as it better reflects APNIC operating cost base in a COVID-free course of business.

Table 1. Statement of Financial Position

Notes to Financial Position (Table 1):

The Statement of Financial Position shows that APNIC's net equity position increased by 14% ($4.7m) compared to the end of last year. Key drivers are:

- o The investment portfolio has increased by 18% ($5.7m) from cash injections ($4m), unrealised gains on revaluation ($1.1m) and investment income net of management fees ($630k).

- o Other assets have increased by 23% ($184k) due to increase in prepayment ($193k)

- o Provisions have increased by 21% ($467k) due to the accumulation of staff leave provision

o Unearned Revenue increased by 3% ($358k) which was in line with the net increase in membership fees revenue

2   Statement of Income

This annual financial report incorporates 2021 financial results compared with the budget and last year results.

Table 2. Statement of Income

Notes to Revenue (Table 2):

Operating revenue was 2% below budget for the year of 2021. Major variances are:

- **Membership fees and Sign-Up fees –** these fees finished slightly below budget. Membership growth in 2021 was tracking below budget projections.
  - New members for the year was 763, below the budget estimate of 804. There were 343 closures over the year, higher than the budget estimate of 240.
  - At the end of December, the average annual fee for closed accounts was $1,893, compared to the budget assumption of $1,892.
  - Average fees for new members over the year was $1,423, compared to the budget assumption of $1,451.
  - In 2021, 33.6% of all new members were eligible for LDC discount, compared to the budget assumption of 27.5%.
  - Overall revenue from Membership and Sign-up Fees were slightly below budget due to slow membership growth, while Transfer Fees was slightly higher than budget at the end of 2021.

- **Sundry income –** Includes Meeting and Training/Workshop Registrations, Sponsorship, Foundation income and funding for Labs research activities.
  - Foundation receipts were below budget due to the ongoing COVID-19 travel restrictions which impacted delivery of face-to-face training programs.
  - COVID-19 travel restrictions also impacted the revenue for sponsorship and registration fees from training and conference events.
  - A total of $100k not-for-profit business stimulus package from the Australian Government as part of the response to the impact of COVID-19 was received in the year of 2020 ($87.5k) and 2021 ($12.5k) respectively. The full amount was voluntarily repaid this year.

- **Investment income –** interest and investment income was $103k above budget.
  - While interest rates remained lower than budget, investment returns were higher due to the injection of an additional $4m into the portfolio during the year.
  - Since inception in August 2013, the portfolio has returned 5.52% (after fees) against the benchmark (CPI + 2.5%) of 4.34%.

Notes to Expenses (Table 2):

Total expenses were 11% below budget for the year of 2021. Major variances include:

- **Communication expenses (-38%, $386k below budget)** – savings due to the delayed start in installation of root servers overseas as well as network presence and peering projects. The decision to drop the setting up 24-hour network operation center also attributed to the reduction in expenses.

- **Computer expenses (-13%, $228k below budget) –** savings due to deferral of online community platform and source code vulnerability scanner projects to 2022; part year effect of implementing SSO APNIC login, managed vulnerability reporting program and security information and event management has also resulted in lower than budgeted expenses.

- **Contribution to APNIC Foundation (-100%, $566k below budget)** - The contingency provision was not drawn on due to the Foundation receiving sufficient funding from APIDT to support its activities.

- **Meeting and training expenses (-82%, $396k below budget) –** savings due to all training and APNIC conference events were being delivered online due to ongoing travel restrictions.

- **Professional fees (-12%, $307k below budget) –** savings due to conversion and recruitment of full time employees originally budgeted as contractors. A corresponding increase in Salary & Personnel costs has been recognized.

- **Sponsorship and publicity expenses (-43%, $239k below budget)** – savings due to COVID-19 travel restrictions impacting APNIC and NRO activities).

- **Travel expenses (-94%, $1m below budget) –** savings due to continual COVID-19 travel restrictions.

Notes to Operating Surplus/(Deficit) (Table 2):

The Operating Surplus was $2.1m higher than budget in 2021. The Net Surplus was $3.2m higher, due to the unrealised gain of $1m in the fair value adjustment of the APNIC investment portfolio.

3   Capital Expenditure

The table below provides overview of 2021 capital expenditure.

CAPITAL (AUD)	Actual 2021	Actual 2020	Variance %	Budget 2021	Budget Variance $	Budget Variance %
Equipment & Software	483,322	502,865	-4%	711,350	-228,028	-32%
Office Furniture & Fittings	9,244	14,408	-36%	2,030,000	-2,020,756	-100%
Total - Capital Expenditure	**492,566**	**517,274**	**-5%**	**2,741,350**	**-2,248,784**	**-82%**

Table 3. Capital Expenditure

Notes to Capital Expenditure (Table 3):

Capital expenditure was $2.2m below budget for the year. Major variances related to:

- Delay in order delivery for router and switch replacement due to global chips shortage; and

- Comprehensive renovation of 6 Cordelia Street provisioned for $2m in the budget proved unfeasible. Modest enhancements to amenities for supporting the transition to hybrid working models are being undertaken ahead of an anticipated office relocation in the next 2 – 3 years.

Table 4. Expense by Activity Pillars and Workstreams

Notes to Activity Reporting (Table 4):

This report includes the activity grouping into pillars and workstreams as outlined in the Strategic Plan and Activity Plan for 2021.

- **Membership (-14%, $747k below budget)** – membership engagement events were delivered remotely due to COVID travel restrictions and resulted in savings in travel related member services activities.

- **Registry (-20%, $804k below budget)** – registry activity communication expenses for the year were lower than budget due to delayed start in installation of root servers overseas as well as network presence and peering projects. The decision to drop setting up 24-hour network

operation center also attributed to the reduction in registry expenses. Registry outreach activities were being conducted online due to COVID travel restrictions.

- **Development (-31%, $2.2m below budget)** – all training and APNIC conferences were being delivered online upon COVID travel restrictions, which resulted in lower than budget development engagement activities travel expenses. The contingency provision for Foundation support activities was not required.

- **Information (12%, $218k higher than budget)** – higher than budgeted due to increase in information products management and blog activities. The increase was offset by the savings in related travel activities due to COVID travel restrictions.

- **Capability (12%, $838k higher than budget)** – higher than budget due to increase in Internal Technical Infrastructure personnel activities to enhance the network infrastructure, internal security operations, and enterprise application management while savings on various activity expenses.

5   APNIC Reserve

5.1   Cash Flow Statement

This report shows the cash flow status as at the end of December 2021.

Year end cash position has remained stable as compared to the beginning of the year. APNIC has generated $5.4m year to date cashflow from operating activities, out of which, $4m was injected into the investment portfolio.

Amount (AUD)	YTD Dec 2021
Total Operating Activities

Table 6. Cash Flow Statement

5.2 Capital Reserve

The Capital Reserve is diversified between Cash Investments, Investment Portfolio, and Property (APNIC Office). During 2021, $4m has been transferred from APNIC's operating accounts into the investment portfolio.

At the end of December, APNIC maintained $11.2m in cash reserves, $36.7m is invested in the investment portfolio and $5.5m invested in Property. Figure 3 below tracks the value and the allocation of these reserves over time and tracks the operating expenses for each year for comparison.

Figure 3. APNIC Reserves

5.3 APNIC's Equity and Reserves

By comparing the Total Equity (including retained earnings and unrealised capital gains) to the monthly Operating Expenses based on the approved budget for 2021 *, the number of month's coverage of operational expenses is set out below:

	2021*	2020*	2019	2018
Total Equity (AUD)	38,845,560	34,176,883	30,724,702	28,820,985
% Equity Covered By Cash/ Cash Equivalents	123%	124%	117%	116%
Monthly Operating Expenses (AUD) *	2,125,305	2,024,419	1,914,554	1,767,877
Number of Months of expenses covered by Equity*	**18.28**	**16.88**	**16.05**	**16.30**

* Calculation is based on the average monthly operating expenses of approved budget for 2020 and 2021, as it better reflects APNIC's operating cost base in a COVID-free course of business.

Table 7. Equity and Reserves

6 Membership

6.1 Membership Statistics

As at the end of December 2021, APNIC had a total of 8,768 Members serving 53 economies.

6.2 Membership by Category

Overall net membership growth for the year was 427 members. There have been:

- 770 new and reactivated members vs. 804 budgeted new members
- 343 closures vs. 240 budgeted account closures

6.5   Year-to-Date Membership Movement by Economy

Figure 7 shows new and closed membership movement by economy as at the end of December 2021. Consistent with previous months, year to date:

- Top 3 new member economies are Australia, Bangladesh and Hong Kong.
- Top 3 closed member economies are Australia, Hong Kong and China.

Until 2020, the Top 3 closed member economies have included Australia, Hong Kong and India.

Figure 7. New and Closed Members Analysis

6.6   Membership Closure Analysis

Figure 8 below provides an analysis of Membership account closures as at the end of December. 60.7% of the closures relate to accounts closed due to the failure to establish contact, the business is no longer operating, or breach of agreement, where resource holdings are returned to APNIC.

Figure 8. Closure Analysis

6.7   Membership Closures by Year Joined

Year Joined	Deregistered / Breach of Agreement	Market transfer	Membership transfer to NIR	Merger & Acquisition	Non Payment [Uncontactable]	Non Payment [Contactable]	Voluntary member closure	Transfer to Other RIR	Grand Total
1997				1					1

Grand Total	15	56	7	59	99	21	73	13	343

Table 9. Membership Closure by Year Joined

The top three closure reasons in 2021 are:

- Non-payment (uncontactable) – 99 closures (2020: 84)
- Voluntary closure – 73 (2020: 74)
- Mergers and Acquisitions – 59 (2020: 50)

In 2021, there were 56 closures due to market transfer vs. 24 closures in 2020. The increase coincides with the expiry of the 5-year transfer restriction on IPv4 delegations made under the last /8 policy.

6.8 Membership Closures by Economy

In December, there has been – 9 market transfers, 9 members' merger & acquisitions, 6 non-payment members closures (contactable & uncontactable), 3 voluntary members closures, 3 members transferred to NIR (IRINN) and 4 transferred to other RIR (RIPE NCC and ARIN)

Table 10. Membership Closure by Economy

Monthly Financial Report

(in AUD)

January 2022

APNIC

Table of Contents

1   Executive Summary

Overview

This report provides the financial status for January 2022, compared with January budget provisions and actuals for the same period last year. It shows an operating surplus of $665,902 and a net deficit of $452,032 after fair value loss on financial assets.

APNIC holds net assets of $38,393,528 which is a 1% year-to-date reduction. The combined effect of equities and bond market movement has seen a decrease in value of the investment portfolio by $1.1m.

The Statement of Financial position (Table 1)

The Statement of Financial Position compares APNIC's assets, liabilities and equity at the end of January against the 2021 year-end balances.

Equity has reduced by 1% or $452k, a result of the net deficit position at the end of January.

The Statement of Income (Table 2)

The Statement of Income compares APNIC's January 2022 income and expenditure with January budget provisions and actuals for the same period last year.

Revenue: Membership and Sign-Up fees are tracking very close to the budget estimates up to end of January.

- Net membership growth (new & re-activated members less closures) is 0.42% YTD for 2022 vs 0.49% same time last year (See Figure 1: Net Membership Growth YTD).

- Year-to-date new member growth is 64 vs budget of 67. Year-to-date account closures is 35 vs budget of 26.

- Year-to-date average fees for new members is $1,324, compared to budget assumption of $1,435. The average annual fee for closed accounts is $1,646, compared to the budget assumption of $1,769. 38.6% of all new members are eligible for the LDC discount, compared to the budget assumption of 27.5%.

	2022 YTD	2021 YTD
New Members	64	51
Reactivated Members	8	5
Closure	-35	-15
Net Change	**37**	**41**
As at 1 Jan	8,768	8,341
Net Change	37	41
As at 31 January	8,805	8,382
Year to Date Growth %	**0.42%**	**0.49%**

Figure 1. Net Membership Growth YTD

Foundation Receipts and Expenses: Foundation receipts are expected to align more closely with budget estimates as 2022 Foundation funded projects are being implemented.

For greater transparency, APNIC is now reporting 'Foundation Receipts' and 'Foundation Expenses' separately as Revenue and Expenses. Previous accounting treatment was to offset the Foundation receipts and expenses within the Income Statement.

Expenses: Operating expenses are expected to align more closely with budget estimates as the 2022 Activity Plan is being implemented. COVID-19 is continuing to impact travel activity, meeting and training expenses and sponsorship.

Fair Value Loss on Financial Assets: The value of the investment portfolio has reduced by $1.1m in the month of January. APNIC does not budget for increases or decreases in the investment portfolio due to market volatility. Therefore, the decrease in value of the portfolio has impacted the net result and attributed to the net deficit for the period.

Capital Expenditure (Table 3)

Capital Expenditure: is tracking below budget due to timing of order delivery. Capex is expected to align more closely with budget estimates as the 2022 Activity Plan is being implemented.

2 Statement of Financial Position

The Statement of Financial Position compares APNIC's assets, liabilities and equity at the end of January 2022 against the 2021 year end balances.

Table 6. Cash Flow Statement

6.2   Capital Reserve

The Reserve is diversified between Cash Investments, Investment Portfolio, and APNIC Property (i.e. APNIC Office). At the end of January, APNIC maintained $11.2m in cash reserves, $35.7m has been invested in the investment portfolio and $5.4m invested in APNIC Property. Figure 4 below tracks the value and the allocation of these assets over time and tracks the operating expenses for each year for comparison:

Figure 4. APNIC Reserves

6.3   APNIC's Equity and Reserves

By comparing the Total Equity (including retained earnings and unrealised capital gains), and the Monthly Operating Expenses based on the approved budget, excluding Foundation project expenses*, the number of month's coverage of operational expenses is set out below:

	YTD 2022*	Actual 2021*	Actual 2020*
Total Equity (AUD)	38,393,528	38,845,560	34,176,883
% Equity Covered By Cash/ Cash Equivalents	122%	123%	124%
Monthly Operating Expenses (AUD) *	2,283,484	2,125,305	2,024,419
Number of Months of expenses covered by Equity*	**16.81**	**18.28**	**16.88**

Table 7. Equity and Reserves

* Calculation is based on the average monthly operating expenses of the approved budget, excluding Foundation project expenses, as it better reflects the APNIC operating cost base in a COVID-free course of business.

7 Membership

7.1 Membership by Category

There were 72 new and reactivated members and 35 account closures in January 2022. Overall net membership growth is 37 members. Year to date there have been:

- 64 new members vs. 67 budgeted new members
- 35 closures vs. 26 budgeted account closures

As at the end of January 2022, APNIC had a total of 8,805 Members serving 53 economies.

Membership	Total Dec 2021	YTD New Jan-22	Reactivation Adjustment	YTD Closed Jan-22	YTD Size Change Jan-22	Total Jan-22	% Total
Extra Large	26	0		0	0	26	0%

4. Appendix

4.1. Explanations

Accrued Interest
Accrued interest is not displayed for financial instruments with variable interest rate or frequency within the same interest period, except for Floating Rate Notes. For FINER Revexus, the accrued interest displayed is based on the deposit currency for reference purpose only. Entitlement to the accrued interest depends on the product features. All accrued interests are displayed in the reporting currency of the portfolio and are calculated recognizing trades end of day. The FX conversion rates (reflected below) are used to convert the amount from original currency to reporting currency. The accrued interest payable/receivable is displayed as the net amount on Current Account balances. As a result of the foregoing and other factors, the accrued interest is only an estimate and may not reflect the actual interest accrued, if any.

Activity Summary
The asset inflows and outflows include client-instructed transactions, which are aggregated as Net Investment Asset Flows. Non-Investment Flows refer to transactions related to Non-Investment Related Positions such as loan transactions to finance such Non-Investment Related Positions. Non-investment Flows do not contribute to the performance of the account. Such asset inflows and outflows do not include fees and taxes.

Analyses
Values displayed for the respective month labels are as of month-end dates. If the report end period is not a month-end, the report period end month label will show the values as of the report period end date.

Asset Classification
If an instrument is classified as 'not classifiable', the instrument is pending its proper classification. As soon this is available in the system, the instrument will reflect the correct classification.

Cost Valuation Exchange Rates
For the Positions section, the cost valuation exchange rate displayed is always the instrument currency against the portfolio currency.
For the Transactions section, the cost valuation exchange rate displayed is always between the instrument currency and reporting currency. For execution of FX purchase/sale transactions, the transaction valuation is based on the end of day exchange rate on the value date and the cost valuation is based on the FX contract rate.

Duration

Modified duration is a change in the price of a bond arising from a change in market yields. Modified duration is expressed as an approximate percentage. The investment report displays the Modified Duration method for all Fixed Income instruments.

Income Summary
Coupon received and coupon paid, as well as interest earned and interest paid, does not include accrued or unpaid coupon or interest.
Year to date figures include the addition of the monthly figures inclusive of any backdated income processing/ adjustments.
Figures shown can be gross or net depending on the specific country and market practice.
Non-Investment related Income is included in the Income Summary.

Market Value
The values stated as begin of period are asset values as of the last reported statement period. The values stated as beginning/ ending market values are asset values that are inclusive of most updated market prices and backdated transactions.

Non-allocable Effect
As a general rule, in most cases the sum of all the return contributions usually equal the portfolio return figure indicated. In some cases, however, the two figures may not tally exactly (for example, due to rounding differences). These discrepancies are being accounted for and indicated as "Non-allocable effect" return contribution.

Non-Investment Related Positions
Non-Investment Related Positions refer to non-asset/ non-investment type positions such as those relating to insurance policies or mortgages. Guarantees, standby letters of credit, holdcovers or other credit instruments which have been issued by the Bank pursuant to facilities granted are reflected under the sub-section entitled "Pro Memoria Positions".
Non-Investment Related Positions are displayed in the Scope of Analysis and in the Non-Investment Related Positions section. However, they are not included in any other analyses.

Profit/ Loss Calculation
Realized and unrealized profit and loss are calculated by comparing the market or transaction value with the average cost value. For every trade date the system computes the average cost, first processing investments before disinvestments. Transaction costs are included in both realized and unrealized profit/loss calculation.

001970938 012 058

For realized profit and loss for FX Spots, Forwards and Swaps (including all currencies and Precious Metals) in Transactions section, in the 'Execution of FX Purchase' and 'Execution of FX Sales' rows, the value in the realized Profit/Loss column is calculated by comparing the Transaction Valuation based on the end of day exchange rate on the Value Date against the Cost Valuation based on the FX contract rate; this does not mean that the Profit/Loss for that transaction can be or has been cashed out.

Unrealized profit/ loss displayed in the Positions section are calculated as of the reporting date. FX conversion rates used in the computation of the unrealized profit/loss is the derived rate based on the average price as of the individual transaction date.

For unrealized profit and loss for Precious Metal Account and Current Account in Position Section, where there have been FX Spots, Forwards and Swaps transactions (including all currencies and Precious Metals), the Cost Valuation exchange rate is calculated based on the weighted average end of day exchange rate on respective transactions' value date. The value in the unrealized Profit/Loss column is calculated by comparing the Current Valuation (based on conversion rates stated in the statement) as of reporting date against Cost Valuation.

Rating
Rating refers to the rating of an investment product and is either based on information available to the Bank or is obtained from sources believed to be reliable by the Bank as of the investment report date.

Return contribution
The contribution figure refers to the contribution of an individual asset category and/or currency to the overall performance on a portfolio level. The figure is calculated based on investment related positions using the TWR Daily method (Time Weighted Rate of Return), the return is computed by aggregating the daily returns.

Reference to the average weight of an instrument is computed by dividing the aggregated daily instrument weight by the number of days in the reporting period. The daily weight of an instrument is calculated by dividing the instrument's start of day market value and cash flow by the portfolio's start of day market value and cash flow.

Yield
The investment report displays Yield for all Fixed Income instruments and is displayed per market price.

Abbreviations

BID = Bid Price
CLO = Closing Price
NAV = Net Asset Value

Rounding logic

Values in this investment report are calculated with exact numbers, however when presenting the data, values are rounded and therefore minor rounding differences might occur.

Large Numbers

The figures are consolidated and shown in denominations of thousands, millions and billions where applicable. If a value is too long to be displayed in the report itself, e.g. 1,526,555,333.26 the figure is consolidated and displayed as 1,526,555.33 in thousands in the report. If the value exceeds the column limit, a further division will take place and the phrase in millions/in billions will be displayed.

Conversion Rates as of 31.12.2021

AUD 1.0000 = JPY 83.5714
AUD 1.0000 = USD 0.7260
EUR 1.0000 = AUD 1.5587

GBP 1.0000 = AUD 1.8603

001970938 012 058

4.2. Legal Information

This ad-hoc investment report is a statement of account provided to you upon your request and in accordance with and subject to the Account Opening Terms and Conditions.

For accounts booked with Credit Suisse AG, Hong Kong Branch: This ad-hoc investment report has been generated specifically for you as additional information for reference only and is not to be treated as the monthly statement of account under section 11(2) of the Securities and Futures (Contract Notes, Statements of Account and Receipts) Rules which we provide to you on a regular basis. This ad-hoc investment report shall be conclusive and binding if the Bank does not receive your objection in writing to any matters contained in this ad-hoc investment report within 90 days from the issue date.

For accounts booked with Credit Suisse AG, Singapore Branch: This ad-hoc investment report shall be conclusive and binding if the Bank does not receive your objection in writing to any matters contained in this ad-hoc investment report within 14 days from the issue date. Assets detailed within this ad-hoc investment report will not be directly custodised by Credit Suisse AG, Singapore Branch but with third party custodians in accounts for and on behalf of Credit Suisse AG, Singapore Branch, unless otherwise informed by the Bank.

For All:
Please refer to the Important Notice on Sales Disclosure to Investors for sales related information including information on monetary benefits received by the Bank where it distributes an investment product to you.

The prices reflected for instruments and other information detailed within this ad-hoc investment report are attained or derived by the Bank from market data sources believed to be reliable, however the Bank does not make any representation as to the accuracy or completeness of such prices or information. In the absence of reliable market reference prices, the Bank may assign a nominal value or make an appropriate comment on the ad-hoc investment report. As a result, this ad-hoc investment report may contain price indications or comments as the Bank sees appropriate in the prevailing circumstances. If you have any queries in this respect, please contact your Relationship Manager.

The Bank provides price indications for financial derivatives transactions, structured products and non-listed financial instruments based upon available market reference prices believed to be reliable. The Bank does not make any representation as to the accuracy or completeness of price indications for transactions nor the guarantee to buy/sell at the price indicated. The

Bank does not accept liability for any loss arising from the client's use of, or reliance on, such price indications. The price indications of the initial purchase price may be different from the actual purchase price.

The Bank will, at the time of printing this ad-hoc investment report, use the last price indications available to it. Due to the time differences between the Asia Pacific region and markets in other regions, the price indications reflected by the Bank in this ad-hoc investment report will not always reflect the price indications available on the last business day of the reporting period in certain markets.

The Bank may use either an onshore or offshore CNY rate for FX conversion to reporting currency depending on the asset. Please note that there may be a differential between the onshore and offshore rate. Please refer to your Relationship Manager if you need further information on the FX conversion rate applied in relation to your CNY positions.

Please note that financial institutions are preparing to transition away from Interbank Offered Rates (IBORs) to alternative reference rates (ARRs). This may affect products issued by Credit Suisse or third parties in your portfolio. Please refer to our Credit Suisse IBOR website www.credit-suisse.com/IBOR for more information, or reach out to your Credit Suisse Relationship Manager with any questions you may have.

Please be aware that the financial industry's transition away from IBOR interest rate benchmarks may have an impact on valuations of OTC derivative transactions, as the inputs that Credit Suisse uses to calculate valuations may change.

If you have any credit facilities in place with the Bank, please note that potentially all of the assets detailed within this ad-hoc investment report may be held as collateral for those facilities. If you have any questions in relation to the collateral for your facility, please contact your Relationship Manager.

The information in this ad-hoc investment report does not constitute legal or tax advice. You should consult your legal and/or tax experts if you need any such advice. The investment report does not take tax rules and regulations into consideration, and thus it cannot be used for tax reporting purposes.

The fee charged for the provision of the Bank's Advisory Service (referring to portfolio(s) ending with -30 to -39) is a Flat Fee notwithstanding that prior to June 2017 the fee may have been described as a Management Fee or All-In Fee in statements or documents received by the client whether by hardcopy, email, Internet Banking or any other form of delivery.

Hong Kong Deposit Protection Scheme (the "DPS"): "Protected deposit" is defined under section 2(1) of the Deposit Protection Scheme Ordinance (Cap. 581 of the Laws of Hong Kong) (the "Ordinance"). Protected deposit does not include those specified in section 1 of Schedule 1 of the Ordinance. In particular, please note that a deposit held or placed in an account with the Bank's Singapore branch is not a protected deposit (as defined in the Ordinance) and consequently is not eligible for the protection under the DPS, notwithstanding that the account holding the deposit is managed by representatives of the Bank's Hong Kong branch. In addition, a deposit held or placed in an account with the Bank's Hong Kong branch where the current term negotiated and agreed exceeds 5 years is not a protected deposit as defined in the Ordinance and consequently is not eligible for protection under the DPS. Certificates of Deposit: Investments in certificates of deposit are not protected deposits as defined in the Ordinance and consequently are not eligible for protection under the DPS.

An individual who is an account holder of an Individual or Joint Account with RMB Services opened and maintained with the Bank's Hong Kong branch is requested to notify the Bank immediately if there is any change to such individual's status in terms of holding a HK Identity Card or not.

This ad-hoc investment report is an electronically generated report and does not require a signature.

CREDIT SUISSE

APNIC Monthly Reporting

Summary

- The APNIC portfolio was indicatively up 0.78% in December.

- Global equities advanced 1.77% in AUD terms on the back of positive data on both the economic and virus front.

- Australian equities advanced 2.76%.

- Global bonds yields rose as central banks shifted towards less accommodative tones.

Market Commentary

Equity markets bounced back in December, supported by positive data on both the economic and virus front. However, a strengthening AUD partially offset some of the gains from international equities for Australian investors. In AUD terms, US, Europe, Emerging Markets and Australian equities returned 1.42%, 3.66%, -0.57% and 2.76%, respectively. In bond markets, global yields trended higher as central banks shifted towards less accommodative tones.

The Australian economic recovery accelerated in November alongside the continued easing of Delta related lockdown measures, with the improvement in the services sector being particularly pronounced. The labour market delivered a positive surprise, adding 366k jobs to the economy, which brought the unemployment rate down to 4.6%. Retail sales growth accelerated to 7.3% MoM in November, compared to 4.9% in the month prior. The RBA meeting in December was relatively uneventful following the surprise abandonment of the Yield Curve Control program in November and without a meeting in January, policy makers have indicated that they will review their bond buying program in the February meeting which will likely set the tone for 2022.

Economic data for the US has also been trending upwards despite an Omicron variant led surge in COVID-19 cases. The US ISM Manufacturing PMI printed at 58.7 in December, pointing to strong expansion in factory activity. The labour market continued its strong recovery with 807k new jobs added to the economy in December, more than doubling economist expectations. However, the strong economic momentum has also

put strong upward pressure on inflation and the US Core PCE, the Fed's preferred inflation measure, surprised to the upside with a 4.7% YoY reading in November. This suggests that higher inflation is now more persistent and less temporary than the central bank had previously anticipated and triggered a hawkish shift from the Fed to accelerate the end of easy monetary policy.

The economic recovery in Europe continued in December but the pace has slowed with key governments in the region reimposing virus containment measures at year-end. The Eurozone Markit Manufacturing PMI printed at 58.0 for December, well above the 50.0 mark which separates expansion from contraction, but a touch down from the 58.4 level observed in November. Retail sales was surprisingly resilient in November, increasing 1.0% for the month, but a poll in December showed a fall in Services Sentiment, suggesting Omicron variant related concerns remain a downside risk to economic recovery. At the same time, the Eurozone CPI increased from 4.1% to 4.9% in November which kept the Euro Area Core inflation rate at an obstinately high level of 2.6%, placing the ECB in the difficult position of supporting economic recovery while also attempting to contain inflation to its 2.0% target.

The rate of economic growth in China has been soft compared to global peers but incremental improvements in the latest data is encouraging. The Caixin Manufacturing PMI returned to expansionary territory in December with a reading of 50.9, up from 49.9 in the prior month. The Services PMI also took a step up in December from 52.1 to 53.1. Given the Chinese government's commitment to stabilising the economy and supporting growth, the tepid growth outlook could drive further fiscal stimulus in early 2022.

Significant Recent Portfolio Changes

Position	Comments
AXA World Funds – Global Inflation Linked Bonds / CSAM Global Inflation Linked Bond Fund	Sold / Bought: Switched out of AXA fund to CSAM fund for inflation-linked bond allocation as the latter more accurately tracks the benchmark.
CBA	Decreased: Fully valued, lower margins weakening income growth.
Eiger Australian Small Companies Fund / Perennial Better Future Trust	Bought: Increase small cap exposure to market weight via the addition of positions in two small cap managers with good track record and capacity for further inflows.
SPDR US Financial / iShares ESG Aware MSCI USA Small Cap ETF	Sold / Bought: Added exposure to US small caps in line with favourable shift in Global Investment Committee view which is based on bottom up analysis that valuation is more attractive. Funded by closing out financials position which has done well.
Resmed	Increased: Performing well with opportunities to grow market share.
Westpac	Decreased: Revenue weaker than expected undermining upside from targeted efficiencies
Woolworths	Decreased: Fully valued with positive restructuring of group completed.

Outlook

The Global Investment Committee (GIC) reassessed several risks across two meetings in December, including the tensions between Western countries and Russia, the potential for an energy crisis in Europe and Omicron COVID-19 variant related concerns. Although Omicron appears linked to a lower rate of hospitalisations, we are conscious that its highly infectious nature could still have a meaningful economic impact. Already making up for three quarters of COVID-19 cases in US alone, it is spreading rapidly at a global scale, increasing risks for the return of stringent lockdowns to provide relief to challenged healthcare systems. This comes at a time when global inflation is at elevated levels and central banks are reducing monetary stimulus. To manage these risks, the GIC believes it is prudent to close out the positive equities bias, previously expressed through developed markets.

Accordingly, we have brought the overall equities position in portfolios down to benchmark weight by reducing the allocation to European and US equities. That being said, we still believe that equity markets have upside potential over a 6-month time horizon, as our base case still calls for robust global growth to be maintained over the medium term. Within equities, we maintain a slight cyclical tilt in portfolios, preferring markets and sectors like Japan, financials and materials.

4. Appendix

4.1. Explanations

Accrued Interest
Accrued interest is not displayed for financial instruments with variable interest rate or frequency within the same interest period, except for Floating Rate Notes. For FINER Revexus, the accrued interest displayed is based on the deposit currency for reference purpose only. Entitlement to the accrued interest depends on the product features. All accrued interests are displayed in the reporting currency of the portfolio and are calculated recognizing trades end of day. The FX conversion rates (reflected below) are used to convert the amount from original currency to reporting currency. The accrued interest payable/receivable is displayed as the net amount on Current Account balances. As a result of the foregoing and other factors, the accrued interest is only an estimate and may not reflect the actual interest accrued, if any.

Activity Summary
The asset inflows and outflows include client-instructed transactions, which are aggregated as Net Investment Asset Flows. Non-Investment Flows refer to transactions related to Non-Investment Related Positions such as loan transactions to finance such Non-Investment Related Positions. Non-investment Flows do not contribute to the performance of the account. Such asset inflows and outflows do not include fees and taxes.

Analyses
Values displayed for the respective month labels are as of month-end dates. If the report end period is not a month-end, the report period end month label will show the values as of the report period end date.

Asset Classification
If an instrument is classified as 'not classifiable', the instrument is pending its proper classification. As soon this is available in the system, the instrument will reflect the correct classification.

Cost Valuation Exchange Rates
For the Positions section, the cost valuation exchange rate displayed is always the instrument currency against the portfolio currency.
For the Transactions section, the cost valuation exchange rate displayed is always between the instrument currency and reporting currency. For execution of FX purchase/sale transactions, the transaction valuation is based on the end of day exchange rate on the value date and the cost valuation is based on the FX contract rate.

Duration

Modified duration is a change in the price of a bond arising from a change in market yields. Modified duration is expressed as an approximate percentage. The investment report displays the Modified Duration method for all Fixed Income instruments.

Fees/ Taxes
Fees include management or safekeeping fees.
Taxes include value-added taxes and service related taxes, depending on country specific rules.

Income Summary
Coupon received and coupon paid, as well as interest earned and interest paid, does not include accrued or unpaid coupon or interest.
Year to date figures include the addition of the monthly figures inclusive of any backdated income processing/ adjustments.
Figures shown can be gross or net depending on the specific country and market practice.
Non-Investment related Income is included in the Income Summary.

Market Value
The values stated as begin of period are asset values as of the last reported statement period. The values stated as beginning/ ending market values are asset values that are inclusive of most updated market prices and backdated transactions.

Non-allocable Effect
As a general rule, in most cases the sum of all the return contributions usually equal the portfolio return figure indicated. In some cases, however, the two figures may not tally exactly (for example, due to rounding differences). These discrepancies are being accounted for and indicated as "Non-allocable effect" return contribution.

Non-Investment Related Positions
Non-Investment Related Positions refer to non-asset/ non-investment type positions such as those relating to insurance policies or mortgages. Guarantees, standby letters of credit, holdcovers or other credit instruments which have been issued by the Bank pursuant to facilities granted are reflected under the sub-section entitled "Pro Memoria Positions".
Non-Investment Related Positions are displayed in the Scope of Analysis and in the Non-Investment Related Positions section. However, they are not included in any other analyses.

Performance Calculation

The performance figures are calculated based on investment related positions using the TWR Daily method (Time Weighted Rate of Return), which is based on geometrically linking daily rates of return.

The start of period displayed for the performance calculation is referring to Beginning Market Value, which is the closing balance of the previous day. The end of period displayed is referring to Ending Market Value, which is the closing balance of the day.

The net of fees and gross of taxes return is calculated after deduction of fees and before deduction of taxes.

The cumulative return calculation is reset, every time when geometrically linking the rates of return would render distorted values. Such scenarios can happen when the market values fluctuate around zero.

Return values prior 2015 displayed in this report might be different from previously reported return values.

Profit/ Loss Calculation
Realized and unrealized profit and loss are calculated by comparing the market or transaction value with the average cost value. For every trade date the system computes the average cost, first processing investments before disinvestments. Transaction costs are included in both realized and unrealized profit/loss calculation.

For realized profit and loss for FX Spots, Forwards and Swaps (including all currencies and Precious Metals) in Transactions section, in the 'Execution of FX Purchase' and 'Execution of FX Sales' rows, the value in the realized Profit/Loss column is calculated by comparing the Transaction Valuation based on the end of day exchange rate on the Value Date against the Cost Valuation based on the FX contract rate; this does not mean that the Profit/Loss for that transaction can be or has been cashed out.

Unrealized profit/ loss displayed in the Positions section are calculated as of the reporting date. FX conversion rates used in the computation of the unrealized profit/loss is the derived rate based on the average price as of the individual transaction date.

For unrealized profit and loss for Precious Metal Account and Current Account in Position Section, where there have been FX Spots, Forwards and Swaps transactions (including all currencies and Precious Metals), the Cost Valuation exchange rate is calculated based on the weighted average end of day exchange rate on respective transactions' value date. The value

in the unrealized Profit/Loss column is calculated by comparing the Current Valuation (based on conversion rates stated in the statement) as of reporting date against Cost Valuation.

Rating
Rating refers to the rating of an investment product and is either based on information available to the Bank or is obtained from sources believed to be reliable by the Bank as of the investment report date.

Return contribution
The contribution figure refers to the contribution of an individual asset category and/or currency to the overall performance on a portfolio level. The figure is calculated based on investment related positions using the TWR Daily method (Time Weighted Rate of Return), the return is computed by aggregating the daily returns.

Reference to the average weight of an instrument is computed by dividing the aggregated daily instrument weight by the number of days in the reporting period. The daily weight of an instrument is calculated by dividing the instrument's start of day market value and cash flow by the portfolio's start of day market value and cash flow.

Yield
The investment report displays Yield for all Fixed Income instruments and is displayed per market price.

Abbreviations

BID = Bid Price
CLO = Closing Price
NAV = Net Asset Value

Rounding logic
Values in this investment report are calculated with exact numbers, however when presenting the data, values are rounded and therefore minor rounding differences might occur.

Large Numbers
The figures are consolidated and shown in denominations of thousands, millions and billions where applicable. If a value is too long to be displayed in the report itself, e.g. 1,526,555,333.26 the figure is consolidated and displayed as 1,526,555.33 in thousands in the report. If the value exceeds the column limit, a further division will take place and the phrase in millions/in billions will be displayed.

Conversion Rates as of 31.1.2022
AUD 1.0000 = JPY 81.1830
AUD 1.0000 = USD 0.7033
EUR 1.0000 = AUD 1.5876

GBP 1.0000 = AUD 1.9089

4.2. Legal Information

This ad-hoc investment report is a statement of account provided to you upon your request and in accordance with and subject to the Account Opening Terms and Conditions.

For accounts booked with Credit Suisse AG, Hong Kong Branch: This ad-hoc investment report has been generated specifically for you as additional information for reference only and is not to be treated as the monthly statement of account under section 11(2) of the Securities and Futures (Contract Notes, Statements of Account and Receipts) Rules which we provide to you on a regular basis. This ad-hoc investment report shall be conclusive and binding if the Bank does not receive your objection in writing to any matters contained in this ad-hoc investment report within 90 days from the issue date.

For accounts booked with Credit Suisse AG, Singapore Branch: This ad-hoc investment report shall be conclusive and binding if the Bank does not receive your objection in writing to any matters contained in this ad-hoc investment report within 14 days from the issue date. Assets detailed within this ad-hoc investment report will not be directly custodised by Credit Suisse AG, Singapore Branch but with third party custodians in accounts for and on behalf of Credit Suisse AG, Singapore Branch, unless otherwise informed by the Bank.

For All:
Please refer to the Important Notice on Sales Disclosure to Investors for sales related information including information on monetary benefits received by the Bank where it distributes an investment product to you.

The prices reflected for instruments and other information detailed within this ad-hoc investment report are attained or derived by the Bank from market data sources believed to be reliable, however the Bank does not make any representation as to the accuracy or completeness of such prices or information. In the absence of reliable market reference prices, the Bank may assign a nominal value or make an appropriate comment on the ad-hoc investment report. As a result, this ad-hoc investment report may contain price indications or comments as the Bank sees appropriate in the prevailing circumstances. If you have any queries in this respect, please contact your Relationship Manager.

The Bank provides price indications for financial derivatives transactions, structured products and non-listed financial instruments based upon available market reference prices believed to be reliable. The Bank does not make any representation as to the accuracy or completeness of price indications for transactions nor the guarantee to buy/sell at the price indicated. The

Bank does not accept liability for any loss arising from the client's use of, or reliance on, such price indications. The price indications of the initial purchase price may be different from the actual purchase price.

The Bank will, at the time of printing this ad-hoc investment report, use the last price indications available to it. Due to the time differences between the Asia Pacific region and markets in other regions, the price indications reflected by the Bank in this ad-hoc investment report will not always reflect the price indications available on the last business day of the reporting period in certain markets.

The Bank may use either an onshore or offshore CNY rate for FX conversion to reporting currency depending on the asset. Please note that there may be a differential between the onshore and offshore rate. Please refer to your Relationship Manager if you need further information on the FX conversion rate applied in relation to your CNY positions.

Please note that financial institutions are preparing to transition away from Interbank Offered Rates (IBORs) to alternative reference rates (ARRs). This may affect products issued by Credit Suisse or third parties in your portfolio. Please refer to our Credit Suisse IBOR website www.credit-suisse.com/IBOR for more information, or reach out to your Credit Suisse Relationship Manager with any questions you may have.

Please be aware that the financial industry's transition away from IBOR interest rate benchmarks may have an impact on valuations of OTC derivative transactions, as the inputs that Credit Suisse uses to calculate valuations may change.

If you have any credit facilities in place with the Bank, please note that potentially all of the assets detailed within this ad-hoc investment report may be held as collateral for those facilities. If you have any questions in relation to the collateral for your facility, please contact your Relationship Manager.

The information in this ad-hoc investment report does not constitute legal or tax advice. You should consult your legal and/or tax experts if you need any such advice. The investment report does not take tax rules and regulations into consideration, and thus it cannot be used for tax reporting purposes.

The fee charged for the provision of the Bank's Advisory Service (referring to portfolio(s) ending with -30 to -39) is a Flat Fee notwithstanding that prior to June 2017 the fee may have been described as a Management Fee or All-In Fee in statements or documents received by the client whether by hardcopy, email, Internet Banking or any other form of delivery.

Hong Kong Deposit Protection Scheme (the "DPS"): "Protected deposit" is defined under section 2(1) of the Deposit Protection Scheme Ordinance (Cap. 581 of the Laws of Hong Kong) (the "Ordinance"). Protected deposit does not include those specified in section 1 of Schedule 1 of the Ordinance. In particular, please note that a deposit held or placed in an account with the Bank's Singapore branch is not a protected deposit (as defined in the Ordinance) and consequently is not eligible for the protection under the DPS, notwithstanding that the account holding the deposit is managed by representatives of the Bank's Hong Kong branch. In addition, a deposit held or placed in an account with the Bank's Hong Kong branch where the current term negotiated and agreed exceeds 5 years is not a protected deposit as defined in the Ordinance and consequently is not eligible for protection under the DPS. Certificates of Deposit: Investments in certificates of deposit are not protected deposits as defined in the Ordinance and consequently are not eligible for protection under the DPS.

An individual who is an account holder of an Individual or Joint Account with RMB Services opened and maintained with the Bank's Hong Kong branch is requested to notify the Bank immediately if there is any change to such individual's status in terms of holding a HK Identity Card or not.

This ad-hoc investment report is an electronically generated report and does not require a signature.

CREDIT SUISSE

APNIC Monthly Reporting

Summary

- Global equities retreated -2.42% in AUD terms on the back of a hawkish Fed and expectation of earlier interest rate hikes

- Australian equities declined -6.35%.

- Global bonds yields rose as central banks brought forward their tightening plans

Market Commentary

Equity markets pulled back in January as hawkish comments from the Fed, high CPI prints and rising bond yields saw global equity markets sell off. However, a weakening AUD helped boost returns from international equities for Australian investors. In AUD terms, US, Europe, Emerging Markets and Australian equities returned -2.82%, -1.75%, 1.08% and -6.35% respectively. In bond markets, global yields rose sharply as central banks brought forward their tightening plans.

The Australian economy continued to show resilience despite the spike of COVID-19 cases to a record high with improvements in job numbers being particularly prominent. Reflecting the rebounding economy, unemployment fell to 4.2%. However, inflation surprised on the upside with the RBA's preferred "trimmed mean" printing at 2.6% YoY for the December quarter. Despite this, the RBA kept its benchmark cash rate at 0.1% but said its quantitative easing program would end on 10th February, following a slew of strong economic data.

US economic activity indicators were slightly weaker. US ISM Manufacturing PMI printed at 57.6 in January, down from 58.7 in December and the ISM Services PMI fell to 59.9 in January, down from 62.3 in December. Despite supply chain impediments, small increases were seen in production, new orders and supply deliveries. The labour market continued its strong run, with little obvious impact from Omicron with 467k new jobs added to the economy in January, exceeding economist expectations. However, strong business activity and economic growth has put upward pressure on inflation.

The US Core PCE, the Fed's preferred inflation measure, continued to rise with a 4.9% YoY reading in December. Persistently high inflation has caused a hawkish Fed to shift its policy guidance towards the faster tapering of asset purchases and earlier interest rate hikes.

Economic data for Europe was mixed as the region deals with geopolitical tension between the US, Russia and Ukraine, volatile energy prices and ongoing COVID-19 restrictions. The Eurozone Markit Manufacturing PMI printed at 58.7 in January, up from 58 observed in December with production and new orders registering faster increases as manufacturers reported an easing of supply chain issues. However, retail sales fell 3% for December as the Omicron variant of COVID-19 constrained activity. Eurozone CPI marginally increased from 4.9% to 5.0% in December which kept Euro Area core inflation unchanged at 2.6%' but still above the ECB target of 2.0%. Though any potential military conflict and rise in energy prices could worsen the inflation picture as the region attempts to emerge from the Omicron wave of the pandemic.

Soft economic data continued out of China as COVID-19 restrictions and uncertainty around property developers continue to depress economic growth. The Caixin Manufacturing PMI returned to contraction territory with a reading of 49.1 in January down from 50.9 in December, missing market consensus of 50.4. However, economic growth surprised to the upside with a GDP reading of 4%YoY. Given the uncertainty around future growth, more policy support may be introduced in 2022 to further stimulate the economy.

International Equities	Overweight
Alternative Investments	Neutral

Significant Portfolio Changes

Position	Comments
BlackRock Emerging Companies Absolute Return Fund	Bought: Initiating position in new hedge fund.
CS Thematic Opportunities Fund / iShares S&P 500 AUD-Hedged ETF	Sold / Bought: A recent review of managed funds held in the portfolio resulted in the loss of conviction for the CS Thematic Opportunities Fund. Factors considered included recent underperformance and the dilutive effect of the fund's multi-strategy approach on alpha. Proceeds were reallocated to a broad US market exposure.
Dexus	Decreased: Reduced property exposure down to neutral after strong run in recent weeks.
Magellan Financial	Sold: With the unexpected CEO departure and loss of their largest client we regard Magellan as being in a high risk phase and have therefore excited the investment.
Marshall Wace Global Opportunities Fund	Sold:Taking profits.
iShares FTSE100 ETF GBP	Sold: Exited following a call by the Global Investment Committee to neutralise previously favourable UK view.
iShares NASDAQ100 ETF USD^	Decreased: Reduced following a call by the Global Investment Committee to neutralise previously favourable view on developed market equities.

Outlook

The Global Investment Committee (GIC) continued to see multiple risks in January. Geopolitical tensions between the USA, Russia and Ukraine have deepened, the pandemic is not yet over and persistently high inflation, which could force the Fed to a rate-hiking strategy that is more aggressive than expected, all represent a worst-case scenario. However, January is the starting point of a meaningful economic and financial transition in 2022 and bouts of volatility are symptoms of the bumps to be expected as we move to more normal monetary policy. As it usually is, the Fed holds the key to the course markets and its management of inflation, but positively, global economic growth is still robust, and the omicron wave appears to have peaked in many countries. Having de-risked a positive bias in December, the GIC believes its prudent to remain cautious but is comfortable with a current neutral stance on equities.

That being said, robust demand fundamentals should continue to support strong economic growth through the rest of the year which supports further upside potential to equity markets.

APNIC Secretariat Report

EC Meeting

21 February 2022

Online

Strategic Plan

VISION
A global, open, stable, and secure Internet.

MISSION
To provide essential services as a Regional Internet Registry, and to support Internet development in the Asia Pacific region.

STRATEGIC PILLARS

| 1 MEMBERSHIP | 2 REGISTRY | 3 DEVELOPMENT | 4 INFORMATION | 5 CAPABILITY |

VALUES
Passion – Trust – Curiosity – Accountability – Inclusion

CREDO
WE ARE APNIC

MEMBERSHIP

Member Services

- Total Members 8,768 (↑5% on 2020);
  NIR sub accounts 12,089 (↑ 21% on 2020)

- Service satisfaction 93% 'excellent' and
  'above average' (830/891)

- Helpdesk response time SLA 100% met

- 22 fraud attempts detected and prevented

- 526 User Feedback Group participants

- Resolved 81 critical and high impact website
  accessibility issues impacting users with a
  disability

- 2,125 feedback items received;
  473 required action and resolved

Membership Products

- Help Centre deployed with 50 articles in 7 categories; 74% users found it 'helpful'

- Community Platform pilot for 110 users, product launch in 2022

- MyAPNIC improvements
  - Invoice in advance, downloadable receipts, removal of billing surcharge for instalment payments
  - Voting system updates for elections at APNIC 52
  - Architecture conversion from WordPress to Java
  - Completed migration of billing, elections and portal features to microservice architecture
  - Better EC election dashboard

Help Centre Feedback

Welcome to the APNIC Online Community

The APNIC Online Community portal provides you, as a member of the Asia Pacific Internet community, with the opportunity to connect with your peers, and share information about your work, research and professional development across a variety of technical, operational and governance fields.

Everyone is welcome to participate. APNIC places special emphasis on diversity and encourages women and young professionals, especially those from developing economies, to take part.

APNIC is piloting the following groups in this initial deployment of the portal:

- APNIC Academy
- APNIC 52 Fellows (Private)
- SWITCH SEA (Private)
- User Feedback Group

The community want to hear from you. Start contributing now!

Please be mindful of the APNIC Community Code of Conduct when participating.

Help us make the APNIC Online Community better

If you have any feedback about this pilot, please let us know here.

Available IPv4 Address Space

- 488,704 historical IPv4 addresses voluntarily returned to free pool

- 99.4% IPv4 address pool allocated; 0.6% available

Registry accuracy

- IRT email validation rate 74.3%
  - Simplified email and notification templates
  - Better IRT functionality in MyAPNIC

- Worked started on measuring NRO data for ITHI
  - Comprehensive and Correct (below), and Current (coming in 2022)

Type of record	Number of records	Score	% of total records
Have a parent block with org object and IRT	36,912	100	89.5%
Have no org object and no IRT	3,125	0	7.6%
Have IRT but no org object	1,189	50	2.9%
Have org object but no IRT	2	50	.0004%

Type of record	Number of records	Score	% of total records
Have a parent block with org object and validated IRT	30,217	100	73%
Have no org object but no IRT	6,697	50	16%
Have nor org object and no validated IRT	3,950	0	10%
Have validated IRT but no org object	392	50	1%

Comprehensive

Correct

Reclaiming unused IPv4

- 1,909 /24s returned to APNIC

- 4,300 /24s (approx) remaining to be reclaimed in 2022

Registry Products

- NIR API implementation in progress

- Significant performance improvement to ARMS (5-10x faster)

- 'Next-Generation Registry' design work begun

- RPKI repository made entirely atomic to avoid inconsistency

- RPKI updates to MyAPNIC to improve route management

- NRO RDAP profile published in IANA RDAP registry

- MyAPNIC users can manage BYOIP attributes directly

DEVELOPMENT

Policy Development

Proposal	Result
prop-130: Modification of transfer policies	APNIC 51: No consensus, abandoned.
prop-133: Clarification on Sub-Assignments	APNIC 51: Reached consensus, adopted.
prop-135: Documentation	APNIC 52: Reached consensus, adopted.
prop-136: Registration requirements	APNIC 52: Reached consensus, adopted.
prop-137: IPv6 assignment for Associate Members	APNIC 52: Reached consensus but returned to author for clarification.
prop-138: Restricting AS-ID in ROA	APNIC 52: Accepted as a guideline only.
prop-139: SOR not required	APNIC 52: Reached consensus, adopted.
prop-140: Update End-Site Definition	APNIC 52: Reached consensus, adopted.
prop-141: Change maximum delegation size of IPv4 from 512 (/23) to 768 (/23+/24)	APNIC 52: No consensus, returned to mailing list.

- Policy SIG Community Consultation in March; Policy Document Review Working Group formed with 44 participants

- WG submitted nine proposals for APNIC 52 Policy SIG; four were accepted and all reached consensus

Bertrand Cherrier, Policy SIG Chair

APNIC Conferences

- APNIC 51 / APRICOT 2021
  - 852 attendees from 61 economies
    - Tutorials: 416
    - Conference: 552
  - 3,855 YouTube views

- APNIC 52
  - 706 attendees from 48 economies
    - Tutorials: 374
    - Conference: 543
  - 3,438 YouTube views
  - Introduced new chat (Cometchat) and automated transcription (Otter)
  - NPS of 62 from delegate survey

Fellowship Program

- New six-month online program
  - 11 technical, policy and Internet governance presentations
  - Training by APNIC Academy
  - Sessions with community mentors

- 46 fellows (24 female + 22 male)
  - 86% attendance in program
  - 136 Academy courses + 26 webinars completed

CAPABILITY

Internal Technical Infrastructure

Architecture and technical coordination	• Use of OpenAPI to describe internal APIs now standard practice • Rust now a supported language for APNIC product development • Centralized product build tooling deployed to select products
Network and infrastructure operations	• Shared POP deployment in SG for critical services and M-root in progress • Signed up to NextDC carbon offset program • Brisbane to HKIX connectivity via PCCW completed • New 24/7 service status page deployed
System and platform operations	• Deployed two new high-performance storage arrays in two data centres • Migrated DNSSEC signer from Secure64 to Knot • Deployed RDNS anycast nodes in HK, MX, CA, UK • Deployed whois node in KDDI data centre • RRPD upgraded and deployment in Google Cloud in Virginia and SG progressing • Reconfiguring HSM for HA service to RPKI • Community mailing lists interface upgraded
Internal security operations	• 52 vulnerability reports received; all actioned • Readiness for ISO27001 certification achieved • Outsourced vulnerability reporting and continuous penetration testing (HackerOne) • Rapid7 deployed for vulnerability scanning and SIEM
Enterprise application management	• Implemented upgraded backup solution for CRM • Initial implementation of DocuSign completed • Zoom room technology and Zoom phone rolled out
Service availability	• 99.99% critical services; 99.98% non-critical services

Finance and Employee Experience

- External surveillance audit for ISO9001:2016 QMS

- Annual audit of 2020 accounts completed by Deloitte

- COVID-19 response
  - Hybrid working model of WFH and WFO continues
  - Monthly financial forecasts to monitor income and expense variations

- 76% of APNIC teams adopted Agile working processes

- 20 permanent and five casual roles successfully filled
  - Two new directors appointed (Services and Finance)
  - Nine contractors and six CTs engaged

- Workspace review — 2-year future needs
  - Prior to planned relocation

- Upgraded internal (staff) intranet

APNIC Secretariat Report

1 January – 31 December 2021

CONFIDENTIAL DRAFT 1.0

Content

Figures

Tables

Executive Summary

Introduction

This report is provided to the APNIC Executive Council (EC) for the quarterly meeting on 21 February 2022. It provides a summary of activities from 1 January to 31 December 2021.

The structure of this report reflects the APNIC Strategic Plan 2020-2023 and the 2021 Operational Plan, with activities reported according to Strategic Pillar and Workstream, and against their Success Measures.

Feedback on this report is very welcome.

Highlights

The following is a summary of significant highlights for the year to date, also grouped according to Strategic Pillar.

Membership

- All responses to Member queries were met within the 48-hour SLA. (1A.1).

- 473 feedback items were resolved (on conferences, training, staff presentations, website information). The User Feedback Group grew to 526 (target 500) (1A.2).

- 783 new Members joined APNIC (7 from Service Partners and 11 from Member referrals). Current total membership stands at 8,768 (1A.3).

- The online Help Centre was deployed in February (1B.1).

- Voting system updates for SIG and IANA RC elections were concluded for APNIC 52, and voting was successfully completed (1B.1)

- The prototype Online Community Platform was trialled with three communities and 110 users (1B.2).

Registry

- APNIC received 8,192 ASNs from IANA (2A.1).

- The percentage of Members holding IPv6 reached 68.43% in July (2A.1).

- Confirmation rate for IRT email validations is 74.3% (2A.2).

- 488,704 IPv4 addresses have been reclaimed by APNIC (2A.3).

- prop-133, -135, -136, -139, -140 were endorsed by the EC for adoption; prop-138 was accepted as a guideline only (2C.1).

- A community Working Group (WG) was formed to review the Policy Document Review Report. Four proposals submitted by the WG were discussed at APNIC 52 (2C.3).

Development

- APRICOT 2021 and APNIC 52 attracted 1,588 attendees, with 7,293 additional live views via YouTube (3A.1).

- Automatic conference session transcription using 'Otter.ai' replaced stenographers at APNIC 52 (3A.1).

- APNIC 52 achieved a Net Promoter Score of 62 in the attendee survey (3A.1).

- 46 fellows (25 females) were selected for the online fellowship program. Eleven presentations were delivered with 86% attendance (3A.2).

- 28 technical community events were supported, and technical support was provided to 14 online NOG events (3C.1).

- Staff participated in 43 security community events (3C.2).

- A new study about Internet Success Factors was commissioned by APNIC and LACNIC, with Analysys Mason selected. The report was presented at the 2021 IGF (3C.3).

- APNIC was involved in the conducting three sessions at the IGF, and two workshops at the APrIGF (3C.4).

- From January to Dec 2021, APNIC recorded 302 engagements (3C.6).

- The APNIC EC initiated and held four quarterly meetings with community elected leaders (3D.1).

- A survey on language understanding and translation was completed with 489 responses (3D.3).

- APNIC Academy launched one new course, six new labs, and additional language support in online courses (3E.1).

- 96 training courses were delivered to 2,382 attendees, and 20 webinars to 1,202 attendees (3E.2).

- The proportion of IPv4 address holders with ROAs grew from 24.4% to 36.1%. (3E.5).

- A new ROA measurement tool was released to help monitor RPKI deployment (3E.5).

- IPv6 capability in the Asia Pacific reached 37.65% (3E.6).

- Deployment of M-root servers is progressing in 11 locations (3F.3).

Information

- The Blog averaged 68,721 views per month, 6.1% above 2020's monthly average of 64,778 (4A.1).

- The Internet Directory was renamed Resource Explorer (REx) (4A.2).

- 43 APNIC Labs research articles were published, and 41 research presentations delivered (4B.3).

Capability

- A new service status page was created to display the real-time operational status of APNIC's services (5A.2).

- RPKI service infrastructure is being improved to support data centre failover (5A.3).

- A major SSO system upgrade is in progress, to be completed in March 2022 (5A.6).

- The annual financial audit was completed and presented to the EC at APNIC 51 (5B.2).

- 20 permanent roles (including two new Directors for the Services and Finance areas) and five casual roles were filled (5C.3).

- A workspace remodelling consultancy has been engaged to inform work to the existing premises as well as requirements for potential new premises (5C.7).

Budget Performance

The following table summarizes budget performance to date, for FTE (staff time) allocation, and operational and capital expenditure, across all workstreams.

Pillar	Workstream	FTE			Expense			Capital		
		Budget	Actual	Variance	Budget	Actual	Variance	Budget	Actual	Variance
Membership	Member Services	8.58	9.51	-11%	2,253,270	2,219,361	-2%	-	7,935	0%
	Membership Products	12.28	9.25	-25%	2,473,335	1,856,909	-25%	-	-	
	Membership Reporting	1.56	1.12	-28%	715,263	619,054	-13%	-	-	
Registry	Registration Services	4.53	4.89	8%	842,899	890,233	6%	-	-	
	Registry Products	9.04	6.18	-32%	2,580,512	1,831,592	-29%	-	-	
	Policy Development	0.64	0.64	-1%	545,263	442,384	-19%	-	-	
Development	APNIC Conferences	5.04	4.75	-6%	1,466,163	930,345	-37%	43,150	4,296	-90%
	Foundation Support	1.58	1.24	-22%	571,518	76,428	-87%	-	-	
	Community Engagement	6.38	4.46	-30%	1,826,724	1,410,868	-23%	-	-	
	Community Participation	1.52	1.37	-10%	310,076	244,552	-21%	-	-	
	APNIC Academy	10.8	8.07	-25%	2,392,222	1,886,157	-21%	15,000	16,351	9%
	Internet Infrastructure Support	0.76	1.03	35%	551,384	379,668	-31%	60,000	1,231	
Information	Information Products	5.52	9.31	69%	985,151	1,254,806	27%	-	-	
	Research and Analysis	1.02	1.00	-2%	799,201	747,795	-6%	80,000	62,532	-22%
Capability	Internal Technical Infrastructure	6.2	14.78	138%	1,903,032	2,472,811	30%	353,200	390,978	11%
	Finance and Business Services	10.14	11.45	13%	2,207,847	2,353,479	7%	30,000	9,244	-69%
	Employee Experience	4.65	5.69	22%	1,945,989	2,137,539	10%	2,160,000		-100%
	Governance	2.76	1.96	-29%	1,133,807	1,065,271	-6%	-	-	
		93	96.7	4%	25,503,657	22,819,252	-11%	2,741,350	492,566	-82%

Notes: 🟩 <= 25% variance 🟧 > 25% <= 50% variance 🟥 > 50% variance

Table 1: Budget performance summary

Tracking Success Measures

The status of Success Measures in the document's following pages is denoted by a coloured circle for at-a-glance reference on progress.

🟢 Completed

🟠 At least 90% complete

🔴 Less than 90% complete

1   Membership

1A   Member Services

Operations

1A.1   Member service delivery

Service requests SLA

- The SLA to respond to Member queries within 48 hours (two working days) has been 100% met.

Service satisfaction ratings

- 93% of service satisfaction ratings (830/891 requests) were either 'Excellent' or 'Above Average'.

- Follow up of all 'Poor' ratings revealed 16 poor feedback ratings were submitted in error when completing the feedback form, and the form was improved in July to reduce the chances of error.

- Other 'poor' ratings included 13 requests that were out of scope for the Helpdesk, 11 requests by Members with additional questions, one because the Member account was overdue for renewal, and one bug report.

Figure 1: Service SLA and satisfaction

Member Outreach

- There were 148 Member Services engagements across 47 economies, covering RPKI, resource transfers, technical assistance, awareness of upcoming events, and a security incident involving the APNIC Whois Database.
Member Outreach by Subregion & Economy

Figure 2: Touchpoints per economy

Fraud Handling

- Fraud cases remained low, with most involving attempts to open APNIC accounts with fabricated documents.

- Two membership applications were received from individuals claiming to be students needing resources for research but identified as existing Members seeking more IPv4 addresses.

Type	Jan	Feb	Mar	Apr	May	June	July	Aug	Sep	Oct	Nov	Dec
Identity theft	-	-	-	-	-	-	-	2	-	-	-	-
Fabricated documents	-	1	2	2	-	3	1	1	4	1	1	2
Fabricated needs	-	-	-	-	2	-	-	-	-	-	-	-
Total fraud cases	0	1	2	2	2	3	1	3	4	1	1	2

Table 2: Fraud cases

	Success Measures – 1A.1.	Results	Status
1	Maintain Helpdesk SLA of two business day response to enquiries (>99.90%).	100%	🟢
2	Maintain service satisfaction ratings of at least 93% "excellent and above average" feedback.	93%	🟢
3	All "poor and below average" feedback is followed-up and actioned.	100% resolved	🟢
4	Proactive Member service engagement in a minimum of 47 economies.	47 out of 47	🟢

1A.2 Member experience

Feedback

- Members and the community provided 2,125 feedback items, with 473 requiring action (investigating, monitoring, or fixing the issue). All have been resolved.

- Feedback topics included conference and training content, presentations, website improvements, TOTP/2FA, and bug fixes.

Figure 3: Feedback Received/Actionable

User Feedback Group

- Community members are encouraged to join the voluntary User Feedback Group to provide views on product developments. This group grew to 526 people.

- There have been 56 one-on-one feedback interviews with Members.

Figure 4: User Feedback Group Growth

Web accessibility

▪ An independent audit identified 81 critical and high accessibility issues that could impact users with a disability. All have been resolved.

	Success Measures – 1A.2.		Status
1	All improvement suggestions received from all feedback channels are followed up and actioned.	100%	🟢
2	All critical and high accessibility issues are resolved.	81 issues resolved	🟢
3	Grow product and service user feedback group from 300 to 500 members.	526	🟢
4	One-on-one feedback sessions with at least 50 Members.	56	🟢

1A.3 Membership development

▪ New Member outreach was conducted at the PCTA e-Tech Show, PITA Business Forum & Expo 2021, and CommunicAsia 2021.

▪ Two new Services Partners engaged: Lao National Internet Center (LA), which became a Service Partner on 11 June, and Information Beam Company Limited (MM) on 20 October.

▪ A total of 783 new Members joined APNIC, seven from Service Partners and 11 from Member referrals.
Figure 5: Membership transactions

Figure 6: Total membership (APNIC + NIR, by subregion)
Figure 7: Total membership (APNIC + NIR)

Figure 8: APNIC membership by industry type

	Success Measures – 1A.3.	Results	Status
1	At least eight membership development activities, in economies with low membership relative to their Internet growth potential.	7 out of 8	🔴
2	Total number of Members to match or exceed the 2021 budget assumption of 8,940.	8,768	🟠

1B Membership Products

Operations

1B.1 Membership product management

Help Centre

- The Help Centre — containing FAQ articles and 'how to' information to help Members quickly find answers to service queries — was deployed in February.

- Feedback is being gathered to improve usability and update articles.

Figure 9: Help Centre visitors

Figure 10: Help Centre feedback

MyAPNIC

- Improved the EC election dashboard in MyAPNIC, reducing support load for the APNIC 51 elections.

- Completed the MyAPNIC architecture conversion from WordPress to Java.

- Completed improvements to the billing section, including new advance invoice management feature, downloadable receipts, and better billing due date visibility. Billing surcharges were removed for Members paying annual fees by instalment.

- The migration of membership management functions in MyAPNIC from Perl to Java is ongoing. APIs will be adopted to take advantage of improvements in modern testing, deployment, and front-end technologies.

- Chat support via Salesforce is now in production.

- Baseline metrics for common MyAPNIC tasks were developed to understand task completion and reduce error rates.

- Voting system updates to accommodate the addition of SIG and IANA RC elections were concluded for APNIC 52, and voting was successfully completed.

- Web style updates were implemented in the MyAPNIC Resource Manager.

Membership application form

- Implemented Member application referrals in the new application form and deprecated the old form.

- The Non-Member application form is being improved, based on the recently deployed Member application form.

Other process and system improvements

- Migration of APNIC Logins is delayed until the existing SSO system is replaced in March 2022 (5A.6).

- New testing infrastructure was deployed to the membership application form and election system to reduce the time needed for UAT and improve code quality.

- Updated the Member API to retrieve Member accounts associated with a SSO UID, allowing external systems (such as event management) to access data.

- Duplicate user accounts were removed from the SSO.

- The prop-125 IRT validation process feedback has resulted in several improvements to make it easier for Members to validate their IRT information (see 2A.2). Additional user research has resulted in plans to streamline the email update process in 2022.

- Work started to improve and automate manual processes required for historical resource holder fee change implementation in 2022.

	Success Measures – 1B.1.	Results	Status
1	Member Help Centre deployed.	Completed	🟢
2	Migrate 100% of APNIC Logins to a new identity management system.	Deferred to 2022	🔴
3	Establish comprehensive testing infrastructure for membership product applications.	Completed	🟢
4	Deliver problem-free EC, NRO, IANA and SIG Elections via BigPulse.	Completed	🟢

Investments

1B.2   Online community platform

"Validate community requirements and prototype an online platform for community members to share knowledge and experience and participate in discussions online."

Status:

- To validate the potential of a community platform to help community members share knowledge and experience, various platforms were assessed for trial.

- 'Tribe' was selected to pilot as a community discussion platform over five months, with a total of 110 users, and several test groups (SWITCH SEA, APNIC 52 Online Fellows and APNIC Academy).

- The trial findings included the requirement for the integration of mailing lists and a community manager to coordinate to overall operation of the platform. These findings and other lessons of the trial period are being assessed to determine next steps, with deployment of an operational product scheduled in 2022.

1C   Membership Reporting

Operations

1C.1   Planning and reporting

- The 2021 Activity Plan and Budget and the 2020 Annual Report were presented at the APNIC AGM on 4 March.

- All Event Wraps and EC Minutes have been published in line with the KPI.

- A public webpage tracking progress against 2021 activities was published to replace the previous 'Survey Tracker' webpage.

- The 2022 Activity Plan and Budget was approved by the EC in December.

	Success Measures – 1C.1.	Results	Status
1	Publishing of required reports on the day of the APNIC Member Meetings.	Completed	🟢
2	Publishing of EC Minutes within two months of each EC meeting.	100% achieved	🟢
3	Event Wraps published for 100% of reportable events within one month of event.	67 out of 67 achieved	🟢

2   Registry

2A   Registration Services

Operations

2A.1   IPv4, IPv6 and ASN delegation and registration services

Resource pools

- The following table shows the status of all APNIC number resource pools.

	Total at 1 Jan 2021	From IANA	Transfers in	Transfers out	Total at 31 Dec 2021	Total delegated	Total reserved	Total available
IPv4 /24s	3,482,617	0	2,410	1,095	3,483,932	3,463,031	6,986	13,915
IPv6 /32s	1,067,008	0	0	0	1,067,008	98,392	113,746	854,870
ASNs	21,143	8,192	5	4	29,336	26,118	0	3,218

Table 3: Resource pool status

IPv4 pool status

- The following chart shows the amount of reserved and available space in APNIC's IPv4 pool.

Figure 11: IPv4 pool status

IPv4, IPv6 and ASN delegations

- The following graphs show the number of delegations for each resource type by sub-region.

- In Figure 12, the peaks in ASN delegations in April, May and October were due to allocations to large networks in China and India. APNIC received an additional 8,192 ASNs from IANA in 2021 to meet those large requests.

Figure 12: IPv4 delegations by sub-region

Figure 13: IPv6 delegations by sub-region

Figure 14: ASN delegations by sub-region (including NIRs)

Figure 15: Annual IPv4 delegations

Figure 16: Annual IPv6 delegations

Figure 17: Annual ASN delegations

Member resource holdings

- The percentage of Members holding IPv6 reached 68.43% (from 66.32%) on 31 December 2021. The proportion of APNIC Members holding specific resource types is illustrated below.

Figure 18: Member resource type holdings

IPv4 transfers: Mergers/acquisitions and historical

- M&A transfer activity increased in March, mostly due to transfers in NIRs.

- A large transfer occurred within TWNIC in September.

Figure 19: M&A and historical transfers

IPv4 market transfers

- There were several IPv4 transfers by IRINN in January, which drove higher counts in the chart below.

- Large IPv4 transfers from APIDT in June and November, between Triple T (Thailand) accounts in August, and between Tencent accounts in December, drove elevated transfer volumes.

Figure 20: Market transfers within APNIC

Market transfers: Inter-RIR

- No large inter-RIR market transfers occurred in the last 12 months.
- Inter-RIR transfer activity slightly increased in 2021.

Figure 21: Inter-RIR IPv4 transfers

	Success Measures – 2A.1.	Results	Status
1	Maintain Registration Services SLA of two business day response to enquiries (>99.90%).	100%	🟢
2	Increase percentage of Members holding IPv6 address space to 70%.	68.43%	🟠

2A.2   Maintain correct and current registry data

▪ Improvements were made to IRT validation under Prop-125.

  o Email templates used for IRT validation and Member notifications were simplified.

  o IRT management in MyAPNIC was improved to help update IRT details and handle validation emails.

  o 13,826 email validation requests have been issued; 10,277 email validation requests were confirmed. The confirmation rate is 74.3%.

▪ Identifier Technical Health Indicators (ITHI) measurement

  o The NRO has developed a proposal for ITHI risk identification in response to an ICANN initiative. For the purposes of measuring the state of the data, accuracy has been defined as 'Comprehensive, Correct, and Current'. The following are the measurements for Internet number resources (INRs) managed by APNIC. INRs managed by NIRs are not included in this report.

  o Comprehensive:

    1. INRs administered by APNIC are accounted for in the NRO extended delegation statistics: 100%.

    2. INRs administered by APNIC are not duplicated in the NRO extended delegation statistics: 100%.

3. INRs registration/holdership data is available for all INRs accounted for in the NRO extended delegation statistics:

    — Legal name (org object) (weight 25%)

    — Legal address (org object) (weight 25%)

    — Point of contact (IRT) (weight 50%)

Type of Record	Number of Records	Score	% of total records
Have a parent block with org object and IRT	36,912	100	89.5%
Have no org object and no IRT	3,153	0	7.6%
Have IRT but no org object	1,189	50	2.9%
Have org object but no IRT	2	50	.0004%

Table 4: ITHI measurement: 'Comprehensive'

o Correct:

Measurement 1: Member has confirmed their details as correct and created an org object (50%).

Measurement 2: Validated the IRT within the last 12 months (50%).

Type of Record	Number of Records	Score	% of total records
Have a parent block with org object and validated IRT	30,217	100	73%
Have org object but no validated IRT	6,697	50	16%
Have no org object and no validated IRT	3,950	0	10%
Have validated IRT but no org object	392	50	1%

Table 5: ITHI measurement: 'Correct'

o Current (to be implemented in 2022)

	Success Measures – 2A.2.	Results	Status
1	Comply with NRO-defined Identifier Technology Health Indicators (ITHI) reporting.	2 out of 3 measures	🔴
2	Increase rate of validation by Members of registration records.	74.3% validation	🟢

2A.3 Reclaiming unused IPv4 address space

▪ Around 2.3 million unrouted historical IPv4 addresses (more than a /11, over 293 prefixes) were identified under prop-017. Custodians were identified and contacted to encourage them to claim, transfer or return the resources.

- 488,704 addresses were returned to APNIC, equal to nearly one /13, or 1,909 /24s (over 81 prefixes); while holders chose to retain 411,136 addresses (over 50 prefixes).

- All publicly available information including online company registries, company websites and web searches were used to identify custodian contacts. Address space for uncontactable custodians, or custodians that did not respond, will be reclaimed by APNIC.

Status	31 Mar	31 Jul	31 Oct	31 Dec	Percentage	Addresses
Yet to contact	60	32	14	0	0%	0
Not contactable	51	54	61	65	22.18%	669,696
No response	66	55	57	58	19.80%	476,160
Prefixes being claimed by holder	37	31	36	39	13.31%	339,456
Prefixes retained by holder	29	50	48	50	17.06%	411,136
Prefixes returned to APNIC	50	71	77	81	27.65%	488,704
Total number of unrouted prefixes	**293**	**293**	**293**	**293**	**100%**	**2,385,152**

Table 6: Status of reclaimed address space

	Success Measures – 2A.3.	Results	Status
1	All unrouted historical resource prefixes identified under policy prop-017 are claimed, transferred, or returned to APNIC.	Completed	🟢

2B   Registry Products

Operations

2B.1   Internet number registry management

NIR API

- An API to assist NIR resource administration and registry accuracy was developed, with an external test environment established. Deployment is planned for early 2022.

APNIC Registry Management System (ARMS)

- Significant performance improvements were made to the core registry service to make the registry management system more usable (now 5-10 times faster for typical requests).

Registry rearchitecture

- A requirements specification has been completed. This is a multi-year project under APNIC's Next-generation Registry initiative. Reimplementation of the internal registry in Java will commence per the product roadmap with a completion target of 2023.

	Success Measures – 2B.1.	Results	Status
1	Implement the NIR API and operate in conjunction with the NIRs.	Completed for 2022 deployment	🟢
2	Create initial design documentation for the 'Next-generation Registry' by the end of Q4.	Completed	🟢

2B.2 Registry product management

RPKI

- Repository publication was made entirely atomic to avoid repository inconsistency/invalidity problems.
- MyAPNIC updates were made to improve route management.
- The RPKI CPS was updated and republished to remove out-of-date statements/descriptions.

RDAP

- The finalized NRO RDAP profile was published in the IANA RDAP registry.
- APNIC is preparing to achieve full compliance with the profile in Q1 2022.

Whois

- BYOIP attributes can now be managed directly by end users in MyAPNIC.

APIs

- A public specification of a general Member registry API was completed. The aim is to share a prototype at APRICOT 2022.

	Success Measures – 2B.2.	Results	Status
1	Implement a bulk update method to improve usability of the MyAPNIC Routing Management feature.	General Member API implementation in 2022	🔴
2	Improved support for 'BYO IP' services in MyAPNIC.	Completed	🟢
3	Create a public specification of a general Member registry API.	Completed	🟢
4	Implement the NIR KPI monitor for RPKI.	Completed	🟢

2C Policy development

Operations

2C.1 Policy development

APNIC 51

- Two policy proposals were considered at the APNIC 51 Open Policy Meeting (OPM). One proposal reached consensus in the OPM and AGM:

    o prop-133: Clarification on Sub-Assignments

- A second proposal was discussed but did not reach consensus and was abandoned:

    o prop-130: Modification of transfer policies

- Following the meeting, the comment period for prop-133 closed with no objections raised and the policy was endorsed by the APNIC EC for adoption.

APNIC 52

- Seven policy proposals were considered at the APNIC 52 OPM. Four proposals reached consensus at the OPM and AMM:

    o prop-135: Documentation

    o prop-136: Registration Requirements

    o prop-139: SOR not required

    o prop-140: Update End-Site Definition

- The following proposal reached consensus but was returned to the author for clarification:

    o prop-137: IPv6 assignment for associate members

- The following policy proposal did not reach consensus and was returned to the mailing list:

    o prop-141: Change maximum delegation size of IPv4 address from 512 (/23) to 768 (/23+/24) addresses

- The following policy proposal was accepted as a guideline only:

    o prop-138: Restricting AS-ID in ROA

- Following the meeting, the comment period for prop-135, -136, -139 and -140 closed with no objections raised and the policies were endorsed by the APNIC EC for adoption.

	Success Measures – 2C.1.	Results	Status
1	Achieve minimum overall satisfaction rating of 6/7 from Policy Chairs in annual review of SIG Chair support.	6.7/7	🟢

2C.2   Policy implementation

- Policy text changes resulting from prop-133, -135, -136, -139, and-140 were implemented and published.

- Prop-138 was published as a guideline.

	Success Measures – 2C.2.	Results	Status
1	Meet 100% of implementation timelines.	100%	🟢

2C.3   Policy analysis

- Impact assessments of the nine policy proposals discussed at APNIC 51 and 52 were conducted and shared with the Policy SIG. The APNIC 52 policy assessment was not presented due to time constraints.

- An update on the Policy Document Review was presented at APNIC 51. An additional Policy SIG Community Consultation meeting was held online on 19 March, with 40 attendees.

- A community Working Group (WG) was formed to review the Policy Document Review Report and develop proposals for discussion at APNIC 52. The WG submitted nine proposals to the Policy SIG Chairs for APNIC 52; four were accepted for discussion at the OPM and all four reached consensus.

	Success Measures – 2C.3.	Results	Status
1	Deliver two policy analysis presentations at SIG meetings.	1 out of 2	🔴
2	Publish a policy proposals analysis before each Policy SIG meeting.	2 out of 2	🟢

3 Development

Operations

3A APNIC Conferences

3A.1 APNIC conferences

APRICOT 2021 / APNIC 51

- APRICOT 2021 was held online from 22 February to 4 March 2021.

Conference statistics	
Total number of remote participants (Zoom)	852
Economies represented	61
Remote viewers – YouTube	3,855 views; 832.04 hours
#apricot2021 tweets	266 from 116 users

Table 7: APRICOT 2021 statistics

- APRICOT 2021 was the second 100% online conference managed by APNIC due to the COVID pandemic.

- The tutorial week from 22 to 26 February attracted 416 attendees, with 552 attending the conference from 1 to 4 March. The YouTube stream of APNIC 51 sessions attracted an additional 1,861 live views, with total YouTube views for the entire conference reaching 3,855 during the week.

- At the APNIC EC election, Feng Leng (2,612 votes), Yoshinobu Matsuzaki (2,605 votes), and Gaurab Raj Upadhaya (2,567 votes) were elected for two-year terms.

- Other Internet community events held at APRICOT included the DotAsia AGM, APIX meeting, AP* Retreat, and an APNG Seminar.

APNIC 52

- APNIC 52 was held online from 13 to 16 September 2021.

Conference statistics	
Total number of remote participants (Zoom)	706
Economies represented	48
Remote viewers – YouTube	3,438 views; 745.88 hours
#apnic52 tweets	276 from 91 users

Table 8: APNIC 52 statistics

- The tutorials (day one) attracted 374 attendees, with 543 attending the conference from 14 to 16 September.

- Technology additions for APNIC 52 included CometChat for delegate chat and networking, and Otter.ai for automatic transcription. Improvements to the conference login process were also made.

- Other Internet community events held at APNIC 52 included the APIX meeting, AP* Retreat, and an APNG Seminar on e-health.

- The delegate survey gave APNIC 52 a Net Promoter Score (NPS) of 62.

	Success Measures – 3A.1.	Results	Status
1	Achieve total attendance of 1,000 delegates across two conferences.	1,558 attendees	🟢
2	Achieve 6,000 remote conference session views.	8,145 views	🟢
3	Achieve average conference participant satisfaction survey rating of 90%.	93%	🟢
4	Achieve average participant satisfaction of 85% for speakers.	96%	🟢
5	Select and integrate online meeting technologies to provide a seamless online experience for APNIC 51 and 52.	Completed	🟢

Investments

3A.2   Fellowships

"Support participation in APNIC conferences and workshops, including 'returning' and 'youth' fellowships, with a continued focus on diversity".

Status:

- A new online fellowships program was developed, comprising 11 technical, policy and Internet governance presentations over five months; pairing fellows with industry mentors; APNIC Academy training; and guidance during APNIC 52.

- 48 fellows were shortlisted from 293 applicants, with 46 accepting (24 female and 22 male; 34 professionals and 12 youth). South Asia had 25 fellows, Oceania 12, South East Asia 5, and East Asia 4.

- Eleven presentations (780 minutes) were delivered by 14 presenters, with an average overall fellows' attendance of 86%.

- Fellows completed 136 APNIC Academy self-paced courses and attended an additional 26 Academy webinars.

- Twelve mentoring sessions were held in August to September between 27 fellows and 25 volunteer mentors from the APNIC community.

- The program achieved an NPS of 92 from Fellows in the participant survey.

3B   Foundation support

Investments

3B.1   Operational and administrative support

"Operational and Administrative Support for the APNIC Foundation, in accordance with the AoC of 2018".

Status:

- Six positions were seconded from APNIC, and one position (Comms) was transferred from APNIC for three days a week. Ongoing hosting and technical support continues for administrative, project and financial platforms.

- New Affirmation of Commitments developed that cover both APNIC support and Foundation funding for APNIC activities.

3C   Community Engagement

Operations

3C.1   Technical community support

NOGs and other technical community events

- Discussion with the Pakistan community (held during IXP TA and RPKI training events) continued for PKNOG setup.

Table 10: Other sponsorships

* Sponsorship of PeeringDB, IXPDB and IXP Manager is provided by the APNIC Foundation with funding from APIDT.

	Success Measures – 3C.1.	Results	Status
1	Sponsor/participate in 30 technical community events including NOGs, Peering Forums, and Research & Education events.	28 events	🟠
2	Support 20 NOGs to conduct online events if physical events are not possible.	14 NOGs	🔴
3	Facilitate and support two new/revived NOGs in two sub-regions.	One in progress	🔴

3C.2   Security community support

CERT/CSIRT Support

▪   Presentations:

    o   FIRST Regional Lightning Talk session (APNIC Community Honeynet Project), APCERT AGM 2021, 2021 CNCERT International Partnership Conference, Cambodia CERT Seminar, ASEAN-Japan Cyber Security Seminar, Threat Con 2021, FIRST & AfricaCERT Virtual Symposium 2021, Bhutan Cyber Security Week 2021.

▪   Training:

    o   Delivered Linux Forensics for System Administrator training in collaboration with BtCIRT.

- o Conducted a Tabletop Exercise for the FIRST Fellowship teams.

- o Delivered a hands-on tutorial for the PacSON Community.

- o Two workshops for Cyber Safety Pasifika in collaboration with ACSC.

- o Collaborated with Timor-Leste CERT to organize a workshop on incident response, and with CERT Tonga to deliver a honeypot hands-on workshop.

- o KRCERT/CC APISC Training 2021.

- o Provided training content and delivery support for a tutorial on Network Monitoring and Packet Analysis for Sri Lanka CERT.

- ▪ Delivered a Network Security tutorial, Web Application Security workshop and participated at the 'Capture the Flag' webinar at Bhutan Cyber Security Week 2021.

Security Community Support

- ▪ Presentations:

  - o APECTEL 62 Security and Prosperity Working Group meeting, Cybersecurity Asia 2021 Conference, Philippine International Cybersecurity Conference 2021, UMS Cybersecurity Awareness Seminar, Pacific IGF, ITU Global CyberDrill 2021, IGF Preparatory Session on Trust, Security and Stability.

- ▪ Training:

  - o Security sessions at the 2nd ICANN APAC-TWNIC Engagement Forum.

  - o Three workshops for LEAs in Oceania as part of Cyber Safety Pasifika.

  - o Four sessions at the National University of Samoa's Security Workshop.

  - o Six security sessions with the Fiji technical community.

  - o Security tutorial on Practical Intrusion Detection System at IBCAST 2021 in Pakistan.

  - o Security tutorial on Practical Incident Response at the 3rd International Cyber Resilience Conference in Malaysia.

  - o Tutorial on Security Monitoring with Elasticsearch at the Samoa Cyber Week.

  - o Two security tutorials for APT covering Laos, Myanmar, and the Philippines.

- ▪ Participation:

  - o 6th INTERPOL Global Cyber Crime Expert Group meeting and the INTERPOL Forum on Ransomware, FIRST CTI Summit 2021, BrisSEC21, ISCR 2021, Hack In The Box (SIN) 2021, VBLocalhost 2021, SuriCon 2021, OSDFCon, CrikeyCon VII, AusCERT 2021, ASEAN Cyber Security Forum (Cydes 2021) (as a panellist), ID Honeynet Project Webinar.

  - o APNIC staff participated in the program committee for AusCERT 2021 and the FIRST Annual Security Conference 2021.

- ▪ Others:

  - o Provided sponsorship support to CrikeyCon VII, Threat Con 2021.

  - o Supported the FIRST Annual Conference and 2021 as session Chair.

  - o Organized the FIRST-APNIC Security session at the APNIC 52 Conference.

Note that sponsorship of Shadowserver is being moved to the APNIC Foundation with funding from APIDT.

Success Measures – 3C.2.	Results	Status

1	Sponsor or participate in 10 security community events.	43 events	🟢
2	Support targeted development of four new/existing CERTs/CSIRTs.	6 CERTS/CSIRTS	🟢
3	Deliver six presentations/training sessions on the Security Threat Sharing Platform.	10 presentations	🟢

3C.3   Internet organization cooperation

NRO and RIRs

- Partnered with LACNIC to commission a study on the Internet's technical success factors:

    o Developed requirements and selection criteria; published RFP; and selected Analysys Mason (from 13 respondents) to conduct the study.

    o Supported Analysys Mason in conducting 15 community interviews.

    o The final report was published and presented at a townhall session during the 2021 IGF in December.

- Participated in nine NRO EC meetings and 15 NRO coordination group meetings (PACG (5), ECG (2), PSCG (4) and CCG (4)).

- Supported proposed revisions to the NRO MoU and proposed review of the NRO Strategic Plan.

    o The NRO EC entered into an agreement with LeaderShape Consulting to develop an NRO Strategic Plan for 2022.

- Supported LACNIC's recruitment of a new Strategic Engagement Manager.

- Provided advice and support to AFRINIC around ongoing legal proceedings.

- Participated in ARIN 47 and 48, LACNIC 35 and 36, RIPE 82 and AIS'21 (AFRINIC).

I* (ICANN, IETF, ISOC, ITAC)

- Participated in 10 Internet Technical Collaboration Group (ITCG) calls.

- Participated in four OECD-ITAC calls to coordinate work on an OECD draft document on routing and DNS security.

- Participated at ICANN 70, 71 and 72, ICANN DNS Symposium 2021, and IETF 110 and 111.

- Participated in the ICANN Root Service Governance Working Group, the Root Zone Evolution Working Group and the Security and Stability Advisory Committee (SSAC).

NIRs

- Attended meetings with IRINN and the CEO of NIXI, and the KRNIC Policy team.

- Participated in the ICANN-TWNIC Engagement Forum held with the 35th TWNIC OPM, and the 36th TWNIC OPM.

- Provided a training session for IRINN Hostmaster and Helpdesk teams on IRM, IPv6, the PDP and routing.

	Success Measures – 3C.3.	Results	Status
1	Participate in all NRO and 'I*' coordination meetings.	100%	🟢
2	Participate in all NIR and RIR Open Policy Meetings.	100%	🟢

3C.4   Internet governance participation

IGF

▪ Attended 19 IGF Multistakeholder Advisory Group (MAG) meetings; eight MAG Working Group-Strategy meetings; five IGF MAG Issues Teams meetings; and the Road to IGF webinar in Ethics in Technology & Internet.

▪ Participated in nine Policy Network for Environment and Digitalization (PNE) Multistakeholder Working Group (MWG) meetings; coordination and planning of the BP workstream on Environmental Data including seven workstream meetings.

▪ Participated in the Cybersecurity Best Practices Forum coordination and report development.

▪ Participated in IGF 2021 and conducted three sessions: Learning Resiliency, Supply Chain IoT, and a Townhall to present the results of the Internet Study on Technical Success Factors. Also participated in the preparatory and engagement phase of the 2021 IGF and the Townhall.

▪ Provided input to the UN open consultation on the proposed Multistakeholder High Level Body under the IGF+ model.

▪ Participated in 14 IGF Support Association (IGFSA) Executive Committee Meetings and two follow-up meetings with the IGFSA Secretariat. Participated in the IGFSA General Assembly at IGF 2021. Assisted IGFSA with communication improvements.

APrIGF

▪ Participated in 19 APrIGF Multistakeholder Steering Group (MSG) meetings, 23 Program Committee meetings, eight Drafting Committee meetings, six Fellowship Committee meetings, and four Event Committee meetings.

▪ Conducted two sessions at the 2021 APrIGF: Interoperable Internet infrastructure with ISOC; and the Internet study on Technical Success Factors.

Sub-regional and economy-level IGFs

▪ Participated in the SEA-IGF and preparatory meetings, including the Open Consultation and three meetings of the SEA-IGF Steering Committee. One workshop proposal with ISOC on international connectivity was accepted.

▪ Participated in the Pacific IGF and seven planning meetings before the event.

▪ Participated in eight Steering Committee meetings for NetThing (AU). Participated in NetThing 2021 and provided Zoom meeting support.

▪ Participated in the HKIGF webinar on Internet censorship, India IGF pre-event webinar, India IGF 2021, and sponsored and participated in Youth IGF Bangladesh.

Other Internet Governance events and communities

▪ Participated, sponsored, and presented at bdSIG, Youth IGF Vietnam, Youth IGF India, inSIG, Youth IGF Bangladesh and provided content to APSIG.

▪ Participated in five meetings of the Program and Organizational Committees of the Asia Pacific School of Internet Governance (APSIG), Youth IGF India Advisory Committee meetings, inSIG planning meetings and Youth IGF Bangladesh Advisory Committee meeting.

▪ Participated in three Paris Call Working Group 4 (Advancing International Norms) meetings, one Working Group 3 (Promoting a multistakeholder approach in UN cyber negotiations) meeting, and the UN Digital Cooperation High-Level Thematic Debate on Digital Cooperation and Connectivity and the WSIS Forum 2021.

▪ Published a blog post to promote the Internet Jurisdiction and Policy Network Toolkit.

- Participated in RightsCon 2021, YouthxPolicyMakers Internet Governance Workshop and the Asia Pacific Youth IGF 2021.

- Participated in eight program planning meetings and two session coordination meetings for the Asia Pacific Internet Governance Academy (APIGA). Contributed to three APIGA sessions and two open consultation meetings.

	Success Measures – 3C.4.	Results	Status
1	Sponsor and participate in APrIGF and IGF with workshop proposals, MSG/MAG participation, and speaking roles.	3 proposals to IGF 2 proposals to APrIGF Sponsoring APrIGF	🟢
2	Participate in at least three national Internet governance initiatives.	3 out of 3	🟢
3	Sponsor and participate in at least two schools of Internet governance.	2 out of 2	🟢

3C.5   Government engagement

Intergovernmental forums

- ITU

  - Participated in, or monitored, 19 ITU meetings including IEG-WTPF-21, Global Cybersecurity Agenda open consultation, CWG-Internet open consultations, Regional Preparatory Meeting for Asia Pacific to WTDC-21, Interregional meetings, ITU-T/ITU-D meetings, the 21st Global Symposium for Regulators (GSR-21), ITU Telecom World, ITU Telecommunication Development Advisory Group (TDAG) and ITU Telecommunication Standardization Advisory Group (TSAG), ITU WTPF-21.

  - Training and technical assistance support to the Mongolian government's Digital Nation (e-Mongolia) initiative.

  - Held four coordination meetings with the ITU Regional Office in Asia and the Pacific.

  - Presented at the ITU Regional Preparatory Meeting for Asia Pacific and ITU Emerging Technology Week.

- APT

  - Met with APT Secretary General and APT Secretariat to coordinate on regional initiatives (four meetings).

  - Delivered six online tutorials to Myanmar, Laos, Philippines, Tuvalu, and China.

  - Monitored discussions at the APT preparatory meetings for WTDC-21 and WTSA-20.

  - Participated in the 1st Preparatory Meeting for PP-22 (APT PP22-1).

- OECD

  - Contributed to an OECD paper on routing security and monitored discussions at five OECD meetings.

- APEC TEL

  - Participated and presented in APEC TEL 62 and 63.

- Other

  - Monitored discussions at the UN GGE and the OEWG informal consultation meeting.

o Participated in the hybrid track of the GSMA Mobile World Congress Ministerial Summit, a consultation about GFCE presence in the Pacific region, the GFCE's first South East Asian Regional Meeting, and the World Internet Conference 2021 (Wuzhen).

Bilateral government engagement

▪ Provided advice to the Australian government ahead of ITU and APT meetings (four meetings).

▪ Presented at the Executive Cybersecurity Workshop organized by the Daniel K. Inouye Asia Pacific Center for Security Studies.

▪ Presented at the Marshall Center's International Program on Cyber Security Studies (iPCSS) 2021 on Internet governance.

Law Enforcement and Public Safety

▪ Met with AFP representatives from Cyber Safety Pasifika to organize LEA training for 2021-2022.

▪ Delivered three workshops for LEAs in Oceania as part of Cyber Safety Pasifika.

▪ Participated at the 6th INTERPOL Global Cyber Crime Expert Group meeting and the INTERPOL Forum on Ransomware.

▪ Presented a summary of APNIC's involvement with Cyber Safety Pasifika to the Pacific Islands Chiefs of Police (PICP) Pacific Police Training Advisory Group (PPTAG).

▪ Delivered a hands-on workshop for five Law Enforcement and related organizations in Taiwan.

	Success Measures – 3C.5.	Results	Status
1	Participate in at least 12 engagements with governments/intergovernmental organizations.	25	🟢
2	Participate in at least three capacity building partnerships with governments/intergovernmental organizations.	Completed	🟢
3	Participate in six engagements with the Public Safety community.	6 out of 6	🟢

3C.6   External relations coordination

Figure 22: Engagements summary by type

Global collaboration

*Global collaboration is for events dedicated and engaged outside the Asia Pacific region. Asia Pacific refers to events delivered for the AP region or regional events that are not economy specific.

*South East Asia, South Asia, East Asia and Oceania now each have an 'Open Economy (OP1, OP2, OP3, OP4'" to capture delivery of events targeted to a specific subregion and not others, to avoid diluting the stats for Asia Pacific.

Figure 25: Engagement detail by economy

Touchpoints by month

Touchpoints by engagement types

Unique contacts in touchpoints by subregion

Figure 26: Touchpoints summary

Note: Touchpoints are records of interactions by APNIC staff with a contact (APNIC Member or Non-Member), usually during an event.

▪ An External Relations (ER) coordination retreat was held in February to evaluate 2020 engagement activities and lessons learned, and to plan for 2021.

▪ Ten ER team coordination meetings have been held in 2021.

	Success Measures – 3C.6.	Results	Status
1	Facilitate one External Relations coordination retreat.	Completed	🟢
2	Facilitate 10 External Relations team coordination meetings.	10 out of 10	🟢

3D   Community Participation

Operations

3D.1   Community-led processes

▪ A joint SIGs meeting was held at APNIC 51 to discuss proposed changes to SIG elections. A call for comment on documented changes concluded on 21 April and the updated SIG Guidelines became active on 22 April.

▪ Four 'intersessional' online SIG meetings were held outside of APNIC conferences, attracting 183 participants, including:

 o 40 people joining the Policy SIG Chairs' online community consultation for the Policy Document Review in March, leading to the creation of the Policy Document Review WG.

  o The Routing Security SIG held an online community forum in June for 47 participants and a second discussion in October for 67 participants.

  o A policy readout webinar in October attracted 29 participants.

▪ Elections for several community positions were completed at APNIC 52:

  o Joy Chan was re-elected Chair of the Cooperation SIG for a two-year term.

  o Oanh Nguyen was elected Chair of the NIR SIG for a two-year term.

  o Bertrand Cherrier was elected Chair of the Policy SIG and Shaila Sharmin was elected Co-Chair, both for two-year terms.

  o Afifa Abbas was elected Co-Chair of the Routing Security SIG for a two-year term.

  o Ching-Heng Ku was elected to the IANA RC for a two-year term.

  o Di Ma was elected unopposed to the NRO NC for a two-year term starting 1 January 2022. Nicole Chen was reappointed by the EC to the second NRO NC seat for a one-year term beginning 1 January 2022.

Community Elected Leaders discussions

▪ Online discussions between the APNIC EC, elected representatives of the SIGs, IANA RC, NRO NC, members of APIX and APNOG, and Secretariat staff were held on 22 April, 5 July, 1 October, and 22 November. The discussions covered community feedback on APNIC conferences, the online conference format, election procedures and information, the use of Confer at OPMs, and the Online Community Platform trial.

	Success Measures – 3D.1.	Results	Status
1	Achieve 800 online SIG participants across two conferences.	950 participants	🟢
2	Grow SIG mailing lists subscribers from 1,268 to 1,325.	1,333 subscribers	🟢
3	Achieve 6,000 remote conference session views.	8,145 views	🟢
4	Achieve attendance of 1,000 conference delegates across two conferences.	1,558 attendees	🟢

3D.2   Online participation

apnic.net

- Visitor numbers to apnic.net peaked in September, with time on site at its highest point in July and August. The top five visitor economies were the United States, Hong Kong, India, China, and Australia.

Figure 27: apnic.net website visits

Economy	Total Sessions	Unique Users
United States	453,815	438,181
Hong Kong	127,627	17,669
India	114,857	70,030
China	99,882	66,382
Australia	99,375	65,578
Japan	62,151	41,111
Bangladesh	58,403	27,931
Philippines	38,250	15,898
New Zealand	33,129	27,467
Indonesia	33,078	18,832

Table 12: Social Media reach

	Success Measures – 3D.2.	Results	Status
1	Grow all-time Blog views from 2.6 million to 3.4 million.	3.46 million	🟢
2	Increase 12-month tweet engagements from 60,000 to 62,000.	234,929	🟢
3	Increase annual Facebook posts reach from 3 million to 3.2 million.	3.4 million	🟢

3D.3   Encouraging newcomers and diversity

- APNIC presented and participated in the Diversity in Tech Panel session at APRICOT 2021/APNIC 51 and the Women in ICT session at APNIC 52. A NextGen Careers BoF was also held at APNIC 52.

- Following the elections at APNIC 52, two of the four SIG Chair positions are occupied by females and two of the six Co-Chair positions are held by females (at the start of 2021, only one SIG leadership role was held by a female).

- 37% of APNIC conference attendees (578) were newcomers.

- Achieved 235 new blog subscribers, 1,548 new Twitter followers, and 1,414 new LinkedIn followers.

- A community survey on language understanding and translation was commissioned with Survey Matters and launched in August. The survey was provided in 11 languages and received 489 completed responses (357 from APNIC Members). Services identified by respondents as having the highest value if available in local language were training, conferences, and policy information. The full report was presented to the Secretariat leadership team for consideration in future planning.

	Success Measures – 3D.3.	Results	Status
1	Attract 400 newcomers to APNIC conferences.	578 newcomers	🟢
2	Attract 125 new Blog email subscribers to reach 1,125 total.	235 new subscribers (total 1,235)	🟢
3	Grow Twitter followers from 12,100 to 13,250.	13,763	🟢

3E   APNIC Academy

Operations

3E.1   Product management

- A new self-paced Routing Fundamentals course was published to replace the existing Routing Basics course. The course includes 39 new topics and five hours of new learning material.

- New virtual labs were added including Hashing (File Integrity), SSH (Secure Shell), DHCPv6-PD, Linux Basics, PGP (File and Email Security) and Use Suricata to Analyse Packet Captures. The RPKI Lab was updated.

- Added mobile support and functionality to the APNIC Academy course catalogue.

- Launched the remote Technical Assistance (TA) platform on the APNIC Academy as a pilot.

- Merged the legacy training site information to the APNIC Academy.

	Success Measures – 3E.1.	Results	Status
1	Migrate legacy training site information to APNIC Academy and decommission previous site.	Completed	🟢
2	Develop a comprehensive curriculum of blended learning for future certification.	Commencing in 2022	🔴

3E.2   Instructor-led Training

- APNIC remained unable to deliver face-to-face training due to COVID-19 restrictions (all but one instructor-led trainings were remote). The remote instructor-led trainings were delivered as a mix of hybrid, online, open tutorials, and targeted events.

- Completed development of the Network Management and Monitoring (NMM) course. The configuration management module is in progress.

- Completed development of the Network Automation course.

- Completed updating content for the following existing courses:

  o   Internet routing: BGP-TE/multihoming lab module; BGP OpSec (Operations & Security) BCP lab.

  o   IPv6 deployment: New DHCPv6-PD lab (both for instructor-led and virtual labs for the Academy); new IPv6 transition techniques slides — 6rd and NAT64/DNS64/464XLAT.

  o   Network security: New SSL/TLS slides and lab module; Intrusion Detection with Suricata module with labs.

  o   Updated the RPKI/ROV lab guides with two new validators (rpki-prover & rpki-client), following the deprecation of the RIPE validator and maintenance ceasing on OctoRPKI.

January to December 2021	APNIC Instructor-led training
Courses (by topic)	96 courses delivered/2,382 attendees
Webinars	20 webinars (9 external/guest speakers)/1,202 attendees

Table 13: Instructor-led training

	Success Measures – 3E.2.	Results	Status
1	Develop two new/updated courses for instructor-led tutorials/workshops.	2 new courses completed 3 courses updated with 7 new modules	🟢
2	Conduct 70 instructor-led tutorials/workshops across four sub-regions.	96 tutorials/workshops delivered	🟢
3	Conduct 18 live webinars.	20 webinars delivered	🟢

3E.3   Self-paced training

January to December 2021	APNIC Academy
Courses (by topic)	1,735 completions; 3,340 hours contact
Virtual Labs	6,070 labs launched; 6,902 hours completed
Students	5,428 new accounts (17,018 in total)
Locations	48 economies

Table 14: APNIC Academy training

	Success Measures – 3E.3.	Results	Status
1	Publish four new/revised self-paced online courses.	2 new courses completed 2 courses revised	🟢
2	Publish five new self-paced Virtual Labs (associated with multiple courses).	6 new labs delivered	🟢

3E.4   Technical Assistance

DNS/DNSSEC

- Helped CSL (Samoa) identify an issue with its DNSSEC deployment that was causing email delivery issues for their customers.

- Helped Education Services Australia with its DNS resolution issues with certain TLDs, for example, .dev.

RPKI

- Proactive outreach and support to 18 network operators in 7 economies (PH, PK, AU, BT, IN, FJ and NP), to reduce invalid routes.

- In August helped analyse and identify RPKI RTR causing BGP route refresh (on Cisco IOS/IOS-XE) for USP-FJ to its eBGP peers, resulting in high CPU on peer routers (in collaboration with AARNET and Telstra).

IPv6

- Ongoing discussion with NKN (IN) on its IPv6 deployment in 1,633 campuses, and E-bone (PK).

- Helped review SLT (LK)'s IPv6 roadmap and hosted a training session on IPv6 address planning.

- Helped RACQ (AU) with its IPv6 address plan.

Network Design

- Developed new address plan and a high-level network design with Tonga's Ministry of MEIDECC.

- Ongoing network (re)design discussion with Ncell (NP).

- Ongoing network redesign and renumbering work for Tenicom WiFi/Moel (Kiribati).

- Network consolidation discussions with UNN Brunei to migrate from three active ASNs to two ASN networks (transit and access ASN concept).

- Helped Vodafone Fiji and Vanuatu with as-set for the IRR filtering issue with GGC.

- Helped two Australian ISPs on multihoming and network redesign.

IXPs

- PKIX (Lahore): Training and IX setup and configuration completed in September.

- Fiji IX: Passive network rework is ongoing.

- MV IX: Initial discussion on the operating principles and high-level design (with three local operators) completed. Legal entity and IX location have now been confirmed. Waiting for IX equipment to be purchased.

	Success Measures – 3E.4.	Results	Status
1	Begin conducting technical assistance via the APNIC Academy online platform.	Completed	🟢

3E.5   RPKI awareness and deployment support

- In addition to direct RPKI support provided to 18 Members (3E.4), APNIC delivered 18 RPKI training events.

- Five RPKI deployment case studies covering Mongolia and Pakistan's nationwide efforts; Australian ISP, Vocus; transit service provider, Hurricane Electric; and the RIPE NCC's ROV deployment were published. Thirty-six RPKI-tagged posts have been published on the APNIC Blog, including six in support of the Internet Society's 'RPKI Week' promotion.

- The proportion of IPv4 address holders with ROAs grew from 24.4% to 36.1%; IPv6 address holders with ROAs increased from 17.3% to 22.3%.

- The amount of IPv4 addresses covered by ROAs grew from 21.4% to 28.8%, with IPv6 address space covered by ROAs increasing from 24.0% to 31.7%.

- 11 economies achieved 90%+ IPv4 ROA coverage — VU (92%), TO (96%), LK (94%), MN (99%), BT (96%), MV (99%), TO (95%), NP (94%), NU (100%), NR (92%), MH (90%).

- APNIC Labs released an ROA measurement tool (alongside the existing ROV measurement tool) to help monitor the progressive deployment of RPKI across the Internet (see 4B.1). The two measurement tools are available at:
  o ROA: https://stats.labs.apnic.net/roa

  o ROV: https://stats.labs.apnic.net/rpki

Figure 28: Address holders with ROAs

Figure 29: Addresses and routes covered by ROAs

	Success Measures – 3E.5.	Results	Status
1	Conduct eight RPKI/ROV focused instructor-led tutorials/workshops spread equally across sub-regions.	18 completed	🟢
2	Achieve 90% ROA coverage for four additional economies.	Completed	🟢
3	Publish four RPKI/ROA/ROV deployment case studies.	5 published	🟢

3E.6   IPv6 awareness and deployment support

- APNIC delivered 17 IPv6 deployment focused training events.

- Published 23 IPv6-tagged posts on the APNIC Blog.

- Published three IPv6 deployment success stories on China Telecom, Akamai and Sprint, bringing the total number of IPv6 deployment stories on the APNIC website to 42.

- IPv6 capability for the Asia Pacific region was 37.65% as measured by APNIC Labs.

	Success Measures – 3E.5.	Results	Status
1	Conduct eight IPv6 deployment focused instructor-led tutorials/workshops spread equally across sub-regions.	17 done	🟢
2	Publish three IPv6 deployment case studies.	3 published	🟢

Investments

3E.7   Platform and curriculum development

"Development of APNIC Academy to support training and technical assistance, and a comprehensive curriculum for self-paced and instructor-led training to help meet community demand for technical skills development".

Status:

- Extended translation support to APNIC Academy online video-based courses.

- Commenced integration of Salesforce's event management and training event registration systems.

- Launched the Technical Assistance (TA) platform.

- Migrated training content on apnic.net to the APNIC Academy website.

3E.8   Community Trainers network

"Recruit, retain and develop more Community Trainers to expand the scope and effectiveness of APNIC training to help meet increasing community demand for technical skills development".

Status:

- There are 30 active Community Trainers.

- Twenty-eight Community Trainers from 14 economies were engaged for 68 instructor-led online training events.

- Recruitment for the new Retained Community Trainers model (CT retainer program) commenced.

3E.9   Curriculum for non-technical audiences

"Build introductory Internet courseware about fundamental Internet concepts, IP address management, and Internet governance to help non-technical audiences better understand Internet operations and improve interactions with the technical community".

Status:

- A team of instructional designers was appointed in May.

- The 'Analysis' phase of product development concluded with agreed project goals, learning objectives, target audience and high-level design.

- A procurement process was established to select a Game Designer. A tender process was launched. The deadline to receive vendor proposals closed in November.

- Conducted three workshops and four consultations with target audience groups.

- An MVP is scheduled to be delivered mid-2022.

3F   Internet Infrastructure Support

Operations

3F.1   Internet infrastructure deployment

IXPs

- Fiji IX upgrade: Passive network work ongoing. Active network configuration will follow once the passive work is completed.

- Pakistan IX (Lahore): Training and IX setup and configuration completed in September.

- MV IX: Operating principles and high-level design (with three local operators) completed. Legal entity and IX location have now been confirmed. Waiting for IX equipment to be purchased to start the build.

- Bhutan IX: Implemented ROV on their route server.

- Discussions with MISPA IX to implement ROV are ongoing.

RIPE Atlas anchors

- Seven disconnected anchor hosts were contacted, and they all preferred hardware replacements. RIPE NCC indicated hardware replacements could be an issue. APNIC will test software anchors on mini servers as an alternative.

Root Servers

- Root server deployment is focused on the M-root project (see 3F.3).

- Equipment delivery delays have impacted deployment.

	Success Measures – 3F.1.	Results	Status
1	Support deployment of two new or upgraded IXPs.	1 deployed 1 in progress	🟠
2	Support four additional IXPs to deploy RPKI/ROV on their route servers.	1 deployed 1 in progress	🔴
3	Deploy or upgrade four RIPE Atlas anchors at various networks.	0 deployed 7 in progress	🔴
4	Deploy 12 new root server instances.	1 deployed 11 in progress	🔴

3F.2   Community Honeynet and Security Threat Sharing Platform

- Delivered two webinars on Practical Threat Hunting for the APNIC Academy.

- Feeds from the honeynet datasets were created for consumption by instances of the MISP threat sharing platform. The relevant feeds are shared with various National CERTs, the ShadowServer Foundation and APNIC's DASH.

- Eight security engagements were held with communities in Bhutan, Mongolia, Taiwan, Nepal, Timor Leste, Tonga, and Fiji on honeynet and threat sharing.

- Content for the Introduction to Suricata Intrusion Detection System course was developed based on the honeynet datasets.

- Enhanced the system backend to include a sandbox for processing Linux/Unix malware.

- Supported 13 requests for additional insights on potentially malicious traffic from DASH users.

- Hosted an intern from Griffith University (Masters in Cybersecurity program) to assist in honeynet data analysis.

- Recruited five new partners including three from the APNIC region (Tonga, Bangladesh, and the Philippines).

	Success Measures – 3F.2.	Results	Status
1	Increase Community Honeynet partners from 10 to 15.	15 partners	🟢

Investments

3F.3   M-root anycast instance deployment support

"Establishing a new partnership with the WIDE Project and JPRS to support anycast deployment of M-root".

Status:

- Completed deployment of M-root in Hanoi.

- Deployment of M-root servers in 11 locations (Guam, Kaohsiung, Manila, Dhaka, Kuala Lumpur, Bangkok, Jakarta, Ulaanbaatar, Kathmandu, Mumbai, and Singapore) progressed but equipment delivery delays prevented progress. Deployment in these locations will be completed in 2022 upon equipment delivery.

4   Information

Operations

Posts	28	39	35	38	38	386	2,786

**Table 15: APNIC Blog activity**

Figure 30: APNIC Blog views

Figure 31: APNIC Blog posts

- The Blog averaged 68,721 views per month, an 6.1% increase on 2020's monthly average of 64,778. The Blog passed the milestone of 3 million views (all-time) in June.

- There have been 179 Guest Posts in 2021, representing 56% of total opinion posts (in line with 2020).

- Popular new posts included:

    o A Brief History of Router Architecture, a Guest Post by Tony Li.

    o BGP in 2020 – The BGP Table by Geoff Huston.

    o How Chromium Reduced Root DNS Traffic, a Guest Post by Duane Wessels.

    o TCP Fast Open? Not so fast!, a Guest Post by Otto Moerbeek.

    o What every IT person needs to know about OpenBSD, Part 1, a Guest Post by Peter Hansteen.

- 'Related articles' functionality was added to the Blog in June.

- A new APNIC podcast, 'PING', was launched in October, with five episodes published, attracting 648 downloads. PING will focus on Internet research and interview researchers and experts from around the world, with episodes to be published fortnightly.

	Success Measures – 4A.1.	Results	Status
1	Grow all-time Blog views from 2.6 million to 3.4 million.	3.46 million	🟢
2	Average 64,000 Blog views per month.	68,721 views/month	🟢
3	Maintain Blog Guest Post ratio between 45-65%.	56%	🟢

4A.2   Information product management

REx

- The Internet Directory was converted to Resource Explorer (REx). It includes better support for new users, new information architecture, and other UX improvements. The old interface, available on-demand, will be withdrawn in 2022 subject to any visible user dependency.

- Work was completed to improve tablet and mobile device user experience.

- An awareness campaign in October generated a significant increase in traffic. Further experiments in product promotion using paid search will continue in 2021 and 2022.

DASH

- A recurring reports feature was released, allowing users to receive PDF reports by email at their chosen frequency.

- New empty states were designed and implemented to improve usability.

- The 'Identifying suspicious traffic with DASH' webinar was delivered to 45 attendees from 20 economies to increase community awareness of the product.

- Alert functionality for bad traffic is in development and scheduled for deployment in Q1 2022.

- Improvements to the backend architecture have been deployed to improve performance and reliability.

NetOX

- A new 'Experimental' tab was created for widgets to improve usability. The IRR Explorer widget was moved to this new section and data about the value of the widget is being assessed.

- A 'comparison' feature has also been designed for deployment in Q1 2022.

- Stability and performance improvements have been deployed in the backend.

Figure 32: Monthly number of users

	Success Measures – 4A.2.	Results	Status
1	Reach an average of 400 users per month to NetOX and DASH, and of 700 users per month to REx.	980 NetOX 365 DASH 826 REx	🟠
2	Achieve a net promoter score (NPS) of 80%+ for all products. *(80% is above industry norms, which consider 60% + as a good outcome.)*	68 NetOX 68 DASH 59 REx	🔴
3	Achieve a usability score of at least 4.5/5 for all products.	4.4 NetOX 4.5 DASH 4.4 REx	🟠

4B   Research and Analysis

Operations

4B.1   Conducting research and measurements

- New measurements on the use of IPv6 as a transport protocol for the DNS and IPv6 Extension Header handling, including fragmentation, were completed.

- Analysis of IPv4 and IPv6 advertised, unadvertised and reserved address pools over time continues.

- Completed reporting on the annual state of BGP, and further development of routing bogon and CIDR reports, as input to the ISOC MANRS activity. Work continues on automated BGP anomaly detection.

- An RPKI ROA monitor was developed, in addition to the existing ROV monitor, to help measure progressive deployment of RPKI.

- DNS research included analysis of the handling of large DNS responses, adoption of DOH, and DNS query patterns.

- Measurement of QUIC use continues, following the release of beta software that adds QUIC support to NGINX servers.

- Research is also in progress on ECN measurement and RSA 2048-bit keys in DNSSEC.

- Published 43 blog articles, including research findings, analysis of trust infrastructure, a commentary on new Internet technologies, and three podcasts recorded.

	Success Measures – 4B.1.	Results	Status
1	Twelve research articles and reports published.	43 articles	🟢

4B.2   Cooperative research opportunities

- Entered a cooperative research program with ISOC in support of MANRS, providing a feed of routing data.

- Worked on a measurement framework for the Identifier Health Indicators (ITHI) program, as well as collaborative measurements on aspects of the DNS and DNSSEC, as part of a cooperative research agreement with ICANN.

▪ Research collaboration continues with Cloudflare.

	Success Measures – 4B.2.	Results	Status
1	Conduct cooperative research with organizations such as CloudFlare, ICANN, RIPE NCC and others.	3 collaborative research projects	🟢

4B.3   Sharing research outcomes

▪ Delivered 41 presentations at community and industry events.

	Success Measures – 4B.3.	Results	Status
1	Ten research presentations delivered.	41 presentations	🟢
2	At least two research presentations at APNIC conferences.	6 presentations	🟢

5   Capability

Operations

5A   Internal Technical Infrastructure

5A.1   Architecture and technical coordination

- The workflow for documenting and implementing APIs was reviewed and improved. The use of OpenAPI to describe internal APIs is now standard practice.

- Dependencies between products and components is now managed using APIs and architectural documentation.

- The Information Product team has experimentally used Rust to achieve lower memory footprint deployments than Java or Python, with strong static safety checks. Rust is now a supported language for APNIC product development.

- Dependency management tooling (Dependabot) has been deployed across several products to ensure systems are kept current. It will be applied to more products as part of the regular maintenance cycle.

- End-to-end testing practices are in place for the Membership and Academy product teams to automate full lifecycle testing of their products.

- Product teams have agreed on a draft development process document, covering design, testing, development, and deployment practices.

	Success Measures – 5A.1.	Results	Status
1	Complete review of testing environment and practices.	Done	🟢

5A.2   Network and infrastructure operations

- A shared POP deployment in Singapore SG1 for both APNIC critical services and M-root global anycast node is in progress.

- Signed up to the NextDC carbon offset program to offset 100% of the carbon emissions generated by the power consumed in APNIC's NextDC data centre service.

- Brisbane to HKIX connectivity via PCCW has been completed.

- The emergency number is now available on the Contact APNIC webpage for emergency incidents related to APNIC's critical services.

- A new APNIC service status webpage, using the Site24x7 service, was launched to display the real-time operational status of APNIC's services.

	Success Measures – 5A.2.	Results	Status
1	Complete quarterly data centre failover tests.	4 out of 4 completed	●
2	Upgrade internal infrastructure NOC from overnight 'on-call' to full 24x7 operation.	Completed	●
3	Maintain availability of 99.99% for critical APNIC services and 99.95% for less-critical services.	99.99% and 99.98%	●

5A.3   System and platform operations

- Two new high performance storage arrays have been deployed to two separate data centres, replacing existing network storage.

- The new Hardware Security Module (HSM) has been reconfigured to provide High Availability (HA) service to RPKI allowing data centre failover.

- Completed the upgrade of the on-premises Kubernetes test cluster, virtual machine environment hosts, and management server.

- Work is in progress to consolidate and return IPv4 addresses to the free pool.

- Completed migration of the DNSSEC signer from Secure64 to Knot.

- Completed migration of APNIC Academy to use Cloudflare.

- Deployed RDNS anycast nodes in Hong Kong, Mexico, Toronto, and London.

- Deployed a whois node in the KDDI data centre in Tokyo.

- Completed an upgrade of the secured centralized logging system to an open-source log collector for each host to send logs via secure TLS channels.

- RRPD service throughput has been upgraded, and deployment in the Google Cloud in Virginia and Singapore is progressing.

- Upgraded the community mailing list interface to Mailman 3 to support all external mailing list services.

- A draft strategy for cloud and interconnection has been developed and internal consultation is in progress.

	Success Measures – 5A.3.	Results	Status
1	Develop strategy for cloud and interconnection.	Draft completed	●
2	Complete service migration to cloud for six services/websites.	Completed	●

5A.4   Internal security operations

- Rapid7 has been selected and deployed on workstations, servers and network equipment for vulnerability scanning and Security Information and Event Management (SIEM).

- The Vulnerability Reporting Program generated 52 unique and verified vulnerability reports from external security researchers in 2021. Forty vulnerabilities were resolved, with seven still in progress within the 90-day period.

- Unresolved vulnerability reports outside of 90 days include:
  - Low-medium vulnerabilities related to login.apnic.net are on hold, pending the new SSO replacement.
  - Medium severity vulnerabilities in stats.labs.apnic.net and cgi.apnic.net are being addressed as part of a server-wide remediation of the root cause.

- HackerOne has been selected to perform triage of newly reported vulnerabilities under APNIC's public Vulnerability Reporting Program. HackerOne will also provide continuous penetration testing to replace the single annual tests commissioned in previous years.

- Completed cyber fraud awareness training for finance and services staff, with regular security awareness updates to all staff.

- The Acceptable Use and Bring Your Own Device policies were reviewed and updated in consultation with staff.

- Policies and procedures that align with ISO 27001 were updated. A gap analysis conducted in November indicated APNIC is ready to seek certification in 2022.

	Success Measures – 5A.4.	Results	Status
1	Achieve readiness for ISO27001 certification.	Gap analysis completed	🟢
2	Track and resolve all vulnerability reports within 90 days.	40 out of 52 reports resolved (7 in progress, 5 missed target)	🟠

5A.5   Enterprise application management

- All EC members have now migrated to Okta SSO for authentication to APNIC systems.

- The migration of JIRA to Atlassian Cloud was completed.

- The Legacy Application roadmap to migrate from certificate-based auth to Okta is still in progress. This will be completed in 2022.

- Implemented next generation backup solution for the CRM.

- The initial implementation of DocuSign for contract management was completed.

- Successfully rolled out Zoom Room technology to office meeting rooms and completed migration of telephone system to Zoom Phone.

- Completed enrolment of workstations to device management.

	Success Measures – 5A.5.	Results	Status
1	CRM roadmap established.	Completed	🟢

Investments

5A.6　　Product platform development

"Further development of infrastructure and services platforms common to APNIC products, to streamline product development, integration, and consistency".

Status:

- A new Single Sign-On (SSO) architecture was developed and the existing SSO service is expected to be replaced in March 2022.

- An instance of the replacement SSO system was created in the product testing environment and replicated to production.

- All products have been tested successfully with the replacement SSO system.

- The Membership team is migrating user self-management applications to the replacement SSO system.

- Centralized product build tooling has been deployed to select products.

5B　　Finance and Business Services

Operations

5B.1　　Internal knowledge management

- The staff intranet main page (APNIC Concierge page) was launched on SharePoint in December, with hub sites for all departments migrated to Confluence and/or SharePoint.

	Success Measures – 5B.1.	Results	Status
1	Successful implementation of internal knowledge management tools with increased user satisfaction and experience.	Completed	🟢

5B.2　　Financial services

- The 2021 Activity Plan and Budget was implemented into the APNIC accounts in January. A monthly forecast process has tracked income and expenses, and monitored expense variations to budget caused by COVID-19 restrictions.

- Implementation support for the new ERP solution for the APNIC Foundation was provided, as well as development of accounting procedures to manage Foundation-funded projects in 2021.

- The annual audit of APNIC's 2020 financial accounts was completed by Deloitte and presented to the EC at APNIC 51.

	Success Measures – 5B.2.	Results	Status
1	Achieve a successful audit of APNIC's annual financial accounts.	Completed	🟢

5B.3   Business services

- An external surveillance audit of APNIC's ISO9001:2016 quality management system was completed in August.

- A project to digitize legacy paper membership forms was completed at the end of March to improve access for services and finance teams.

- The final BCP scenario testing for 2021 was held December.

	Success Measures – 5B.3.	Results	Status
1	Complete annual ISO Quality management compliance audit successfully.	Completed	🟢
2	Undertake quarterly BCP scenario testing.	Completed	🟢

5B.4   Data governance and business intelligence

- Reporting functions in APNIC's legacy business intelligence system (O3) have been replicated into a new system based on Tableau.

- A team focused on information management and analytics was established in July to increase the outcomes of this activity.

- Implementation of additional software platforms to improve production of reports/charts began.

- The APNIC-wide data model and data dictionary is being built but was not completed as planned in 2021 due to resourcing constraints and complexity of the work.

	Success Measures – 5B.4.	Results	Status
1	Complete APNIC-wide data model and data dictionary.	70% complete	🔴
2	Generate all Secretariat report data/charts from BI system.	20% complete	🔴

5C   Employee Experience

Operations

5C.1   Organizational development

- The Aspire Leadership program continued for APNIC's executive and wider leadership teams, with regular webinars on leadership topics including strength-based leadership and feedback.

- A new goal setting process was launched to clearly link all individual goals to an organizational goal and improve goal progress monitoring.

- A monthly agile leaders forum was established for continuous learning and development.

	Success Measures – 5C.1.	Results	Status
1	Strategic goals clearly cascade to individual performance measures in performance management system in 2021.	Complete	🟢
2	Deploy agile work practices across the organization.	76% complete	🔴

5C.2   Work environment management

- With COVID-19 restrictions changing regularly, a hybrid environment of office access and work from home arrangements was established with the APNIC office open for staff when allowed.

- The impact of COVID restrictions on staff and operations continues to be monitored; to date there has been no negative impact on productivity.

- A Travel Health policy was developed to prepare for future staff travel, considering COVID health risks and insurance implications.

	Success Measures – 5C.2.	Results	Status
1	No WHS incidents caused by APNIC's local or remote work environments — zero fault incident reports.	3 incidents – none caused by APNIC	🟢

5C.3   Talent attraction and retention

- Twenty permanent roles (including two new Directors for the Services and Finance areas) and five casual roles were filled, with nine contractors and six Community Trainers engaged.

- Four APNIC Foundation operational staff were also hired.

	Success Measures – 5C.3.	Results	Status
1	Maintain staff turnover rate within acceptable benchmarks of 5-15%.	4.8% turnover*	🟢
2	Training budget is 100% allocated and distributed across the organization.	50% spent	🔴

Includes one staff member who moved from APNIC to APIDT

5C.4   People operations management

▪ Hybrid Working Principles were developed as guidelines for staff to combine remote and office work and maximize engagement and effectiveness.

▪ Staff who have had to travel overseas for compassionate reasons were supported during quarantine and while working remotely.

▪ Emergency leave was introduced for staff to access when childcare was impacted by COVID restrictions, and for COVID testing and vaccinations.

	Success Measures – 5C.4.	Results	Status
1	All HR policies, in particular, hybrid work, parental leave and travel safety policies, reflect best practice.	Completed	🟢

Investments

5C.5   Agile APNIC

"Expand adoption of Agile methodologies to non-technical teams within APNIC".

Status:

▪ Seventy-six percent of teams adopted appropriate Agile practices for the management of their work. The remaining teams will complete adoption by end Q1 2022.

5C.6   People management portal

"Procure and implement a cloud-based solution to unify recruitment, onboarding, performance management, learning and development, salary data and reporting under one HR platform".

Status:

▪ Implementation of the Sage People human resources portal is in progress, with integrations with Okta, DocuSign and Litmos Learning Management.

▪ The Core HR module was launched in September and Compensation Management was launched in December. Performance and Recruitment modules are undergoing UAT, to be ready for completion in January 2022.

5C.7   APNIC workspace remodelling

"On the 10-year anniversary of the establishment of the current Brisbane office, remodel premises to accommodate an increased workforce and better integrate with remote working and hotdesking practices".

Status:

- An architectural and structural review of the office facility was completed. The outcome indicated the current accommodation can be extended to seat 140 staff, but at significant cost.

- A consultancy conducted a study of the use of the current workspace to inform any remodelling that may be needed at the existing premises as well as requirements for new premises in the future. Various options are being considered for minor upgrades to the existing premises in 2022.

5D   Governance

Operations

5D.1   Executive Council (EC) support

- Feng Leng was elected to the APNIC EC for the first time at APNIC 51, with Gaurab Raj Upadhaya, Kenny Huang, and Yoshinobu Matsuzaki re-elected to the EC, for two-year terms.

- Feng Leng participated in the EC induction program in April.

- Four EC meetings have been held (Meeting 1: 22 February and 4 March; Meeting 2: 21 to 22 June; Meeting 3: 7-8 September; Meeting 4: 6-7 and 9 December).

- The EC satisfaction survey was launched in October and indicated a high level of satisfaction with the performance of the APNIC Secretariat.

	Success Measures – 5D.1.	Results	Status
1	Achieve a high level of satisfaction from a survey of EC members.	Completed	🟢

5D.2   Corporate governance and legal

- The Strategic Risk Register was maintained and presented to the EC quarterly for review.

	Success Measures – 5D.2.	Results	Status
1	Quarterly Strategic Risk Register updated and reviewed.	Completed	🟢

WELCOME FROM THE DIRECTOR GENERAL

For all of us in the Asia Pacific, the COVID pandemic continued to disrupt life in 2021. "Work from home" has been the new normal for millions around the region, proving again the importance of the Internet and of the work of the APNIC community.

At the APNIC Secretariat we continued to adapt and improve our ability to work alongside the pandemic, for as long as necessary. We're looking forward to the day when we can again meet and work face-to-face as a Secretariat, as we used to. Even more, we look forward to resuming face-to-face conferences and community events, which have now been held online for two years.

Until we can meet face-to-face again, APNIC will continue to service and support Members online, just as we have in 2021. This Annual Report details APNIC's activities for this past year, but here's a snapshot of highlights, which I hope will show what a productive year we've had.

Encouraging the next generation of Internet leaders.
After fellowships were cancelled in 2020, APNIC was determined to continue the fellowship program, in an online mode. A new, five-month program was designed, with expert presentations, Academy training, and time with community mentors before the APNIC 52 conference. With forty-six fellows participating (52% female), and a Net Promoter Score (NPS) of 92, it was a great success and becomes the new model for 2022 and beyond.

Returning IPv4 addresses to availability.
Our work to reclaim unrouted and unused IPv4 space resulted in the return of 488,704 addresses (almost a /13) to APNIC. With many custodians of unused space either unresponsive or uncontactable – after exhaustive efforts – it is likely that at least another 1 million IPv4 addresses will be reclaimed in future, for the benefit of Members.

Operators taking routing security seriously.
RPKI adoption continued to grow. More than 36% of IPv4 address holders now have ROAs, up from 24% a year ago; the proportion of IPv6 address holders with ROAs reached 22% compared with 17% at the end of 2020. Eleven economies exceeded 90% ROA coverage – an outstanding achievement!

Demand for training remains strong.
With travel still restricted, all but one of APNIC's instructor-led training courses were delivered online. Ninety-six tutorials and workshops were delivered to 2,382 participants, and an additional 20 webinars reached another 1,202. At the same time, 5,428 users signed up for self-paced training on the Academy platform, and 1,735 completion certificates were awarded. Online technical assistance was also launched.

An active year in the labs.
Less time on the road equals more time in the labs to conduct experiments. In addition to releasing a new ROA measurement tool, the Labs team analysed BGP, IPv4 and IPv6 address pools, QUIC, and other DNS topics such as DOH and DNS query patterns. This work translated into a record 43 research articles, 41 presentations at industry events, and support for a new podcast, PING, which published five episodes.

WELCOME FROM THE DIRECTOR GENERAL – CONTINUED

Staying connected.

During another year of almost no travel for most of the community, online participation continued to be critical. Webcasting and technical support was provided to 16 technical community events – such as NOGs, peering forums and more – to help them reach online audiences and maintain community engagement. Event support was provided to 17 NOGs and 28 technical events overall, and 1,558 participated in APNIC's two online conferences. In addition, APNIC's pilot of an online community platform with 110 users was completed, as preparations continued for a 2022 full launch.

Improving security.

Security remained a top priority for Members and APNIC itself. The security team supported 43 security events, with 20 security training sessions delivered across nine economies and development support and advice provided to six CERTs. Three new organizations from Tonga, Bangladesh and the Philippines joined the Community Honeynet project taking the total number of partners to 15. Internally, progress was made towards ISO27001 certification readiness. A great deal was also learned from a security incident APNIC experienced in June; you'll be hearing a lot more on security investments in 2022.

You'll find more information on these and other activities in the report that follows.

Thank you to all Members, and members of the APNIC community, for your continued support and cooperation, especially during such a challenging year for all of us. It is very much appreciated.

Paul Wilson
Director General

WELCOME FROM THE EXECUTIVE COUNCIL CHAIR

On behalf of the Executive Council (EC), welcome to APNIC's 2021 Annual Report.

I'm glad to say that year two of the global COVID-19 pandemic is behind us. It was another challenging year for all industries, APNIC Members, and our community.

Throughout, the demand for Internet Number resources and related information services, training and development assistance continued unabated. As you will see in the following report, it was a busy year for APNIC. It was also an eventful year for the Internet numbering community globally.

As I look back on 2021, there are a couple of notable developments I'd like to highlight.

Welcoming all resources to routing security.
At the EC's February/March meeting, the EC resolved that RPKI services would be made available to all historical resources held by APNIC Members and Non-Members. Improving routing security is critical to the health and stability of the Internet globally and APNIC is committed to supporting RPKI adoption in the region.

As part of these changes, the EC resolved that historical resource holders in the APNIC region would need to become Members or Non-Members by 1 January 2023 to receive registration services. While regular annual fees will be payable, historical resources will NOT be considered in the calculation of those fees.

These decisions by the EC aimed to provide holders of historical address space with access to RPKI services – a known previous source of frustration – while minimizing their ongoing costs.

In 2022, historical resource holders will need to begin the transition to APNIC membership. If your organization falls into this category, you'll hear more from the Secretariat as the year progresses.

Maintaining the integrity of the global registry system.
A dispute between AFRINIC, the RIR for Africa, and one of its Members gained global attention in 2021. The dispute is ongoing, so I will not get into the specifics of the issue.

However, the case gained international attention after an order granted by the Mauritian courts froze AFRINIC's bank accounts, restricting its access to funds. It was an unusual action – that was soon lifted – but at the time it caused some concern among the community, with questions raised about the sustainability of AFRINIC and the RIR system

These concerns were unfounded. AFRINIC continues to be sustainable and able to do its job. Secondly, the NRO Stability Fund commitments, established in 2018, set aside funding that APNIC and the other RIRs stood ready to provide should it have been required.

On this occasion the Stability Fund did not need to be called upon. The smooth operation of the Internet numbers system has continued while this legal process progresses towards a conclusion.

It is important to understand that while Internet number resources are managed by regional bodies, the RIR system is global, and cooperation between RIRs and cooperation in our global community make it resilient. APNIC and the NRO continue to stand ready as needed to help, for as long as needed.

WELCOME FROM THE EXECUTIVE COUNCIL CHAIR – CONTINUED

I think I speak for many in the community in hoping this legal action comes to a swift conclusion in 2022.

Delivering on the plan.
This was the first year where APNIC publicly tracked progress against its annual plan commitments on its website (replacing the 24-month survey action tracking).

As you'll see in this document, the Secretariat delivered well – despite changing circumstances – and I would like to thank all APNIC staff for their achievements in 2021.

However, there is always room for improvement on setting meaningful commitments; the EC worked closely with the Secretariat on the new measures in place for 2022. We hope these reports, plus the online tracker, provide the membership with an easy and transparent way to assess performance now and into the future.

We need your views.
Looking ahead, 2022 is an APNIC Survey year. While you can always contact the EC, the APNIC Survey offers a wider opportunity for you to provide feedback on APNIC's activities and the issues that matter to your organization. When the Survey is released mid-year, please take the time to share your views – it is much appreciated and helps APNIC serve you better.

Thank you again to all Members and the community for your continued support of APNIC. However long this pandemic takes to end, let's stay in touch and stay connected as a community.

Gaurab Raj Upadhaya

Vision and Mission

APNIC's Four Year Strategic Plan (2020-2023) introduced an updated Vision and Mission, and a new structure for activities under five strategic pillars (detailed on the following page).

[VISION]
A global, open, stable, and secure Internet.

[MISSION]
To provide essential services as a Regional Internet Registry, and to support Internet development in the Asia Pacific region.

PURPOSE

To serve our community.

IDENTITY

A not-for-profit trusted authority on Internet infrastructure.

VALUES

Passion
Trust
Curiosity
Accountability
Inclusion

CREDO

We are APNIC.
One team dedicated to making a positive impact.
Our ambition will be achieved by working together.
Trust and respect for each other are not negotiable.
Inclusion and diversity really matter to us.
We take pride and excel in everything we do.
We are curious. We are accountable.
We are APNIC.

Strategic Pillars

1. MEMBERSHIP

Develop and deliver world-class products and services required by APNIC Members.

Engage with Members in building a global, open, stable and secure Internet.

Ensure accountable governance of APNIC as a membership organization.

2. REGISTRY

Develop and deliver world class registry products and services required by the community.

Ensure responsible stewardship of Internet number resources and deliver accurate registry services.

3. DEVELOPMENT

Invest in sustainable development of the regional Internet community, industry and infrastructure.

Build capacity for best-practice Internet operations across the Internet technical community.

4. INFORMATION

Support Internet development with needed network information services, and research outcomes which are of demonstrated value to the community.

5. CAPABILITY

Provide stable and secure technical infrastructure to support APNIC operations and services.

Develop a strong service culture driven by people committed to APNIC's vision and values.

Sustain a healthy and resilient organization.

APNIC Workstreams

The Four Year Strategic Direction (2020-2023) defines 18 workstreams, across the five pillars, as follows. Each workstream includes a number of activities that are described in this plan.

1. MEMBERSHIP

1A. MEMBER SERVICES
Deliver excellence in service and value to Members through active and quality engagement.

1B. MEMBERSHIP PRODUCTS
Apply best practice in development of membership products that meet Members' needs and exceed their expectations.

1C. MEMBERSHIP REPORTING
Ensure that APNIC remains fully accountable to its Members, by providing timely and accurate information about APNIC operations.

2. REGISTRY

2A. REGISTRATION SERVICES
Provide delegation and registration services for Internet numbers (ASNs, IPv4, IPv6) according to community developed policies.

2B. REGISTRY PRODUCTS
Maintain an accurate number registry and reliable registry services.

2C. POLICY DEVELOPMENT
Facilitate the open Policy Development Process to ensure resource policies in the APNIC region are developed and implemented in a neutral manner consistent with agreed rules and community expectations.

3. DEVELOPMENT

3A. APNIC CONFERENCES
Deliver engaging and relevant APNIC conferences for learning, sharing ideas and experience, professional networking, and Internet policy development.

3B. FOUNDATION SUPPORT
Provide financial and operational support to ensure the success of the APNIC Foundation.

3C. COMMUNITY ENGAGEMENT
Build and maintain close and meaningful relationships between APNIC and its various communities.

3D. COMMUNITY PARTICIPATION
Encourage awareness, diversity, participation, and leadership in APNIC processes, events, and activities.

3E. APNIC ACADEMY
Scale up training and technical assistance infrastructure with high-quality training content and curriculum.

3F. INTERNET INFRASTRUCTURE SUPPORT
Promote and support the deployment of critical Internet infrastructure and deploy tools for operational infrastructure monitoring.

4. INFORMATION

4A. INFORMATION PRODUCTS
Provide meaningful information services to the communities APNIC serves.

4B. RESEARCH AND ANALYSIS
Analyse the pressures shaping the evolution and future demands of Internet names and numbers infrastructure, and their impacts.

5. CAPABILITY

3C. INTERNAL TECHNICAL INFRASTRUCTURE
Provide stable and secure technical infrastructure to support APNIC operations and services.

3D. FINANCE AND BUSINESS SERVICES
Provide efficient and robust finance and business services and facilities to effectively support APNIC's operations.

5E. EMPLOYEE EXPERIENCE
Attract, develop and retain talented, service-oriented people to deliver APNIC's mission and exceed organization and community expectations.

5F. GOVERNANCE
Provide the legal, economic and governance framework and professional services to support APNIC's operations to minimize risk and ensure compliance and continuity.

$Millions (AUD)

Note: Some numbers presented in this chart may not add up precisely due to rounding.

In addition to standard financial reporting, APNIC also reports activities and expenses under the five pillars and 18 workstreams detailed on page 10.

The chart on this page illustrates 2021's actual operating expenses compared to the budget in the 2021 Activity Plan. The percentage for each area indicates the proportion of the total budget it represents.

For more details on APNIC's 2021 finances, please refer to pages 91-94 to view:

- Financial Report by Activity
- Statement of Financial Position
- Statement of Income
- Cash Flow Statement

Notes on the Activities

APNIC's activities are reported in this document under the 18 workstreams and five pillars described in the previous section:

Membership   Registry   Development   Information   Capability

THE ACTIVITIES
The Activities are described as either 'Operations' or 'Investments'.

'Operations' includes all ongoing activities required for continued provision of APNIC services.

'Investments' are discrete project activities that result in new products, services, or improvements to APNIC services. Where these investments are funded by the APNIC Foundation (not Member funds), it is clearly noted.

SUCCESS MEASURES
The status of Success Measures in the document's following pages is denoted by a coloured circle for at-a-glance reference on progress.

● Completed   ● At least 90% complete   ● Less than 90% complete

A table summarizes the resources (financial and human) needed to successfully complete the operations and investments in each workstream.

All monetary figures quoted are in Australian Dollars (AUD).

	Budget	Actual
① FTE	22.42	19.88
② Expenses	5,441,868	4,685,680
③ CAPEX	-	7,935

① **FTE:** The number of Full-Time Equivalent employees required for the activity. In all cases FTE figures comprise contributions from multiple employees. For example – an FTE of 1.6 may be made up of four employees who each contribute 40% of their time (0.4 FTE), for a period of one year. The detailed account of these allocations is provided in section 4.2, FTE Distribution.

② **Expenses:** Refers to all operational costs directly incurred by the activity.

③ **CAPEX**: Provides the provision for capital expenditure required by the activity.

1.   MEMBERSHIP

Expenses	5,441,868	4,695,325
CAPEX	-	7,935

1A. Member Services

OPERATIONS

1A.1. Member services

The Member Services team handled 12,610 tickets created by Member and community enquiries, 1,869 voice calls (phone and Skype), and 3,287 online chat sessions. In addition, more than 10,733 Member invoices were processed. The APNIC Helpdesk maintained its standing commitment to respond to Member queries within two business days.

Helpdesk service satisfaction remained high at 93% 'excellent' and 'above average' ratings (830/891 responses). All negative feedback was actively resolved by Member Services staff.

Member services staff proactively contacted 148 Members across 47 economies on topics including RPKI, resource transfers, technical assistance, APNIC conferences and other events, and the APNIC Whois Database.

Twenty-two cases of attempted fraud in new Member applications were detected and prevented.

RESOURCING

|	Budget	Actual
FTE	8.58	9.51
Expenses	2,253,270	2,219,361
CAPEX	-	7,935

1A. **Member Services** - continued

OPERATIONS

1A.2. Member experience

Members and the community provided 2,125 feedback items on topics including conference and training content, website improvements and bug fixes. 473 items required action and were resolved.

COMMUNITY FEEDBACK ANALYSIS

Following an independent audit of the website, 81 critical and high issues were identified that could impact accessibility for users with a disability. All issues were resolved.

The voluntary User Feedback Group, where community members can provide feedback on APNIC product development, grew to 526 people. A further 56 one-on-one interviews were held with Members during the year.

1A. **Member Services** - continued

1A.3. Membership development

New Member outreach was conducted at the PCTA e-Tech Show, PITA Business Forum & Expo 2021, CommunicAsia 2021 and at various NOGs, plus the APNIC conferences.

Two new Service Partners – Lao National Internet Center (LA) and Information Beam Company Limited (MM) – were engaged.

The majority of the 783 new Members joining APNIC in 2021 did so directly, with seven joining via Service Partners and 11 from Member referrals.

1A. Member Services - continued

MEMBERSHIP GROWTH

At the end of 2021, APNIC direct membership stood at 8,768, an increase of 5.1% on 2020. In addition, there were 12,089 NIR sub accounts, after rapid growth of 21.2% in 2021.

Total combined membership was 20,857.

HELP CENTRE FEEDBACK

Feedback count   Is this Article helpful?

Updates to MyAPNIC included:

● Complete architecture conversion from WordPress to Java.
● Improvements to the billing section including new advance invoice management and downloadable receipts.
● Removal of billing surcharges for Members paying annual fees by instalment.
● An improved EC election dashboard to reduce support requirements.
● Web style updates to the MyAPNIC Resource Manager.
● Voting system updates to accommodate the addition of SIG and IANA RC elections (held at APNIC 52).
● Migration of the billing, elections and portal features to a microservice architecture.

Member application referrals were added to the Member application form to allow Members to refer their customers to APNIC for an easier application process.

INVESTMENTS

1B.2. Online community platform ➡️|

'Tribe' was selected to pilot as a community discussion platform over five months, with a total of 110 users, and several test groups.

The trial findings included the requirement for the integration of mailing lists and a community manager to coordinate to overall operation of the platform. These findings and other lessons of the trial period are being assessed to determine next steps, with deployment of an operational product scheduled in 2022.

2021 Investment	Member Benefit
Online community platform	Network operators can better learn from each other's experience. Replace or augment aging mailing list facilities. Promotes online engagement between the APNIC community.

Status: **Ongoing**

1C. Membership Reporting

OPERATIONS

1C.1. Planning and reporting

The 2021 Activity Plan and Budget, and 2020 Annual Report were presented at the 2021
Annual General Meeting in March. The 2022 Activity Plan and Budget was approved by the EC
in December.

A public webpage tracking progress against the 2021 activities was published to replace the
previous 'Survey Tracker' webpage.

Expenses	3,968,674	3,164,209
CAPEX	-	-

2A. Registration Services

OPERATIONS

2A.1. IPv4, IPv6 and ASN delegation and registration services

APNIC processed 1,398 IPv6 delegations, 2,532 IPv4 delegations, 6,808 ASN assignments, 709 IPv4 market transfers (496 within the Asia Pacific region and 213 between APNIC and other RIR regions), and 118 Merger and Acquisition IPv4 transfers. These are illustrated on the following pages.

The proportion of APNIC Members that hold IPv6 resources is 68.43%, up from 66.32% in 2020.

APNIC received eight blocks of ASNs from IANA (8,192 ASNs) to meet large requests from networks in China and India. No additional IPv4 or IPv6 allocations were received from IANA in 2021.

At the end of 2021, APNIC had allocated 99.40% of its total IPv4 number resource pool (leaving 0.60% available), 9.22% of its IPv6 pool (leaving 90.78%) and 89.03% of its ASN pool (leaving 10.97%). The size of the available IPv4 pool increased in 2021 following APNIC's IPv4 reclamation work (see 2A.3).

The status of APNIC's Internet number resource pools at the end of 2021 is below.

	Total at 1 Jan 2021	From IANA	Transfers in	Transfers out	Total at 31 Dec 2021	Total delegated	Total reserved	Total available
IPv4 (/24s)	3,482,617	0	2,410	1,095	3,483,932	3,463,031	6,986	13,915
IPv6 (/32s)	1,067,008	0	0	0	1,067,008	98,392	113,746	854,870
ASNs	21,143	8,192	5	4	29,336	26,118	0	3,218

Note: Large requests from networks in China and India account for the significant rise in ASN assignments.

2A. Registration Services – continued

MARKET TRANSFERS

INTER-RIR TRANSFERS

M&A AND HISTORICAL TRANSFERS

- Large IPv4 transfers from the Asia Pacific Internet Development Trust (APIDT) to various Members occurred in June, August, November, and December.
- A large transfer occurred within TWNIC in September.
- Inter-RIR market transfer activity slightly increased in 2021, albeit on small address volumes.

2A. Registration Services – continued

AVAILABLE IPv4 ADDRESS SPACE

488,704 historical IPv4 addresses were voluntarily returned to the available pool in 2021 as a result of APNIC's IPv4 reclamation efforts.

2A. Registration Services – continued

OPERATIONS

2A.2. Maintain correct and current registry data

Improvements were made to IRT validation under prop-125, including simplification of email and notification templates, and better IRT management functionality in MyAPNIC to help Members update IRT details and handle validation emails.

13,826 email validation requests were issued with 10,277 validation requests confirmed, equalling a confirmation rate of 74.3%.

In response to ICANN's Identifier Technical Health Indicators (ITHI) initiative, the NRO defined the 'accuracy' of Internet number resources data under three dimensions: 'Comprehensive, Correct, and Current'. APNIC deployed measurements for two of the three dimensions, with measurement for 'Current' to be completed in 2022.

2A. Registration Services – continued

2A.3. Reclaiming unused IPv4 address space

Around 2.3 million unrouted historical IPv4 addresses were identified under prop-017 and 78% of the address custodians were contacted following an exhaustive contacts search using public information such as business registries and web research.

Contacted address custodians retained, or were in the process of claiming, 750,592 addresses while 488,704 addresses were returned to APNIC (equivalent to around 1,909 /24s).

The remaining address space (around 1.1 million addresses) for uncontactable custodians, or custodians that did not respond, will be reclaimed by APNIC in 2022.

STATUS OF RECLAIMED ADDRESS SPACE

Reclaimed addresses

2A. Registration Services – continued

SUCCESS MEASURES – 2A

Targets	Results	Status
Maintain Registration Services SLA of two business day response to enquiries (>99.90%)	100%	🟢
Increase percentage of Members holding IPv6 address space to 70%	68.43%	🟠
Comply with NRO-defined Identifier Technology Health Indicators (ITHI) reporting	2 out of 3	🔴
Increase rate of validation by Members of registration records	74.3%	🟢
All unrouted historical resource prefixes identified under policy prop-017 are claimed, transferred, or returned to APNIC	Completed	🟢

2B. Registry Products

OPERATIONS

2B.1. Internet number resource management

Significant performance improvements were made to the core registry service to make the registry management system more usable (now 5-10 times faster for typical requests).

An API to assist NIR resource administration and registry accuracy was developed, with an external test environment established. Deployment is planned for early 2022.

A requirements specification to rearchitect the registry was completed as part of the multi-year 'Next-generation Registry' project.

2B.2. Registry product management

Updates to RPKI included improvements to route management functions in MyAPNIC, and to the Certification Practice Statement (CPS). The repository publication was made entirely atomic to avoid repository inconsistency/invalidity problems.

The finalized NRO RDAP profile was published in the IANA RDAP registry. APNIC will achieve full compliance with the profile in early 2022.

A public specification of a general Member registry API was developed, with the aim to share a prototype at APRICOT 2022.

MyAPNIC users can also now manage 'BYO IP' requirements for their resources by directly updating whois object attributes.

RESOURCING

	Budget	Actual
FTE	9.04	6.18
Expenses	2,580,512	1,831,592
CAPEX	-	-

2B. Registry Products – continued

SUCCESS MEASURES – 2B

Targets	Results	Status
Implement the NIR API and operate in conjunction with the NIRs	Completed for 2022 deployment	●
Create initial design documentation for the 'Next-generation Registry' by the end of Q4	Completed	●
Implement a bulk update method to improve usability of the MyAPNIC Routing Management feature	General Member API implementation in 2022	●
Improved support for 'BYO IP' services in MyAPNIC	Completed	●
Create a public specification of a general Member registry API	Completed	●
Implement the NIR KPI monitor for RPKI	Completed	●

2C. Policy Development

OPERATIONS

2C.1. Policy development

The APNIC Policy SIG considered the following proposals in 2021.

Proposal	Result
prop-130: Modification of transfer policies	Presented at APNIC 51. Did not reach consensus and abandoned.
prop-133: Clarification on Sub-Assignments	Presented at APNIC 51. Reached consensus and endorsed by the EC for adoption.
prop-135: Documentation	Reached consensus and endorsed by the EC for adoption.
prop-136: Registration Requirements	Reached consensus and endorsed by the EC for adoption.
prop-137: IPv6 assignment for Associate Members	Reached consensus but returned to author for clarification.
prop-138: Restricting AS-ID in ROA	Accepted as a guideline only.
prop-139: SOR not required	Reached consensus and endorsed by the EC for adoption.
prop-140: Update End-Site Definition	Reached consensus and endorsed by the EC for adoption.
prop-141: Change maximum delegation size of IPv4 address from 512 (/23) to 768 (/23+/24) addresses	Did not reach consensus and returned to mailing list.

2C. **Policy Development** – continued

2C.2. Policy implementation

Policy text changes resulting from prop-133, -135, -136, -139, and -140 were implemented and published. Policy prop-138 was published as a guideline.

2C.3. Policy analysis

An update on the Policy Document Review was presented at APNIC 51, with an additional community consultation meeting held online in March, with 40 attendees.

A community Working Group (WG) was formed to review the Policy Document Review report and develop proposals for discussion at APNIC 52. The WG submitted nine proposals to the Policy SIG Chairs for APNIC 52; four were accepted for discussion at the Open Policy Meeting and all four reached consensus.

Impact assessments for the nine policy proposals discussed at APNIC 51 and 52 were conducted and shared with the Policy SIG. The APNIC 52 policy assessment was not presented due to time constraints.

OPERATIONS

3A.1. APNIC conferences

APRICOT 2021 (incorporating APNIC 51) was held online from 22 February to 4 March 2021. This was the first APRICOT conference to be held 100% online, due to the COVID-19 pandemic.

The event welcomed 852 remote attendees (via Zoom) in total, including 416 attendees that attended the tutorial week. There were an additional 3,855 views on YouTube.

An election for three available APNIC EC positions was held at APNIC 51 with Feng Leng (2,612 votes), Yoshinobu Matsuzaki (2,605 votes), and Gaurab Raj Upadhaya (2,567 votes) elected for two-year terms.

APNIC 52, held from 13 to 16 September 2021, was also held wholly online and welcomed 706 remote attendees in total (via Zoom). The tutorials on day one attracted 374 attendees. Technology additions for APNIC 52 included CometChat for delegate chat and networking, and Otter.ai for automatic transcription. Improvements to the conference login process were also made.

Several community meetings were held at the conferences from partner organizations including, DotAsia, APIX, APStar, and APNG.

INVESTMENTS

3A.2. Fellowships ➡️|

A new online fellowships program was developed, comprising 11 technical, policy and Internet governance presentations over five months; pairing fellows with industry mentors; APNIC Academy training; and guidance during APNIC 52.

Forty-eight fellows were shortlisted from 293 applicants, with 46 accepting (24 female and 22 male; 34 professionals and 12 youth).

The Fellows' average overall attendance was 86%, with 136 APNIC Academy self-paced courses completed and participation in an additional 26 Academy webinars.

Twelve mentoring sessions were held in August to September between 27 fellows and 25 volunteer mentors from the APNIC community.

The program achieved a Net Promoter Score (NPS) of 92 from Fellows in the participant survey.

2021 Investment	Member Benefit
Fellowships	Diversity of participation in APNIC conference. Opportunities for more Members to attend APNIC conferences.

Status: **Completed**

3B. Foundation Support

INVESTMENTS

3B.1. Operational and administrative support ➔|

A total of 6.6 APNIC staff (FTE) were assigned to the Foundation, with all direct costs recovered.

APNIC continued to provide hosting and technical support for administrative, project and financial platforms used by the Foundation.

A new Affirmation of Commitments (AoC) was developed to cover both APNIC support and Foundation funding for APNIC activities.

2021 Investment	Member Benefit
Operational and administrative support	A well-run Foundation delivering successful and valuable Internet development activities in the APNIC region.
Status: **Completed**

RESOURCING

	Budget	Actual
FTE	1.58	1.24
Expenses	571,518	76,428
CAPEX	-	-

3C. Community Engagement

OPERATIONS

3C.1. Technical community support

APNIC participated in 15 Network Operator Group (NOG) events during 2021 and 13 technical community events, providing sponsorship, speakers, and training (see Appendix for full list of events and economies). Webcasting and technical support was provided to help 16 technical community events proceed online.

Sponsorship of software and services for the technical community, supported by funding from the APNIC Foundation, was provided to PeeringDB, IXP Manager and IXPDB. APNIC also sponsored the Internet Society's MANRS Fellowship Program.

3C.2. Security community support

APNIC participated at 43 security community events, including presenting at eight events and providing training at seven events (see Appendix for full list of events and economies).

Sponsorship was provided to CrikeyCon VII and Threat Con 2021, with staff also participating in the program committees for AusCERT 2021 and the FIRST Annual Security Conference.

Sponsorship of services for the security community, supported by funding from the APNIC Foundation, was provided to Shawdowserver.

RESOURCING

	Budget	Actual
FTE	6.38	4.46
Expenses	1,826,724	1,410,868
CAPEX	-	-

3C. Community Engagement – continued

3C.3. Internet organization cooperation

APNIC partnered with LACNIC to commission a study from Analysys Mason on the Internet's technical success factors, and supported them in conducting 15 community interviews. The final report was published and presented during the 2021 Internet Governance Forum (IGF) in December.

Collaboration with other RIRs included participation in 34 online meetings with NRO coordination groups, supporting proposed revisions to the NRO MoU, and the proposed review of the NRO Strategic Plan. Staff participated in all RIR, ICANN and IETF meetings.

Staff participated in the Internet Technical Advisory Committee (ITAC) to the OECD, Internet Technical Collaboration Group (ITCG), ICANN Root Service Governance Working Group, the Root Zone Evolution Working Group, and the Security and Stability Advisory Committee.

NIR engagement included meeting with IRINN, NIXI, and the KRNIC Policy team and participating at the TWNIC OPMs and ICANN TWNIC Engagement Forum. Staff also provided training to the IRINN Hostmaster and Helpdesk teams on IRM, IPv6, the PDP and routing.

3C.4. Internet governance participation

Internet governance-related activities included:

- Participating in the 2021 IGF and conducting sessions on Learning Resiliency, Supply Chain IoT, and the results of the Internet Study on Technical Success Factors. Staff also participated in 62 meetings related to the IGF throughout the year including Multistakeholder Advisory Group (MAG) meetings, topic work groups, and the IGF Support Association Executive Committee.

3C. Community Engagement – continued

- Conducting two sessions at the 2021 APrIGF: Interoperable Internet infrastructure (with ISOC); and the Internet study on Technical Success Factors. Staff also participated in 60 APrIGF preparatory meetings covering event direction, arrangements, program, and fellowships.
- Participating in, and supporting the organization of three economy-level IGFs plus the new sub-regional Southeast Asia IGF (SEA-IGF).
- Sponsoring, presenting and participating at nine Youth IGFs and Schools of Internet Governance (SIG). APNIC also participated in 10 planning meetings for the Asia Pacific Internet Governance Academy (APIGA).
- Participating in six other Internet governance meetings online (see Appendix for full list of events and economies).

3C.5. Government engagement

APNIC engages with governments and inter-governmental organizations as a member of the technical community. Participation in 2021 included:

- Joining 25 intergovernmental meetings and consultations, including 19 ITU meetings (see Appendix for full list of events and economies).
- Meeting with the APT Secretary General and Secretariat to coordinate regional initiatives.
- Providing training and technical assistance support to the Mongolian government's Digital Nation (e-Mongolia) initiative.
- Contributing to an OECD draft document on routing and DNS security, and monitored discussions at five OECD meetings.

APNIC also engaged directly with the Law Enforcement Agency (LEA) and Public Safety community, delivering training to LEAs in Oceania as part of Cyber Safety Pasifika, LEAs in Taiwan, and participating at the 6th INTERPOL Global Cyber Crime Expert Group meeting and INTERPOL Forum on Ransomware.

3D. Community Participation

OPERATIONS

3D.1. Community-led processes

Special Interest Group (SIG) meetings at APNIC conferences attracted 950 participants, with SIG mailing list subscribers increasing 5% from 1,268 to 1,333. Four 'intersessional' online SIG meetings (arranged by the Policy SIG and Routing Security SIG) were also held outside of APNIC conferences, attracting 139 participants.

The SIG Guidelines were updated in April following a joint SIGs meeting to discuss and agree proposed changes to SIG elections.

At the elections completed at APNIC 52:

- Joy Chan (TW) was re-elected Chair of the Cooperation SIG for a two-year term.
- Oanh Nguyen (VN) was elected Chair of the NIR SIG for a two-year term.
- Bertrand Cherrier (NC) was elected Chair of the Policy SIG and Shaila Sharmin (BD) was elected Co-Chair, both for two-year terms.
- Afifa Abbas (BD) was elected Co-Chair of the Routing Security SIG for a two-year term.
- Ching-Heng Ku (TW) was elected to the IANA RC for a two-year term.
- Di Ma (CN) was elected unopposed to the NRO NC for a two-year term starting 1 January 2022. Nicole Chen was reappointed by the EC to the second NRO NC seat for a one-year term beginning 1 January 2022.

Quarterly 'Community Elected Leaders' meetings were held by the APNIC EC and elected representatives of the SIGs, IANA RC, NRO NC, members of APIX and APNOG, and Secretariat staff. Discussions covered community feedback on APNIC conferences, the online conference format, election procedures, the use of confer at OPMs and the online community platform trial.

3D. **Community Participation** – continued

3D.2. Online participation

Visitor numbers to apnic.net peaked in September, with time on site at its highest point in July and August. The top five visitor economies were the United States, Hong Kong, India, China, and Australia.

Users consumed 4,013 hours of video content via APNIC's YouTube channel. Experimentation with paid information sharing campaigns on Facebook and Twitter helped increase Facebook reach by 13% (from 3 million to 3.4 million), and APNIC tweet engagement by 285% (from 63,749 to 245,337).

APNIC.NET WEBSITE VISITS

Legend: ■ Unique Users ■ Sessions — Time spent on site (minutes:seconds)

3D. Community Participation – continued

3D.3. Encouraging newcomers and diversity

APNIC presented and participated in the Diversity in Tech Panel session at APRICOT 2021/APNIC 51 and the Women in ICT session at APNIC 52. A NextGen Careers BoF was also held at APNIC 52. Thirty-seven percent of APNIC conference attendees were newcomers.

Following the elections at APNIC 52, two of the four SIG Chair positions and two of the six Co-Chair positions were held by females (previously, only one SIG leadership role was held by a female).

APNIC attracted 235 new Blog subscribers, 1,548 new Twitter followers, and 1,414 new LinkedIn followers.

An independent community survey on language understanding and translation was commissioned in August. The survey was provided in 11 languages and received 489 completed responses. Services identified by respondents as having the highest value – if available in local language – were training, conferences, and policy information.

3D. Community Participation – continued

SUCCESS MEASURES – 3D

Targets	Results	Status
Achieve 800 online SIG participants across two conferences	950 participants	🟢
Grow SIG mailing lists subscribers from 1,268 to 1,325	1,333 subscribers	🟢
Achieve 6,000 remote conference session views	8,145 views	🟢
Achieve attendance of 1,000 conference delegates across two conferences	1,558 attendees	🟢
Grow all-time Blog views from 2.6 million to 3.4 million	3.46 million	🟢
Increase 12-month tweet engagement from 60,000 to 62,000	234,929	🟢
Increase annual Facebook posts reach from 3 million to 3.2 million	3.4 million	🟢
Attract 400 newcomers to APNIC conferences	578 newcomers	🟢

3E. APNIC Academy

OPERATIONS

3E.1. Product management

The integration of Salesforce event management and training registration systems was completed. Training content on apnic.net was also migrated to the APNIC Academy website.

Note that additional investments in the training platform are covered in 3E.7 below.

3E.2. Instructor-led training

APNIC remained unable to deliver full face-to-face training due to COVID-19 restrictions (all but one instructor-led training session was remote). The training delivery team conducted 96 courses for 2,382 participants in a mix of online and 'hybrid' sessions. Twenty webinars were also delivered to 1,120 participants.

Two new courses on Network Management and Monitoring (NMM) and Network Automation were completed. Updates were also made to existing courses on Internet routing, IPv6 deployment, network security, and the RPKI/ROV lab guides.

RESOURCING

	Budget	Actual
FTE	10.80	8.07
Expenses	2,392,222	1,886,157
CAPEX	15,000	16,351

3E. **APNIC Academy** – continued

3E.3. Self-paced training

The APNIC Academy added 5,428 new accounts, with 1,735 course completions (3,340 contact hours), and 6,070 labs launched.

A self-paced Routing Fundamentals course, containing 39 new topics and five hours of new learning material, was published to replace the existing Routing Basics course.

New virtual labs were added including Hashing (File Integrity), SSH (Secure Shell), DHCPv6-PD, Linux Basics, PGP (File and Email Security) and Using Suricata to Analyse Packet Captures. The RPKI Lab was updated.

academy.apnic.net/en

3E.4. Technical assistance

Technical assistance was provided to 34 Members across 14 economies, including:

- DNSSEC troubleshooting with a Member in Samoa to solve email delivery issues.
- Proactive outreach and support to 18 network operators in the region to reduce invalid RPKI routes.
- IPv6 deployment support with network operators in India, Pakistan, Sri Lanka and Australia.
- Network design development and discussions with Members in Tonga and Kiribati, plus network consolidation discussions with a Member in Brunei.
- IXP training, setup and configuration for PKIX Lahore.

**academy.apnic.net/en/technical-assistance**

3E. **APNIC Academy** – continued

3E.5. RPKI awareness and deployment support

RPKI adoption in the APNIC region increased in 2021. The percentage of IPv4 address holders with ROAs grew from 24.4% to 36.1% in 12 months, while IPv6 address holders with ROAs increased from 17.3% to 22.3%.

ADDRESS HOLDERS WITH ROAS

The amount of IPv4 addresses covered by ROAs grew from 21.4% to 28.8%, with IPv6 address space covered by ROAs increasing from 24.0% to 31.7%.

Eleven economies reached 90%+ IPv4 ROA coverage by the end of 2021: VU (92%), TO (96%), LK (94%), MN (99%), BT (96%), MV (99%), TO (95%), NP (94%), NU (100%), NR (92%), MH (90%).
3E. **APNIC Academy** – continued

In addition to technical assistance provided (see 3E.4), 18 RPKI training events were delivered. Five RPKI deployment case studies and 36 RPKI-tagged posts were published on the APNIC Blog, including six in support of the Internet Society's 'RPKI Week' promotion.

APNIC Labs released a ROA measurement tool (alongside the existing ROV measurement tool) to help monitor the progressive deployment of RPKI across the Internet.

www.apnic.net/rpki

Publish three IPv6 deployment case studies	3 published	🟢

3E. APNIC Academy – continued

INVESTMENTS

3E.7. Platform and curriculum development ➡️|

APNIC Academy development included extended translation support to online video-based courses, and the launch of the online Technical Assistance platform.

3E.8. Community Trainers network ➡️|

The number of active Community Trainers (CTs) was increased to 30. Twenty-eight CTs from 14 economies were engaged for 68 instructor-led online training events.

A new Retained CT model was created to provide dedicated on-the-ground training support, with recruitment begun.

2021 Investment	Member Benefit
APNIC Academy development	Improved access to training and technical assistance. Improved technical capacity in the APNIC region.
Status: **Ongoing**	

Community Trainers network	Local support for APNIC training and technical assistance. Increased instructor led APNIC training in targeted economies. Options for training in local language and improved translation support for training content.
Status: **Ongoing**	

3E. **APNIC Academy** – continued

3E.9. Curriculum for non-technical audiences →|

A team of instructional designers was appointed in May to develop an online educational game to help young, non-technical, Internet governance enthusiasts to better understand how the Internet works and inspire their involvement and participation in the Internet ecosystem.

A procurement process was established to select a game developer through a tender process, and three workshops and four consultations with target audience groups were conducted. The game developers are expected to release a minimum viable product in the first half of 2022.

2021 Investment	Member Benefit
Curriculum for non-technical audiences	More informed government decision-making on issues that impact Internet operations. Better prepared fellows for APNIC conference participation. More meaningful engagements with non-technical audiences.

Status: **Ongoing**

3F. Internet Infrastructure Deployment

OPERATIONS

3F.1. Internet infrastructure deployment

Training and IXP setup/configuration support was completed for the new Pakistan IX in Lahore in September.

Operating principles and high-level design work was completed with MV IX in the Maldives, with deployment to continue in 2022 when equipment arrives. Support was also provided to the planned upgrade of Fiji IX, and assistance was given to Bhutan IX to implement ROV on their route server.

Challenges in sourcing hardware replacements for seven disconnected RIPE Atlas anchor hosts led to APNIC testing software anchors on mini servers as an alternative. It is hoped this will allow resolution in 2022.

Root server deployment focused on the M-root project (see 3F.3).

RESOURCING

	Budget	Actual
FTE	0.76	1.03
Expenses	551,384	379,668
CAPEX	60,000	1,231

3F. **Internet Infrastructure Deployment** - continued

3F.2. Community Honeynet and Security Threat Sharing Platform

The Community Honeynet project was expanded with the addition of five new partners, including three from the APNIC region (Tonga, Bangladesh, and the Philippines).

Feeds from the honeynet dataset were created for consumption by instances of the MISP threat sharing platform, and shared with various national CERTs, the ShadowServer Foundation, and APNIC's DASH service.

Eight engagements were held with communities in Bhutan, Mongolia, Taiwan, Nepal, Timor Leste, Tonga and Fiji on honeynet and threat sharing, with two webinars on Practical Threat Hunting delivered via the APNIC Academy.

Content for the 'Introduction to Suricata Intrusion Detection System' training course was also developed based on the honeynet datasets.

3F. Internet Infrastructure Deployment - continued

SUCCESS MEASURES – 3F

Targets	Results	Status
Support deployment of at least two new or upgraded IXPs	1 deployed 1 in progress	🟡
Support four additional IXPs to deploy RPKI/ROV on their route servers	1 deployed 1 in progress	🔴
Deploy or upgrade four RIPE Atlas anchors at various networks	0 deployed 7 in progress	🔴
Deploy 12 new root server instances	1 deployed 11 in progress (see 3F.3)	🔴
Increase Community Honeynet partners from 10 to 15	15 partners	🟢

3F. **Internet Infrastructure Deployment** - continued

INVESTMENTS

3F.3. M-root anycast instance deployment ➡️|

Deployment of the M-root instance in Hanoi was completed in collaboration with the WIDE Project and JPRS.

Deployment of servers in 11 locations (Guam, Kaohsiung, Manila, Dhaka, Kuala Lumpur, Bangkok, Jakarta, Ulaanbaatar, Kathmandu, Mumbai, and Singapore) progressed, however equipment delivery delays prevented progress. Deployment in these locations will be completed in 2022 upon equipment delivery.

2021 Investment	Member Benefit
M-root anycast instance deployment	Faster and more reliable DNS service. Faster and easier deployment of root DNS anycast instances at desirable or underserved locations.
Status: **Ongoing**	

4. INFORMATION

OBJECTIVE

Support Internet development with needed network information services, and research outcomes which are of demonstrated value to the community.

WORKSTREAMS

4A.2. Information product management

The Internet Directory was renamed Resource Explorer (REx) and updated with better support for new users, a new information architecture, and other UX improvements. An awareness campaign in October generated a significant increase in usage.

rex.apnic.net

Updates to DASH included a recurring reports feature, to allow users to receive PDF reports by email at their chosen frequency; implementation of new empty states to improve usability; and performance and reliability improvements. An 'Identifying suspicious traffic with DASH' webinar was delivered to 45 attendees from 20 economies to increase community awareness of the product.
dash.apnic.net

A new 'Experimental' tab for NetOX was created for widgets to allow users to trial new features before they are adopted. Stability and performance improvements were deployed in the backend.

netox.apnic.net

MONTHLY NUMBER OF USERS

Line chart of "Number of users" (y-axis 0 to 2,000) by month (Jan–Dec) for NetOX, DASH, and REx.

4A. Information Products – continued

SUCCESS MEASURES – 4A

Targets	Results	Status
Grow all-time Blog views from 2.6 million to 3.4 million	3.46 million	🟢
Average 64,000 Blog views per month	68,721 views/month	🟢
Maintain Blog Guest Post ratio between 45-65%	56%	🟢
Reach an average of 400 users per month to NetOX and DASH, and of 700 users per month to REx	980 NetOX 365 DASH 826 REx	🟠
Achieve a net promoter score (NPS) of 80+ for all products	68 NetOX 68 DASH 59 REx	🔴
Achieve a usability score of at least 4.5/5 for all products	4.4 NetOX 4.5 DASH 4.4 REx	🟠

4B. Research and Analysis

OPERATIONS

4B.1. Conducting research and measurements

APNIC Labs research activities included:

labs.apnic.net

- New measurements on the use of IPv6 as a transport protocol for the DNS and IPv6 Extension Header handling, including fragmentation.
- Analysis of IPv4 and IPv6 advertised, unadvertised and reserved address pools over time.
- Reporting on the annual state of BGP, and further development of routing bogon and CIDR reports, as input to ISOC MANRS. Work continued on automated BGP anomaly detection.
- Development of an RPKI ROA monitor to help measure progressive deployment of RPKI.
- Research analysing of the handling of large DNS responses, adoption of DOH, and DNS query patterns.
- Measurement of QUIC usage following the release of beta software that adds QUIC support to NGINX servers.
- Publishing 43 blog articles covering research findings, analysis of trust infrastructure, and commentary on new Internet technologies. Three podcasts were also recorded.

RESOURCING

	Budget	Actual
FTE	1.02	1.00
Expenses	799,201	747,795
CAPEX	80,000	62,532

4B. **Research and Analysis** – continued

4B.2. Cooperative research

APNIC entered into a cooperative research program with ISOC in support of MANRS, providing a feed of routing data. As part of an agreement with ICANN, work continued on the measurement framework for ITHI.

Research collaboration also continued with Cloudflare.

4B.3. Sharing research outcomes

Forty-one presentations on research findings were shared at technical forums globally.

4B. Research and Analysis – continued

SUCCESS MEASURES – 4B

Targets	Results	Status
Twelve research articles and reports published	43 articles	●
Conduct cooperative research with organizations such as CloudFlare, ICANN, RIPE NCC and others	3 collaborative research projects	●
Ten research presentations delivered	41 presentations	●
At least two research presentations at APNIC conferences	6 presentations	●

5. CAPABILITY

OBJECTIVES

Sustain a healthy and resilient organization.
Develop a strong service culture driven by people committed to APNIC's vision and values.
Provide stable and secure technical infrastructure to support APNIC operations and services.

WORKSTREAMS

5A. Internal Technical Infrastructure
5B. Finance and Business Services
5C. Employee Experience
5D. Governance

CAPABILITY - SUMMARY

	Budget	Actual
FTE	23.75	33.88
Expenses	7,190,675	8,029,100
CAPEX	2,543,200	400,222

5A. Internal Technical Infrastructure

OPERATIONS

5A.1. Architecture and technical coordination

OpenAPI was adopted to describe internal APIs, with dependencies between products and components managed using APIs and architectural documentation.

Dependency management tooling (Dependabot) was deployed to ensure systems remain current, and its use will expand as part of the regular system maintenance cycle.

Rust was adopted as a supported language for APNIC product development. The Information Product team used Rust to achieve lower memory footprint deployments than with Java or Python, with strong static safety checks.

5A.2. Network and infrastructure operations

Connectivity from Brisbane to HKIX (via PCCW) was completed, with a shared Point of Presence (PoP) in the Singapore SG1 data centre established for critical APNIC services and an M-root global anycast node.

APNIC signed up to the NextDC carbon offset program to offset 100% of the carbon emissions generated by the Brisbane data centre.

A new service status page was also created to display the real-time operational status of APNIC's services.

RESOURCING

	Budget	Actual
FTE	6.20	14.78
Expenses	1,903,032	2,472,811
CAPEX	353,200	390,978

5A. Internal Technical Infrastructure – continued

5A.3. System and platform operations

Initiatives to improve online service performance, stability and availability included:

- Completing the migration of the DNSSEC signer from Secure64 to Knot.
- Updating the APNIC Academy site to use Cloudflare.
- Deploying RDNS anycast nodes in Hong Kong, Mexico, Toronto, and London.
- Deploying a whois node in the KDDI data centre in Tokyo.
- Completing an upgrade of the secured centralized logging system to an open-source log collector for each host to send logs via secure TLS channels.
- Completing the upgrade of the on-premises Kubernetes test cluster, virtual machine environment hosts, and management server.
- Replacing aging network storage with two new high performance storage arrays to two separate data centres.
- Reconfiguring the new Hardware Security Module (HSM) to provide high availability service to RPKI, allowing data centre failover.
- Upgrading the community mailing list interface to Mailman 3 to support all external mailing list services.

Core system uptime	
FTP	100%
MyAPNIC	99.99%
RDNS	100%
RDNS DNSSEC Validity	100%
Whois	99.99%
RPKI	99.99%
RDAP	99.99%

Average data centre bandwidth usage (Mbps)	
AU edge inbound	99.3
AU edge outbound	280
JP edge inbound	21.9
JP edge outbound	65

Average query rates (per second)	
Whois	430
RDAP	92
RDNS	18,600
RPKI (RSYNC and RRDP)	99.10
FTP	2.47
MyAPNIC	0.53

5A. Internal Technical Infrastructure – continued

5A.4. Internal security operations

The Vulnerability Reporting Program generated 52 unique and verified vulnerability reports from external security researchers in 2021. Forty vulnerabilities were resolved, with seven still in progress within the 90-day period. Unresolved vulnerabilities outside of the 90 days are being addressed as part of larger upgrade projects.

HackerOne was selected to perform triage of newly reported vulnerabilities and continuous penetration testing to replace single annual tests commissioned in previous years.

Rapid7 was deployed on workstations, servers and network equipment for vulnerability scanning and Security Information and Event Management (SIEM).

The Acceptable Use and Bring Your Own Device policies were reviewed and updated. Online fraud training was completed with finance and services staff.

Policies and procedures that align with ISO 27001 were updated, and a gap analysis conducted in November indicated APNIC is ready to seek certification in 2022.

5A.5. Enterprise application management

New contract management software, device management systems, and CRM backup technology was implemented.

The APNIC office telephone system was migrated to Zoom phone and Zoom Room technology was deployed to meeting rooms.

5A. Internal Technical Infrastructure – continued

SUCCESS MEASURES – 5A

Targets	Results	Status
Complete review of testing environment and practices	Done	🟢
Complete quarterly data centre failover tests	4 out of 4 completed	🟢
Maintain availability of 99.99% for critical APNIC services and 99.95% for less-critical services	99.99% and 99.98%	🟢
Develop strategy for cloud and interconnection	Draft completed	🟢
Complete service migration to cloud for six services/websites	Completed	🟢
Achieve readiness for ISO27001 certification	Gap analysis completed	🟢
Track and resolve all vulnerability reports within 90 days	40 out of 52 reports resolved (7 in progress, 5 missed target)	🟠
CRM roadmap established	Completed	🟢

5A. Internal Technical Infrastructure – continued

INVESTMENTS

5A.6. Product platform development →|

A new Single Sign-On (SSO) architecture to cover all online services was developed during 2021. Deployment was deferred from December to March 2022 to avoid disruption to APRICOT registration.

2021 Investment	Member Benefit
Further development of infrastructure and services platforms common to APNIC products to streamline product development, integration and consistency	Standardized user experience across products. Faster access to new products and services. Improved maintenance of online infrastructure to reduce operational risk.

Status: **Ongoing**

5B. Finance and Business Services

OPERATIONS

5B.1. Knowledge management

A new staff intranet was launched in December.

5B.2. Financial services

Monthly forecasting was initiated to track income and expenses to identify variations to budget caused by COVID-19 restrictions.

New accounting procedures were developed to manage APNIC Foundation-funded projects, with implementation support provided to the Foundation for its new ERP system.

The annual audit of the 2020 financial accounts was completed by Deloitte and presented to the EC at APNIC 51.

5B.3. Business services

An external surveillance audit of APNIC's ISO9001:2016 quality management system was completed successfully in August.

A project to digitize legacy paper membership forms was completed at the end of March to improve access for services and finance teams.

RESOURCING

	Budget	Actual
FTE	10.14	11.45
Expenses	2,207,847	2,353,479
CAPEX	30,000	9,244

5B. **Finance and Business Services** – continued

5B.4. Data governance and business intelligence

Reporting functions in APNIC's legacy business intelligence system (O3) were replicated into a new system based on Tableau. Additional software platforms were also implemented to improve the production of charts.

Development of an APNIC-wide data model and data dictionary is underway and scheduled for completion in 2022.

Data warehouse methodologies and tools were investigated and tested, with a priority on scaling and compatibility with industry standards. Basic membership and resource details were loaded into the data warehouse and transformed for Tableau visualizations.

5B. Finance and Business Services – continued

SUCCESS MEASURES – 5B

Targets	Results	Status
Successful implementation of internal knowledge management tools with increased user satisfaction and experience	Completed	🟢
Achieve a successful audit of APNIC's annual financial accounts	Completed	🟢
Complete annual ISO Quality management compliance audit successfully	Completed	🟢
Undertake quarterly BCP scenario testing	Completed	🟢
Complete APNIC-wide data model and data dictionary	70% complete	🔴
Generate all Secretariat report data/charts from BI system	20% complete	🔴

5C. Employee Experience

OPERATIONS

5C.1. Organizational development

The executive and leadership teams participated in a regular leadership webinar program provided by external coaches.

A new goal setting process was established to clearly link individual goals to organizational goals and improve goal progress monitoring.

A monthly agile leaders forum was created for continuous learning and development.

5C.2. Work environment management

With COVID-19 restrictions changing regularly, a hybrid working environment of office access and work from home arrangements was maintained.

An updated travel health policy was developed to encompass COVID health risks and insurance implications.

RESOURCING

	Budget	Actual
FTE	4.65	5.69
Expenses	1,945,989	2,137,539
CAPEX	2,160,000	0

5C. **Employee Experience** – continued

5C.3. Talent attraction and retention

Twenty permanent roles (including two new Directors for the Services and Finance areas) and five casual roles were filled. Nine contractors and six Community Trainers were also engaged.

Support was provided to recruit four operations staff for the APNIC Foundation.

5C.4. People operations management

Hybrid working principles were developed for staff to combine remote and office work and maximize engagement and effectiveness.

Emergency leave was introduced for staff to access when childcare was impacted by COVID restrictions, and for COVID testing and vaccinations.

5C. **Employee Experience** – continued

SUCCESS MEASURES – 5C

Targets	Results	Status
Strategic goals clearly cascade to individual performance measures in performance management system in 2021	Completed	🟢
Deploy agile work practices across the organization	76% complete	🔴
No WHS incidents caused by APNIC's local or remote work environments — zero fault incident reports	3 incidents – none caused by APNIC	🟢
Maintain staff turnover rate within acceptable benchmarks of 5-15%	4.8 % turnover	🟢
Training budget is 100% allocated and distributed across the organization	50% spent	🔴
All HR policies, in particular, hybrid work, parental leave and travel safety policies, reflect best practice	Completed	🟢

5C. **Employee Experience** – continued

INVESTMENTS

5C.5. Agile APNIC ➡️|

Seventy-six percent of teams adopted appropriate Agile practices for the management of their work. The remaining teams will complete adoption by March 2022.

5C.6. People management portal ➡️|

Implementation of the Sage People human resources portal is in progress. The Core HR module was launched in September and Compensation Management was launched in December. Performance and Recruitment modules are undergoing UAT, for completion in January 2022.

5C.7. APNIC workspace remodelling ➡️|

An architectural and structural review of the current office building in South Brisbane indicated it could be extended to seat 140 staff, but at significant cost. It also concluded that significant capital improvement is not financially viable due to the limited future potential of the building itself.

APNIC staff reviewed several alternative office locations, for a potential relocation within two to three years.

A study of the current workspace use was completed to assist with short-term remodelling that may be undertaken, as well as longer term requirements for alternative office location in future.

2021 Investment	Member Benefit
Agile APNIC	A focus on continuously improving operations and performance.
Status: **Ongoing**	
People management portal	Improved reporting on HR analytics. Reduced HR administration to focus instead on improvement initiatives.
Status: **Ongoing**	
APNIC workspace remodelling	Improved organizational flexibility and productivity. Allows full benefits of a distributed workforce.
Status: **Ongoing**	

5D. Governance

OPERATIONS

5D.1. Executive Council (EC) support

Feng Leng was elected to the APNIC EC for the first time at APNIC 51, with Gaurab Raj Upadhaya, Kenny Huang, and Yoshinobu Matsuzaki re-elected to the EC, for two-year terms.

Four EC meetings were held. The Annual EC satisfaction survey indicated a high level of satisfaction with the support provided by the APNIC Secretariat.

5D.2. Corporate governance and legal

The Strategic Risk Register was maintained and presented to the EC quarterly for review.

RESOURCING

	Budget	Actual
FTE	2.76	1.96
Expenses	1,133,807	1,065,271
CAPEX	-	-

5D. Governance – continued

SUCCESS MEASURES – 5D

Targets	Results	Status
Achieve a high level of satisfaction from a survey of EC members	Completed	●
Quarterly Strategic Risk Register updated and reviewed	Completed	●

APNIC

addressing the Internet in the Asia Pacific

2022
Activity Plan and Budget

Contents

Introduction

This document explains APNIC's 2022 Activity Plan and Budget, for the information of APNIC Members and the wider community.

Under the Four Year Strategic Direction (2020-2023), adopted by the APNIC EC on 3 December 2019, activity is structured under five pillars and 18 workstreams, aligned with APNIC's Vision and Mission.

The five pillars are:

Membership	Registry	Development	Information	Capability

The 2022 Activity Plan and Budget describes activities according to the same structure; and provides under each workstream the activities that are planned for 2022, along with budget allocations.

Feedback on the 2022 Activity Plan and Budget is welcome. If you would like to comment, please contact the APNIC Executive Council (EC).

Annual Planning Process

The APNIC EC and Secretariat receive input from the community through the biennial survey (**apnic.net/survey**), APNIC conferences, and other interactions. These inputs guide APNIC's strategy and annual planning, and the Secretariat reports progress on its activities back to the community during the year.

APNIC

Strategic Pillars

The Four Year Strategic Direction (2020-2023) defines five 'pillars' of APNIC activity.

1. MEMBERSHIP

Develop and deliver world-class products and services required by APNIC Members

Engage with Members in building a global, open, stable and secure Internet

Ensure accountable governance of APNIC as a membership organization

2. REGISTRY

Develop and deliver world class registry products and services required by the community

Ensure responsible stewardship of Internet number resources and deliver accurate registry services

3. DEVELOPMENT

Invest in sustainable development of the regional Internet community, industry and infrastructure

Build capacity for best-practice Internet operations across the Internet technical community

4. INFORMATION

Support Internet development with needed network information services, and research outcomes which are of demonstrated value to the community

5. CAPABILITY

Provide stable and secure technical infrastructure to support APNIC operations and services

Develop a strong service culture driven by people committed to APNIC's vision and values

Sustain a healthy and resilient organization

APNIC Workstreams

The Four Year Strategic Direction (2020-2023) defines 18 workstreams, across the five pillars, as follows. Each workstream includes a number of activities that are described in this plan.

1. MEMBERSHIP

1A. MEMBER SERVICES
Deliver excellence in service and value to Members through active and quality engagement.

1B. MEMBERSHIP PRODUCTS
Apply best practice in development of membership products that meet Members' needs and exceed their expectations.

1C. MEMBERSHIP REPORTING
Ensure that APNIC remains fully accountable to its Members by providing timely and accurate information about APNIC operations.

2. REGISTRY

2A. REGISTRATION SERVICES
Provide delegation and registration services for Internet numbers (ASNs, IPv4, IPv6) according to community developed policies.

2B. REGISTRY PRODUCTS
Maintain an accurate number registry and reliable registry services.

2C. POLICY DEVELOPMENT
Facilitate the open Policy Development Process to ensure resource policies in the APNIC region are developed and implemented in a neutral manner consistent with agreed rules and community expectations.

3. DEVELOPMENT

3A. APNIC CONFERENCES
Deliver engaging and relevant APNIC conferences for learning, sharing ideas and experience, professional networking, and Internet policy development.

3B. FOUNDATION SUPPORT
Provide operational support to ensure the success of the APNIC Foundation.

3C. COMMUNITY ENGAGEMENT
Build and maintain close and meaningful relationships between APNIC and its various communities.

3D. COMMUNITY PARTICIPATION
Encourage awareness, diversity, participation, and leadership in APNIC processes, events, and activities.

3E. APNIC ACADEMY
Scale up training and technical assistance infrastructure with high-quality training content and curriculum.

3F. INTERNET INFRASTRUCTURE SUPPORT
Promote and support the deployment of critical Internet infrastructure and deploy tools for operational infrastructure monitoring.

4. INFORMATION

4A. INFORMATION PRODUCTS
Provide meaningful information services to the communities APNIC serves.

4B. RESEARCH AND ANALYSIS
Analyse the pressures shaping the evolution and future demands of Internet names and numbers infrastructure, and their impacts.

5. CAPABILITY

5A. INTERNAL TECHNICAL INFRASTRUCTURE
Provide stable and secure technical infrastructure to support APNIC operations and services.

5B. FINANCE AND BUSINESS SERVICES
Provide efficient and robust finance and business services and facilities to effectively support APNIC's operations.

5C. EMPLOYEE EXPERIENCE
Attract, develop and retain talented, service-oriented people to deliver APNIC's mission and exceed organization and community expectations.

5D. GOVERNANCE
Provide the legal, economic and governance framework and professional services to support APNIC's operations to minimize risk and ensure compliance and continuity.

2022 Focus Areas

APNIC's 'Focus Areas' are defined each year in response to emerging needs and priorities that require particular efforts in the short term. The Focus Areas do not change the pillars or workstreams of the Four Year Strategic Direction, but they do indicate where focused efforts will be made, normally across multiple workstreams and activities, during the coming year.

SECURITY, INTEGRITY AND RESILIENCE	NEXT GENERATION REGISTRY	CONNECTED ONLINE COMMUNITY	CAPACITY FOR DEVELOPMENT
Improving security processes and hardening systems	Redesigning the registry to take advantage of new technologies and service the new requirements of Internet number resource and registry services	Growing connections with Members and the community online via online products and services	'Right-sizing' APNIC resources to respond to growing demands for Internet development and capacity building
Improving systems integration and information integrity		Greater uptake of online engagement tools facilitating two-way conversations	
Developing organizational resilience and new ways of working	Developing APIs for improved integration and automation		Designing and delivering services where they are most needed
Strengthening the RIR system	Improving RPKI, RDAP and other critical registry products	Taking an 'online-first' approach for improved participation across the APNIC region	

2022 Activity Summary

The following table and chart provide a breakdown of APNIC's 2022 budget by pillar and OPEX category (Operations or Investments). The chart on the following page illustrates the budget breakdown by workstream. Activities funded by the APNIC Foundation are detailed in Appendix D.

2022 ACTIVITY BUDGET (AUD)

	PILLAR	PY		OPEX (AUD)				CAPEX (AUD)	
				Operations	Investments	Total OPEX			
1	Membership	24.93	20%	4,642,934	866,307	5,509,241	16%	-	0%
2	Registry	15.16	12%	3,054,168	911,507	3,965,675	12%	230,000	16%
3	Development	34.60	28%	7,884,106	3,326,709	11,210,815	33%	128,000	9%
4	Information	9.74	8%	2,246,293	289,387	2,535,680	8%	123,000	8%
5	Capability	37.78	31%	9,527,591	1,015,409	10,543,000	31%	988,300	67%
	Grand Total	**122.21**	**100%**	**27,355,092**	**6,409,319**	**33,764,411**	**100%**	**1,469,300**	**100%**

2022 Budget Funding Distribution ■ Operations ☐ Investments ▨ Foundation Funded Activities

Membership

Registry

Development

Information

Capability

2022 Budget OPEX Distribution (AUD)

Notes on the Activities

APNIC's activities are outlined in this document under the five pillars and 18 workstreams described in the previous section. Workstreams are numbered within the pillar they belong to, and activities are then numbered within each workstream. For instance, the activity "2B.4 Registry rearchitecture" is the 4th activity in the 2nd workstream (2B. Registry Products) of the 2nd pillar (2. Registry).

The activities are described as either 'Operations' or 'Investments'.

'Operations' includes all ongoing activities required for continued provision of current APNIC services.

'Investments' are project activities that result in new or improved products or services. In some cases where Investment activities are funded by the APNIC Foundation (rather than Member funds), this is clearly noted.

Please refer to the online **APNIC Glossary** for further explanation of terms used in this document.

For each workstream in this report, a table summarizes the resources (financial and human) needed to successfully complete all operational and investment activities. All monetary figures quoted are in Australian Dollars (AUD).

	1 PY	**2** OPEX	**3** CAPEX
Operations	12.17	2,778,994	-
Investments	2.50	210,130	-
Workstream total	**14.67**	**2,989,124**	-

1 PY: A 'person year', representing the amount of work done by one full-time staff member in one year. Most activities incur a staffing cost, expressed in PY, and in most cases, this comprises contributions from multiple employees. For example: a PY value of 1.6 may be made up of four employees who each contribute 40% of their time for a period of one year (0.4 PY). The detailed account of these allocations is provided in Appendix B 'Person Year Distribution'.

2 OPEX: Refers to all operational costs directly incurred by the activity (in AUD).

3 CAPEX: Provides the provision for capital expenditure required by the activity (in AUD).

1. MEMBERSHIP

OBJECTIVES

- Develop and deliver world-class products and services required by APNIC Members

- Engage with Members in building a global, open, stable and secure Internet

- Ensure accountable governance of APNIC as a membership organization

WORKSTREAMS

1A. Member Services
1B. Membership Products
1C. Membership Reporting

1A. Member Services

Deliver excellence in service and value to Members through active and quality engagement.

OPERATIONS

1A.1. Member service delivery

Objective	Activities	Success Indicators
Deliver excellence in service to APNIC Members.	Provide proactive and reactive support to Members (including NIRs) using APNIC products and services, including maintaining an accessible Helpdesk. Regular engagement with NIRs for alignment of service delivery and registry consistency.	1. Increase Member outreach touchpoints by at least 20% from 148 in 2021. 2. Maintain Helpdesk SLA of two business day response to enquiries. 3. Maintain Member Service satisfaction of at least 93% "excellent and above average". 4. Proactive Member service engagement in at least 47 economies. 5. Conduct quarterly meetings with all NIRs.

	PY	OPEX	CAPEX
Operations	12.17	2,778,994	-
Investments	2.50	210,130	-
Workstream total	**14.67**	**2,989,124**	**-**

1A. Member Services - continued

1A.2. Member experience

Objective	Activities	Success Indicators
Members and the community enjoy a positive user experience and can easily provide feedback across all APNIC products and services.	Capture, analyse and action feedback provided by Members and the community on APNIC products and services, including maintaining a User Feedback Group. Conduct user research and testing to identify potential online usability improvements.	1. 100% of improvement suggestions are assessed and followed up. 2. Increase engagement with User Feedback Group by at least 20% from 298 in 2021. 3. Achieve online System Usability Scale (SUS) score of 68/100.

1A.3. Membership development

Objective	Activities	Success Indicators
Ensure organizations that may need APNIC products and services can discover and access them easily.	Increase awareness of APNIC membership, products and services in economies with low membership relative to their Internet growth potential.	1. At least eight membership development activities in target economies. 2. Achieve at least 492 new Members (net) in 2022.

1A. Member Services - continued

1A.4. APNIC Survey

Objective	Activities	Success Indicators
Update understanding of Member and community needs, and how APNIC can best serve them.	Conduct the APNIC Member and stakeholder survey in 2022, to gather important information on issues affecting Members and the wider community. In 2022, the survey model will be expanded to try to reach those who engage less often with APNIC.	1. Increase total survey response by at least 10% from 1,624 in 2020. 2. Achieve at least 10% of responses by new survey participants.

1A. Member Services - continued

INVESTMENTS

1A.5. Historical resources transition ⬆

Objective	Activities	Success Indicators
Prepare for transition to new fee structure for Historical Resources from 1 Jan 2023.	Identify and contact historical resource holders and migrate them to APNIC account holders. Deregister resources of uncontactable historical holders. Complete processing of unused historical resources as per prop-017.	1. Attempt contact with all 1,900 historical resource holders. 2. All 3,778 historical resource objects are either registered to a current APNIC account or deregistered. 3. All remaining unused resources are claimed, transferred, or returned to APNIC.

1B. Membership Products

Apply best practice in development of membership products that meet Members' needs and exceed their expectations.

OPERATIONS

1B.1. Membership product management 🔄

Objective	Activities	Success Indicators
Provide products and services that make it easier for APNIC Members to manage their accounts.	Operate and maintain APNIC Membership Products, including: MyAPNIC, online forms, online election platform and Member help and support systems. Complete SSO migration to Okta.	1. Maintain MyAPNIC availability of at least 99.99%. 2. Achieve Membership Products satisfaction of at least 80%.

Workstream total	**9.40**	**1,844,666**	**-**

1B. Membership Products – continued

INVESTMENTS

1B.2. Membership product development

Objective	Activities	Success Indicators
Develop and improve products and services that make it easier for APNIC Members to manage their accounts.	Ongoing development of Membership Products according to APNIC's Product Management framework.	1. Achieve all 2022 goals, according to the Membership Products Roadmap.

Roadmap goals

● Add automated workflow to support the HRM initiative

● Improve the quality and workflow of "Invalid Contact" reports

● Overhaul MyAPNIC information architecture

● Improve MyAPNIC contact management

● Implement a new MyAPNIC dashboard

● Improve MyAPNIC audit and activity logs for corporate contacts

● Improve voting eligibility checks

● Implement a new EDUROAM API

● Develop and internal LDC graduation process

● Automatically Link Eligible contacts to MyAPNIC

1C. Membership Reporting

Ensure that APNIC remains fully accountable to its Members by providing timely and accurate information about APNIC operations.

OPERATIONS

1C.1. Planning and reporting

Objective	Activities	Success Indicators
Ensure that APNIC remains fully accountable to its Members by providing timely, complete and accurate information about all activities.	Develop and publish APNIC's 2022 Activity Plan and Budget, 2021 Annual Report, and other reports to the community, as required.	1. Publish required reports on the day of the APNIC Member Meetings. 2. Publish EC Minutes within two months of each EC meeting.

	PY	OPEX	CAPEX
Operations	0.87	675,471	-
Investments	-	-	-
Workstream total	**0.87**	**675,451**	**-**

2. REGISTRY

OBJECTIVES

- Develop and deliver world class registry products and services required by the community

- Ensure responsible stewardship of Internet number resources and deliver accurate registry services

WORKSTREAMS

2A. Registration Services
2B. Registry Products
2C. Policy Development

2A. Registration Services

Provide delegation and registration services for Internet numbers (ASNs, IPv4, IPv6) according to the community developed policies.

OPERATIONS

2A.1. IPv4, IPv6 and ASN delegation and registration services

Objective	Activities	Success Indicators
Provide IPv4, IPv6 and ASN delegation and registration services to APNIC Members	Provide delegation and registration services for Internet numbers according to current policies. In 2021, APNIC processed 5,662 resource delegations and transfer requests. It is assumed that this activity will continue at a similar level in 2022.	1. Maintain Registration Services SLA of two business day response to enquiries. 2. Increase percentage of Members holding IPv6 address space to at least 70% from 68%.

	PY	OPEX	CAPEX
Operations	5.11	772,183	-
Investments	-	-	-
Workstream total	**5.11**	**772,183**	**-**

2A. **Registration Services** – continued

2A.2. Maintain correct and current registry data ⟳

Objective	Activities	Success Indicators
Ensure registry data is comprehensive, current and correct.	Encourage Members to improve and maintain accuracy and currency of their registry data. Implement NRO-defined Identifier Technology Health Indicators (ITHI) reporting.	1. Comply with ITHI reporting requirements. 2. Increase validation of registration records to at least 85% from 76%.

2B. Registry Products

Maintain an accurate number registry and reliable registry services.

OPERATIONS

2B.1. Internet Number Registry Management

Objective	Activities	Success Indicators
Register address space allocations and assignments to ensure uniqueness and provide information for Internet troubleshooting at all levels.	Operate and manage an accurate and stable public number registry service.	1. Maintain APNIC Registry Management System (ARMS) availability of at least 99.99%.

2B.2. Registry Product Management

Objective	Activities	Success Indicators
Provide essential registry products and services to help network operators maintain a secure, available and stable Internet.	Operate and maintain APNIC Registry Products including whois, RDAP, RPKI, RDNS and IRR. This includes participation in related IETF standardization work.	1. Maintain whois, RDAP, RPKI, RDNS and IRR availability of at least 99.99%. 2. Update APNIC RDAP to comply with the RIR RDAP profile. 3. Migrate RDNS API services to CentOS 7.

	PY	OPEX	CAPEX
Operations	4.55	1,701,104	-
Investments	4.75	911,507	230,000
Workstream total	**9.30**	**2,612,611**	**230,000**

2B. Registry Products – continued

INVESTMENTS

2B.3. Registry product development

Objective	Activities	Success Indicators
Develop and improve essential registry products and services.	Ongoing development of Registry Products according to APNIC's Product Management framework.	1. Achieve all 2022 goals, according to the Registry Products Roadmap.

Roadmap goals

- Pre-validate all RPKI changes to avoid errors

- Update authorization mechanisms for whois

- Improve ASN delegation identity in whois and MyAPNIC

- Improve ROA deletion and recreation process for transfers.

2B. Registry Products – continued

2B.4. Registry re-architecture

Objective	Activities	Success Indicators
Improve security, reliability, and efficiency of the APNIC registry, and facilitate easier development of future registry services and functions required by the community.	Rearchitect APNIC's registry database and management systems to increase automation, stability, and support a more diverse range of registry services, including a Member API. This is a multi-year development project.	1. Progress development of a Member API with a completion target of 2023. 2. Progress reimplementation of the internal registry in Java with a completion target of 2023. For more information, see the Registry Products Roadmap.

2B.5. Readiness for Five-9s Availability for Highly Critical Services

|		
Define 'highly critical services' and prepare for 99.999% availability for these services.	Perform a gap analysis and develop an implementation plan, including infrastructure and operations upgrades, review of software architecture, and process improvements in software development and IT operations.	1. Achieve readiness to implement by end of 2022.

2C. Policy Development

Facilitate the open Policy Development Process (PDP) to ensure resource policies in the APNIC region are developed and implemented in a neutral manner consistent with agreed processes and community expectations.

OPERATIONS

2C.1. Policy development

Objective	Activities	Success Indicators
Ensure resource policies in the APNIC region are developed in line with the community-agreed PDP.	PDP facilitation including support for: • Two Policy SIG meetings, inter-sessional policy meetings, mailing lists and APNIC's online collaboration spaces • Exchange of policy-related information with other RIRs • Support ASO Address Council Members and processes in the APNIC region • Engage and cooperate with NIRs on policy matters	1. Achieve SIG Chair Support satisfaction of at least 6/7. 2. Achieve PDP satisfaction of at least 5.75/7 in the APNIC Survey. 3. Participate in all NIR OPMs.

	PY	OPEX	CAPEX
Operations	0.75	580,881	-
Investments	-	-	-
Workstream total	0.75	580,881	-

2C. Policy Development - continued

2C.2. Policy implementation

Objective	Activities	Success Indicators
Implement APNIC resource policies in a neutral manner consistent with agreed processes, timings and community expectations.	Initiate and coordinate the implementation of approved resource policies to agreed community deadlines.	1. Meet 100% of policy implementation timelines.

2C.3. Policy analysis

Objective	Activities	Success Indicators
Provide neutral policy advice and impact analysis to help the APNIC community make informed policy decisions.	Analyse the impact of policy proposals on registry operations; identify areas where policy change may be considered; and contribute to policy discussions as appropriate.	1. Publish a policy proposal analysis before each Open Policy Meeting (OPM).

3. DEVELOPMENT

OBJECTIVES

- Invest in sustainable development of the regional Internet community, industry and infrastructure

- Build capacity for best-practice Internet operations across the Internet technical community

WORKSTREAMS

3A. APNIC Conferences
3B. Foundation Support
3C. Community Engagement
3D. Community Participation
3E. APNIC Academy
3F. Internet Infrastructure Support

3A. APNIC Conferences

Deliver engaging and relevant APNIC conferences for learning, sharing ideas and experience, professional networking, and Internet policy development.

OPERATIONS

3A.1. APNIC conferences

Objective	Activities	Success Indicators
Provide two conferences each year for the APNIC community to learn, share ideas and experience, build relationships, and develop Internet policy. • APRICOT 2022 is scheduled for 21 February – 3 March 2022. • APNIC 54 is scheduled for 7 – 15 September 2022.	Deliver well-organized, high-quality conferences with consistently interesting and relevant program content. Due to COVID restrictions, APRICOT 2022 will be a virtual event while APNIC 54 may include a face-to-face element. An 'online-first' approach will be taken for both conferences to ensure an inclusive user experience. The conference website infrastructure will be refreshed.	1. Achieve total attendance of at least 1,200 (face-to-face and online) across two conferences. 2. Achieve participant satisfaction of at least 90% at each conference. 3. Achieve Net Promoter Score of at least 50 at each conference.

	PY	OPEX	CAPEX
Operations	4.15	1,288,628	43,000
Investments	-	-	-
Workstream total	**4.15**	**1,288,628**	**43,000**

3B. Foundation Support

Provide operational support to ensure the success of the APNIC Foundation.

INVESTMENTS

3B.1. Foundation support

Objective	Activities	Success Indicators
Provide support to the Foundation, in accordance with the AoC of 2018, as its operations mature and evolve.	Provide administrative and operational support including: • Up to a total of 1.31 Person Years in operational support • Enterprise systems access and support • Office space, equipment and online systems support as required	N/A

|	PY	OPEX	CAPEX
Operations	-	-	-
Investments	1.31	264,777	-
Workstream total	1.31	264,777	-

3C. Community Engagement

Build and maintain close and meaningful relationships between APNIC and its various communities.

OPERATIONS

3C.1. Technical community support

Objective	Activities	Success Indicators
Participate in, and encourage the development of, a healthy Asia Pacific technical community.	Support NOGs, IXPs, Peering Forums and REN community activities, through participation, content and/or sponsorship. Support NOGs to conduct online events if physical events are not possible.	1. Support at least 30 technical community events (opportunity permitting). 2. Support at least one new/revived NOG in two sub-regions (if required).

	PY	OPEX	CAPEX
Operations	4.71	1,692,291	-
Investments	-	-	-
Workstream total	**4.71**	**1,692,291**	**-**

3C. Community Engagement – continued

3C.2. Security community support

Objective	Activities	Success Indicators
Increase collaboration and build trust with the security community, and increase awareness around relevant security issues.	Support security community events, through participation, content and/or sponsorship. Support CERTs/CSIRTs with technical assistance. Host high quality security content at APNIC conferences.	1. Support at least 12 security community events (opportunity permitting). 2. Support development of at least four new or existing CERTs/CSIRTs (if needed). 3. Organize quarterly threat sharing community events.

3C.3. Internet organization cooperation

Seek opportunities to strengthen collaboration with other regional and global Internet organizations.	Participate in meetings and joint initiatives with Internet organizations including the NRO, RIRs, ICANN, IETF, ISOC and others. In 2022, undertake responsibilities as Chair of the NRO EC and coordination groups, and represent the NRO as necessary.	1. Ensure APNIC is represented in all NRO EC and 'I-star' coordination meetings. 2. Participate in all RIR Open Policy Meetings.

3C. Community Engagement – continued

3C.4. Internet governance participation

Objective	Activities	Success Indicators
Engage the community to strengthen open, multistakeholder, bottom-up and transparent Internet governance processes.	Support national, regional and global Internet governance events including the IGF, APrIGF, national IGF and schools of Internet governance, through participation, content and/or sponsorship. Represent the NRO, in the capacity of NRO Chair, as needed in Internet governance events.	1. Organize at least three workshop proposals at APrIGF 2022. 2. Support at least five national or sub-regional Internet governance events.

3C. Community Engagement – continued

3C.5. Government engagement

Objective	Activities	Success Indicators
Build and maintain meaningful relationships between APNIC and government and public safety agencies in the region.	Participate in inter-governmental forums such as the ITU, APT and APEC TEL, and engage with other relevant government and public safety agencies in the region. Follow global ITU conferences: WTSA, WTDC and the Plenipotentiary, as well as their regional preparatory processes.	1. Participate in at least 12 governmental or inter-governmental engagements. 2. Support at least three governmental capacity-building events.

3C. Community Engagement – continued

3C.6. External Relations coordination

| Objective	Activities	Success Indicators
Build institutional knowledge of APNIC's relationships with Members and other stakeholders, and improve value and outcomes of engagement activities.	Coordinate APNIC's External Relations (ER) activities across all stakeholder segments and sub-regions. Maintain the APNIC CRM including records of ER contacts, touchpoints, events and engagements. Support the ER team with administration, systems, and professional development.	1. Increase ER touchpoints by at least 5% from 456 in 2021. 2. Achieve at least 250 APNIC engagements in 2022.

3D. Community Participation

Encourage awareness, diversity, participation, and leadership in APNIC processes, events, and activities.

OPERATIONS

3D.1. Community-led processes

Objective	Activities	Success Indicators
Increase awareness and participation in APNIC community-led processes including the PDP, SIGs (Policy, Cooperation, NIR, Routing Security), Working Groups, and BoFs.	Promote participation in community-led processes via APNIC's communication channels, community engagement, training and outreach, active facilitation, and supporting development of the community platform (**see 3D.4**).	1. Achieve at least 850 online SIG participants across two conferences. 2. Achieve at least 120 online participants across at least four inter-sessional SIG meetings. 3. Achieve SIG satisfaction of at least 5.8/7 in the APNIC Survey.

	PY	OPEX	CAPEX
Operations	1.45	289,666	-
Investments	0.50	146,651	-
Workstream total	**1.95**	**436,317**	**-**

3D. Community Participation - continued

3D.2. Online Participation

Objective	Activities	Success Indicators
Encourage community development online and help Members and the community benefit from APNIC's available online resources.	Promote APNIC's online platforms, products, services and activities – via online and offline communication channels and engagements – to increase awareness, encourage greater usage and online participation.	1. Achieve at least 500 registered users of the APNIC community platform.

3D.3. Encouraging newcomers and diversity

Objective	Activities	Success Indicators
Encourage new and continuing participants from diverse backgrounds in the APNIC community – both online and face-to-face – particularly the next generation of network engineers.	Create and highlight opportunities for new and diverse participants to take part in APNIC community activities. Provide a six-month fellowship program to build understanding of APNIC and core operational concepts, professional networking, and ongoing participation in community activities.	1. Attract at least 400 newcomers to APNIC conferences. 2. Achieve at least 50% female and 30% youth participation in 2022 Fellowships. 3. Achieve a fellowship graduation rate of at least 80%. 4. Achieve a fellowship program NPS of at least 80.

3D. Community Participation - continued

INVESTMENTS

3D.4. Online community platform

Objective	Activities	Success Indicators
Encourage an active, connected APNIC community engaging on an integrated online community platform.	Finalize the technology platform and functionality of the online community platform. Launch a minimum viable product (MVP), including integration of APNIC mailing lists.	1. Achieve at least 500 registered users of the platform.

3E. APNIC Academy

Scale up training and technical assistance infrastructure with high-quality training content and curriculum.
OPERATIONS

3E.1. Academy product management [Foundation funded (partial) – see Appendix D]

Objective	Activities	Success Indicators
Maintain high-quality training assets to build capacity in the region.	Maintain APNIC Academy curriculum (both instructor-led and self-paced content) and the online learning platform.	1. Maintain Academy platform availability of at least 99.95%. 2. Achieve a rating of at least 6.00 for APNIC training in the APNIC Survey.

3E.2. Instructor-led training [Foundation funded (partial) – see Appendix D]

Increase knowledge and skills in the community via instructor-led training.	Deliver instructor-led training around the APNIC region (face-to-face, online or hybrid) focused on real-world deployment and best practices.	1. Conduct at least 100 instructor-led tutorials/ workshops. 2. Conduct at least 18 live webinars. 3. Achieve average training survey rating of 4/5.

	PY	OPEX	CAPEX
Operations	17.88	4,035,911	25,000
Investments	1.70	1,044,050	-
Workstream total	**19.58**	**5,079,961**	**25,000**

3E. APNIC Academy - continued

3E.3. Self-paced training [Foundation funded (partial) – see Appendix D]

Objective	Activities	Success Indicators
Increase knowledge and skills in the community via self-paced online training.	Provide on-demand, self-paced online courses and virtual labs via the APNIC Academy online platform. Raise awareness to increase usage in the region.	1. Increase total self-paced online course usage by at least 30% from 3,340 hours in 2021. 2. Increase total virtual lab usage by at least 20% from 6,902 hours in 2021. 3. Increase registered users of the APNIC Academy by at least 25% from 17,018 in 2021.

3E.4. Community Trainers network [Foundation funded – see Appendix D]

Expand the scope and effectiveness of APNIC Academy training to help meet increasing community demand for technical skills development.	Recruit, retain and develop more Community Trainers (CTs) locally and on the ground to deliver training across the region and remain active in their local NOGs and technical community.	1. Recruit at least 12 new retained CTs. 2. Recruit at least 10 new volunteering CTs.

3E. APNIC Academy - continued

3E.5. Technical assistance [Foundation funded (partial) – see Appendix D]

Objective	Activities	Success Indicators
Assist Members on adoption of best practices when implementing networking technologies.	Provide technical assistance and advice to Members both online via the APNIC Academy platform and face-to-face (travel permitting).	1. Respond to all technical assistance requests within seven days.

3E.6. RPKI awareness and deployment support [Foundation funded (partial) - see Appendix D]

Increase adoption of RPKI and routing security in the APNIC region.	Provide training and technical assistance on RPKI and ROV deployment, raise awareness and share best practice via presentations at relevant events, blog posts and online information.	1. Conduct at least two instructor-led RPKI/ROV tutorials/workshops per sub-region. 2. Achieve at least 90% ROA coverage for at least one additional economy per sub-region. 3. Publish at least three RPKI/ROV deployment case studies.

3E. APNIC Academy - continued

3E.7. IPv6 awareness and deployment support [Foundation funded (partial)
   - see Appendix D]

| Objective	Activities	Success Indicators
Encourage increased deployment of IPv6 in the APNIC region.	Provide training and technical assistance, and sharing of IPv6 best practices, information resources and case studies.	1. Conduct at least two instructor-led IPv6 deployment tutorials/ workshops per sub-region. 2. Publish at least two IPv6 deployment case studies.

3E. APNIC Academy - continued

INVESTMENTS

3E.8. Academy product development [Foundation funded – see Appendix D]

Objective	Activities	Success Indicators
Continue developing high-quality training assets to build capacity in the region.	Ongoing development of Academy Products according to APNIC's Product Management framework.	1. Achieve all 2022 goals, according to the Academy Products Roadmap.

Roadmap goals

● Integrate with Salesforce for improved registration, case management and reporting

● Integrate with Okta for better account provisioning of eduroam, eduGAIN and social logins

● Establish a central repository of all training materials

● Migrate the Training Wiki into the APNIC Academy platform

● Improve mobile support for APNIC Academy and explore m-Learning/mobile app support

● Recruit a Certification Project Officer to initiate the design of a new APNIC Certification Program

3E. APNIC Academy - continued

3E.9. Curriculum for non-technical audiences [Foundation funded – see Appendix D]

| Objective	Activities	Success Indicators
Demystify how the Internet works to encourage active participation of non-technical audiences in Internet governance.	Continue development of a digital educational game (IPGO) that teaches Internet fundamentals through to first phase release.	1. Release phase 1 of IPGO by June 2022.

3F. Internet Infrastructure Support

Promote and support the deployment of critical Internet infrastructure and deploy tools for operational infrastructure monitoring.

OPERATIONS

3F.1. Internet infrastructure deployment [Foundation funded (partial) – see Appendix D]

Objective	Activities	Success Indicators
Improve the resilience and performance of the Internet in the region by expanding critical infrastructure deployment.	Support the deployment and management of IXPs, DNS anycast rootservers and ROV support, and deployment of anchors and probes for the RIPE Atlas program.	1. Support deployment of at least two new or upgraded IXPs. 2. Support at least four IXPs to deploy ROV. 3. Deploy at least four root servers per sub-region, including M-Root servers (**see 3F.3**). 4. Deploy or upgrade at least one RIPE Atlas anchor per sub-region.

	PY	OPEX	CAPEX
Operations	1.00	577,611	60,000
Investments	1.90	1,871,231	-
Workstream total	**2.90**	**2,448,842**	**60,000**

3F. Internet Infrastructure Support - continued

3F.2. Community Honeynet and Security Threat Sharing Platform [Foundation funded (partial) – see Appendix D]

Objective	Activities	Success Indicators
Increase visibility of security threats and vulnerabilities relevant to Members and the community and encourage information sharing to understand and manage threats.	Maintain and grow the APNIC Community Honeynet and Security Threat Sharing Platform, including engaging with partners to host sensors for the project. Provide data feeds to DASH and share research findings via events and the APNIC Blog.	1. Increase the number of honeypot sensors by at least 60% from 60 in 2021. 2. Increase the Community Honeynet and Security Threat Sharing Platform partners by at least 30% from 15 in 2021.

3F. Internet Infrastructure Support - continued

INVESTMENTS

3F.3. M-Root deployment support [Foundation funded – see Appendix D]

Objective	Activities	Success Indicators
Faster and more reliable DNS service in the APNIC region.	Deploy M-Root anycast instances, working in partnership with the WIDE Project and JPRS. High-volume or underserved locations will be preferred.	1. Complete 10 M-Root server deployments commenced in 2021. 2. Identify and prepare at least 15 additional M-Root server sites.

4. INFORMATION

OBJECTIVE

- Support Internet development with needed network information services and research outcomes that are of demonstrated value to the community

WORKSTREAMS

4A. Information Products
4B. Research and Analysis

4A. Information Products

Provide meaningful information services to the communities APNIC serves.

OPERATIONS

4A.1. APNIC Blog and Podcast

Objective	Activities	Success Indicators
Keep Members and the community informed with the latest news, opinions and research from APNIC and the wider community.	Maintain and grow the Blog's readership with engaging and informative content. Produce a fortnightly podcast ('PING') on the latest Internet research and trends.	1. Achieve average of at least 70,000 Blog views per month. 2. Maintain Blog Guest Post ratio between 45-65%. 3. Achieve at least 4,000 podcast listens. 4. Achieve a Blog satisfaction rating of at least 5.95/7 in the APNIC Survey.

	PY	OPEX	CAPEX
Operations	7.12	1,169,695	-
Investments	1.75	289,387	-
Workstream total	8.87	1,459,082	-

4A. Information Products - continued

4A.2. Information product management

Objective	Activities	Success Indicators
Provide meaningful and useful information services to Members and the community.	Operate and maintain APNIC Information Products: REx, NetOX and DASH.	1. Maintain Information Product availability of at least 99.95%. 2. Reach an average of 500 users per month of DASH, and 1,000 users per month of REx and NetOX. 3. Achieve a NPS of 60+ for all products. 4. Maintain a usability score of at least 4.5/5 for all products.

4A. Information Products - continued

INVESTMENTS

4A.3. Information product development

Objective	Activities	Success Indicators
Develop meaningful and useful information services for Members and the community.	Ongoing development of Information Products according to APNIC's Product Management framework.	1. Achieve all 2022 goals, according to the Information Products Roadmap.

Roadmap goals

● Expand REx to cover global RIR delegation data and global IPv6 data

● Add RPKI and DNSSEC measurement data to REx

● Provide non-ASN holders access to DASH

● Develop a common API and backend system to provide notifications as a service for APNIC products

● Add routing and suspicious traffic alerts to DASH

● Improve NetOX comparison tools

● Complete a joint APIX survey around a benchmarking service

4B. Research and Analysis

Analyse the pressures shaping the evolution and future demands of Internet names and numbers infrastructure, and their impacts.

OPERATIONS

4B.1. Conducting research and measurements

Objective	Activities	Success Indicators
Gain a greater understanding of technical issues, trends, and how the Internet operates.	Conduct research experiments on topics including IP addressing, routing, DNS and other critical Internet infrastructure matters.	1. See 4B.3.

4B.2. Research cooperation

Objective	Activities	Success Indicators
Collaborate and share resources to improve research outcomes and impacts.	Engage in research partnerships with other reputable organization such as Cloudflare, ICANN, RIPE NCC and others.	1. Undertake at least two significant cooperative research activities.

	PY	OPEX	CAPEX
Operations	0.87	1,076,598	123,000
Investments	-	-	-
Workstream total	0.87	1,076,598	123,000

4B. Research and Analysis - continued

4B.3. Sharing research outcomes

Objective	Activities	Success Indicators
Help Members make better informed decisions on their network operations.	Share research insights online and at selected events to raise awareness of issues and trends that may impact Internet operations and assist policy discussions.	1. Publish at least 12 articles or reports on resource outcomes. 2. Present at least twelve research presentations, including at least two at APNIC conferences.

5. CAPABILITY

OBJECTIVES

- Provide stable and secure technical infrastructure to support APNIC operations and services

- Develop a strong service culture driven by people committed to APNIC's vision and values

- Sustain a healthy and resilient organization

WORKSTREAMS

5A. Internal Technical Infrastructure
5B. Finance and Business Services
5C. Employee Experience
5D. Governance

5A. Internal Technical Infrastructure

Provide stable and secure technical infrastructure to support APNIC operations and services.

OPERATIONS

5A.1. Architecture and technical coordination

Objective	Activities	Success Indicators
Build efficiencies and reduce costs through use of a coordinated common infrastructure by multiple product teams.	Manage and improve APNIC's systems architecture for better integration and coordination of systems and business processes. Manage processes for technology selection, testing and deployment. Establish code repository health metrics to assess conformance with development policies. Update data model to document product team ownership of business entities to establish roles and responsibilities of APNIC datasets. Conduct architectural review of all new projects or major system changes.	1. Review technology recommendations once per quarter. 2. Report quarterly on architectural decisions and directions.

	PY	OPEX	CAPEX
Operations	14.86	3,460,495	550,800
Investments	1.95	606,144	10,000
Workstream total	**16.81**	**4,066,639**	**560,800**

5A. Internal Technical Infrastructure - continued

5A.2. Network and infrastructure operations

Objective	Activities	Success Indicators
Ensure high availability of APNIC's infrastructure.	Manage APNIC's data centre presence in the region, interconnections between the APNIC network and others via peering relationships, and maintain a 24x7 Incident Response Team.	1. Complete quarterly data centre failover and backup recovery tests. 2. Respond to all critical incidents within 20 minutes. 3. Maintain availability of at least 99.99% for critical APNIC services and at least 99.95% for less-critical services.

5A. Internal Technical Infrastructure - continued

5A.3. System and platform operations

Objective	Activities	Success Indicators
Support APNIC's public service delivery with reliable, secure and high-performance systems.	Replace the RPKI Hardware Security Module (HSM) and deploy more redundant HSMs. Prepare migration plan for CentOS. Deploy duplicate services behind fully redundant open source load balancers using high availability proxies for automatic application failover between data centres; at APNIC's new Singapore PoP; and on multiple redundant cloud providers.	1. Deploy additional Hardware Security Module (HSM) to High Availability (HA) group in multiple data centres. 2. Complete CentOS migration plan. 3. Deploy redundant load balancers.

5A. Internal Technical Infrastructure - continued

5A.4. Internal security operations

Objective	Activities	Success Indicators
Maintain strong internal security operations to appropriate standards of best practice in order to avoid service disruption and data loss.	Strengthen APNIC CSIRT to serve all incident response coordination needs. Implement effective vulnerability triage, mitigation and resolution relating to all APNIC systems and services. Implement measures including penetration testing, security drills, and other standard practices to strengthen security protection and management.	1. Achieve ISO27001 certification. 2. Mitigate all critical vulnerability reports within seven days and resolve within 30 days.

5A.5. Enterprise applications and IT support

Objective	Activities	Success Indicators
Provide secure and reliable enterprise technologies to support Secretariat operations.	Provide all required IT systems and platform support to all APNIC staff. Decommission remaining legacy systems, authentication and access methods.	1. Meet SLA of two business-day response for internal IT support.

5A. Internal Technical Infrastructure - continued

INVESTMENTS

5A.6. Security infrastructure upgrades

Objective	Activities	Success Indicators
Harden APNIC systems and security infrastructure to reduce security risks and protect Member information.	Improve infrastructure security and resilience of APNIC systems across areas including: • Email security • Server patch management • Privileged server access management • Server backup protection • Password management • Zero-trust network/server access.	1. Complete automation of patch management. 2. Complete email business rule deployment using standard best practice. 3. Implement improved user authentication and access management system.

5B. Finance and Business Services

Provide efficient and robust finance and business services and facilities to effectively support APNIC's operations.

OPERATIONS

5B.1. Internal knowledge management

Objective	Activities	Success Indicators
Maintain effective methods, structures and tools to retain and retrieve corporate information within APNIC.	Complete implementation of new intranet and knowledge management systems.

Develop and implement maintenance responsibilities and processes. | 1. Complete migration during Q1 2022. |

5B.2. Financial services

| Transparent and efficient management and reporting of APNIC's financial affairs. | Review banking arrangements, payment platforms and investment policy.

Renewal of APNIC's special tax ruling on mutuality of Member funds. | 1. Achieve a successful audit of APNIC's annual financial accounts. |

	PY	OPEX	CAPEX
Operations	11.69	2,620,950	40,000
Investments	0.40	314,226	-
Workstream total	12.09	2,935,176	40,000

5B. Finance and Business Services - continued

5B.3. Business services

Objective	Activities	Success Indicators
Effectively support Secretariat operations and travel.	Manage office facilities and administration to support an agile and eco-friendly working environment. Effectively manage travel processes to ensure travel is safe, efficient and economic.	1. Maintain all Office facilities to established annual schedule. 2. Audit travel requests and expense transactions for policy alignment.

5B.4. Business intelligence and data analytics

Objective	Activities	Success Indicators
Improved decision making from the increased availability and accessibility of relevant, cross-system information sources.	Establish a comprehensive business intelligence (BI) facility that integrates data from a range of systems to produce better analysis and consistent reporting.	1. 100% automation of monthly Secretariat reporting data/ charts from the BI system.

5B. **Finance and Business Services** - continued

INVESTMENTS

5B.5. Data management and governance

Objective	Activities	Success Indicators
Ensure availability of quality and accurate data to support decision making.	Develop and maintain organization-wide data model and data governance structure. Build a vendor neutral repository (data warehouse) of current and historical critical business data from registry, membership, Salesforce and NetSuite.	1. Data model and governance are documented and implemented. 2. Data ingestion system established and working effectively.

5C. Employee Experience

Attract, develop and retain talented, service-oriented people to deliver APNIC's Mission and exceed organization and community expectations.

OPERATIONS

5C.1. Organizational development

Objective	Activities	Success Indicators
Optimize internal capability, including improved processes, effective communication, and adaptation to organizational challenges.	Complete the implementation of APNIC's Agile framework across all APNIC teams.

Establish a dedicated Internal Communications function.

Implement new employee engagement survey techniques. | 1. Complete Agile adoption by end of Q2 2022.

2. Staff satisfaction ratings meet or exceed external benchmarks in 2022.

3. An internal communications specialist is appointed by end of Q2 2022. |

	PY	OPEX	CAPEX
Operations	6.69	2,665,907	100,000
Investments	0.50	95,039	287,500
Workstream total	7.19	2,760,946	387,500

5C. Employee Experience - continued

5C.2. Work environment management

Objective	Activities	Success Indicators
Ensure all places of work and workplace practices for APNIC staff (both the office and remote locations) are fit for purpose.	Assess office and remote/home working sites to ensure WHS compliance. Implement a Travel Health framework in response to pandemic risks. All staff complete annual compliance training.	1. Zero WHS incidents due to APNIC-controlled environmental factors. 2. All travellers meet travel safety requirements as per the Travel Health policy.

5C.3. Talent attraction and retention

Objective	Activities	Success Indicators
Attract and retain the best possible talent to deliver on APNIC's Vision and Mission.	Recruit and onboard staff (throughout the region) to fill vacancies.	1. Maintain staff turnover rate within benchmark of 5–15%. 2. Fill all open roles within 90 days from advertisement. 3. Every advertised vacancy has a minimum of four simultaneous candidate sources.

5C. Employee Experience - continued

5C.4. People operations management

Objective	Activities	Success Indicators
Ensure the employee value proposition and experience supports the attraction and retention of diverse and talented team members, and that policies and practices meet global standards.	Launch a comprehensive new people management portal. Review the current payroll system and process and implement improvements. Maintain and enhance workforce diversity and inclusion.	1. Complete deployment of all selected modules of the Sage People system. 2. Demonstrate reduced cost of HR administration platforms. 3. Payroll review completed by end of Q3 2022.

5C. Employee Experience - continued

INVESTMENTS

5C.5. APNIC workspace improvement

Objective	Activities	Success Indicators
Enhance collaborative working at the APNIC office and for remote employees.	Remodel Cordelia St premises to accommodate an increased workforce and better integrate with remote working and hybrid work practices. Deploy upgraded Zoom facilities to all meeting rooms. Replace traditional desk seating with multi-functional work hubs. Prepare for likely Secretariat relocation during 2024.	1. Complete all budgeted facility upgrades by end of Q3 2022.

5D. Governance

Provide the legal, economic and governance framework and professional services to support APNIC's operations to minimize risk, ensure compliance and continuity, and remain a socially and environmentally responsible organization.

OPERATIONS

5D.1. Executive Council (EC) support

Objective	Activities	Success Indicators
Facilitate EC processes and activities of the highest integrity.	Assist EC members to perform their roles, including onboarding, meeting support, travel management, administration and providing information as required.	1. Achieve a satisfaction rating of at least 6/7 from a survey of EC members.

	PY	OPEX	CAPEX
Operations	1.68	780,240	-
Investments	-	-	-
Workstream total	1.68	780,240	-

5D. Governance - continued

5D.2. Corporate governance and legal

Objective	Activities	Success Indicators
Mitigate legal risk in all APNIC activities.	Manage legal and organizational risk, contracts, provide corporate governance guidance, and legal cooperation with other organizations. A new business contract management system will be implemented in 2022, ensuring that all business contracts and contract renewals are fully managed.	1. Update Strategic Risk Register quarterly. 2. Achieve full ISO9001 quality management system recertification. 3. Undertake quarterly BCP scenario testing.

5D.3. Corporate social responsibility

Enhance APNIC's position as an environmentally and socially responsible organization.	Develop a structured program to coordinate APNIC's contributions to environmental and social causes.	1. Corporate social responsibility program developed and approved.

17:00	END of AGM	

Agenda Item 14
APNIC Foundation update

Foundation Update

EC meeting (On-line)

21 February 2022

Duncan Macintosh

Foundation CEO

Key Points

1 New Board candidates proposed

2 Board meets to finalise strategic plan

3 Funding update

4 2022 projects finalised

APNIC
FOUNDATION

Board nomination process and Foundation Board Q1 meeting

Board changes and nominations

[Confidential information redacted]

Board nominations

[Confidential information redacted]

Q1 Board meeting 29 January

- Concurrent meeting

- All Board members attended except Edward Tian

- Danish chaired

Q1 Board meeting 29 January

Agenda

1. CEO Report

2. 2022 Trust project update and agreement

Resolution:

The board resolved to request and to accept a grant from APIDT in the sum of approximately USD 14,357,603 to deliver the proposed projects tabled at this meeting; and to sign a grant agreement with APIDT in the form, or substantially in the form, of the draft grant agreement shared with the Board by email.

Q1 Board meeting 29 January

Agenda

1. 2022 budget update

2. 2022 Board meeting schedule

AFA update

❖ Announced on 24 December, a registered charity as of 1 January 2021 (backdated).

❖ AFA considered a <u>large charity</u> and must provide <u>an Information Statement on its activities and audited financial statements annually.</u> Some tax benefits (GST) but <u>no tax deductability on donations.</u>

❖ Regulated by the Australian Charities and Not-for-Profits Commission (ACNC) which has a range of governance standards, including responsibilities for Board members.

❖ Moving ahead, AFA will be the main operational Foundation.

Funding Update

Total funds received (all donors)

Year	AUD	USD
2017	407,000	309,328
2018	995,896	731,162
2019	329,783	402,207
2020	1,175,364	781,598
2021 (Trust 1st / 2nd tranche)	9,222,383	6,678,047
2022 (Trust grant agreement)	20,063,314	14,357,603
Total	**32,193,740**	**23,259,945**

ISIF Asia in brief

➢ **USD 1,820,000 in grants** to support **22 projects across 3 programs (Infrastructure, Inclusion and Knowledge)**

➢ **3 grant types:**

- 6 Impact Grants of USD 150,000 each

- 8 Scale-up Grants of USD 85,000 each

- 8 Small Grants of USD 30,000 each

➢ **16 economies supported**, with three supported for the first time (in green): India (4), Australia (3), Malaysia (2), Indonesia (2), Bangladesh, Cambodia, China, Laos, Micronesia, Myanmar, New Zealand, Papua New Guinea, Solomon Islands, Sri Lanka, The Philippines

APNIC
FOUNDATION

ISIF Asia – Infrastructure USD 435,000

Distant Curve Remote Area Telecommunications (150,000)	AU	Expand the Central Australian Desert Project to Serve the Indigenous Community of Nitjpurru (Pigeon Hole), Northern Territory
