Hello,

I am keen to understand voter participation at the recent EC / AGM election and I am hoping you can assist me.

I am keen to understand by economy what percentage of the members voted and also inside each economy what percentage and number of each membership size.

In the interests of transparency, I am looking to understand which sizes of members are voting by economy.

My suspicion is that for example in the AU market smaller ones are voting but the larger ones tend not to participate.
