

Member Fee Schedule

APNIC Document Identity

Title: APNIC Member Fee Schedule

| | |
|-------------------------------|--|
| Short Title: | Member-fee-schedule |
| Document ref: | APNIC-120 |
| Version: | 011 |
| Date of original publication: | 18 June 2009 |
| Date of this version: | 6 March 2026 |
| Review scheduled: | N/A |
| Obsoletes: | APNIC-120-v007 |
| Status: | ACTIVE |
| Comments: | APNIC-119-v002 was superseded by this document on 1 January 2011 |

1 Fee Schedule

| Service | Fee ¹ | Frequency | Notes and exceptions |
|---------------------------------|--|-------------------|--|
| Sign-up | AUD 500 | Once-off | Accounts established to only receive the following services are exempt from the Sign-up fee: <ul style="list-style-type: none"> • Critical infrastructure assignments • IXP assignments • Historical Resources² |
| Annual | <p>With <u>no</u> chargeable resources: AUD 500</p> <p>With chargeable resources: See Section 2</p> | Annual on renewal | <p>The following resources are excluded from the Annual Fee calculation:</p> <ul style="list-style-type: none"> • IPv4 and IPv6 Experimental Allocations • Historical Resources • Autonomous System Numbers (ASNs) – see below <p>Member accounts with <u>no</u> chargeable resources are referred to as Associate Members.</p> |
| AS Number Allocation fee | <p>≤ 2 ASNs held: No charge</p> <p>≥ 3 ASNs held: AUD 500 per Autonomous System Number (ASN) allocated</p> | Once-off | Experimental ASN allocations are excluded from the AS number allocation fee |
| AS Number Annual fee | <p>≤ 2 ASNs held: No charge</p> <p>≥ 3 ASNs held: AUD 100 per Autonomous System Number (ASN) allocated</p> | Annual on renewal | Experimental ASN allocations are excluded from the AS number annual fee |

| Service | Fee ¹ | Frequency | Notes and exceptions |
|----------------------------------|--|-------------------------------------|---|
| Temporary assignment fees | 25% of the Annual Fee for the temporary resources being approved | Period of 3 months | <ul style="list-style-type: none"> ▪ Temporary assignments are delegated for a short period of time not exceeding 6 months ▪ Temporary assignments do not count towards a Member's membership tier |
| Transfers | 20% of the Annual Fee applicable to resources being transferred | Per transaction | <p>Fee is payable by the recipient of transferred resources, except in case of transfers to other RIRs, in which case it is paid by the source APNIC Member.</p> <p>This fee does not apply to:</p> <ul style="list-style-type: none"> • Initial IPv4 transfers to Member accounts holding no IP addresses (as these accounts will be charged the full annual fee once the resources have been transferred). • IPv4 transfers to NIR Members • A membership change to or from an NIR |
| Reactivation Fee | AUD 1,000 | Once-off prior to each reactivation | <p>This fee is payable where a Member account has been terminated (that is, due to non-payment)</p> <p>For further detail, see Section 4.2</p> |

Notes

1. 50% discount applies to account holders from Least Developed Countries (LDCs). See section 3. Section 3.1 outlines fees for economies that graduate LDC status.
2. Historical Resources are those IPv4 addresses and ASNs delegated prior to APNIC's establishment or before APNIC introduced a membership structure which:
 - a. Have not previously been converted to resources included in the Annual Fee calculation, and
 - b. Are still held by the original custodian.

2 Annual Fees

The Annual Fee is determined by the (fractional) number of bits of address space (IPv4 or IPv6) held, and two Annual Fee 'parameters', being the Base Fee and the Bit Factor as set out in the table below. IPv4 and IPv6 address holdings are assessed separately, and the Member's annual fee is then determined as the larger of these amounts.

| Annual Fee = (Base Fee) x (Bit Factor)^(Address Bits) | | | | |
|--|--------------------|-------------|-------------|-------------|
| Annual Fee Parameters | 2023 – 2024 | 2025 | 2026 | 2027 |
| Base Fee | AUD 1,180 | AUD 1,236 | AUD 1,295 | AUD 1,356 |
| Bit Factor | 1.31 | 1.315 | 1.320 | 1.325 |
| | | | | |

| Address Bits | Log2 (addresses) – (offset) | Log2 (addresses) – (offset) | Log2 (addresses) – (offset) | Log2 (addresses) – (offset) |
|-----------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|
| Offset for IPv4 | 8 | 8 | 8 | 8 |
| Offset for IPv6 | 22 | 22 | 22 | 22 |

To determine the Annual Fees applicable to an address holding, please use the APNIC Members Fees Calculator available here — <https://submit.apnic.net/cgi-bin/feecalc.pl>.

2.1 Example Fee Calculation

A Member holds IPv4 address space of /16 and a /18, and IPv6 space of a /32 and a /31.

| | 2023 – 2024 | 2025 | 2026 | 2027 |
|--|--|--|--|--|
| IPv4 calculation An IPv4 holding of /16 + /18 is equivalent to 81,920 /32 addresses | $= \text{AUD } 1,180 \times 1.31^{(\log_2(81920)-8)}$ $= \$1,180 \times 1.31^{8.322}$ $= \$11,164$ | $= \text{AUD } 1,236 \times 1.315^{(\log_2(81920)-8)}$ $= \$1,236 \times 1.315^{8.322}$ $= \$12,071$ | $= \text{AUD } 1,295 \times 1.32^{(\log_2(81920)-8)}$ $= \$1,295 \times 1.32^{8.322}$ $= \$13,050$ | $= \text{AUD } 1,356 \times 1.325^{(\log_2(81920)-8)}$ $= \$1,356 \times 1.325^{8.322}$ $= \$14,106$ |
| IPv6 calculation An IPv6 holding of /32 + /31 is equivalent to 50,331,648 /56 site addresses | $= \$1,180 \times 1.31^{(\log_2(50331648)-22)}$ $= \$1,180 \times 1.31^{3.585}$ $= \$3,107$ | $= \$1,236 \times 1.315^{(\log_2(50331648)-22)}$ $= \$1,236 \times 1.315^{3.585}$ $= \$3,299$ | $= \$1,295 \times 1.32^{(\log_2(50331648)-22)}$ $= \$1,295 \times 1.32^{3.585}$ $= \$3,503$ | $= \$1,356 \times 1.325^{(\log_2(50331648)-22)}$ $= \$1,356 \times 1.325^{3.585}$ $= \$3,719$ |

Annual fee

The applicable Annual Fee is determined as the larger of the IPv4 and IPv6 fees, as follows:

| 2023 – 2024 | 2025 | 2026 | 2027 |
|-------------|------------|------------|------------|
| AUD 11,164 | AUD 12,071 | AUD 13,050 | AUD 14,106 |

Note that this result can also be obtained from the fee calculator.

2.2 National Internet Registry (NIR) members

NIR Members are assessed on their total address holdings as described above, with an additional premium in the form of a multiplier of **2.9** applied to the annual fee.

3 Least Developed Countries

Fees payable by account holders from Least Developed Countries (LDCs) are discounted by 50%.

The [list of LDCs](#) used for the purposes of this fee discount is defined and maintained by the United Nations Statistics Division.

The discount will be applied in accordance with the LDC status of the account holder's economy on the date of membership renewal.

3.1 Graduation from LDC status

When an economy graduates from LDC status (the graduation date), the fees payable by account holders from that economy will be:

- On the first membership renewal following the graduation date:
 - 75% of the full fee where the account holder holds cumulative IPv4 resources up to and including a /22 or IPv6 resources up to and including a /35
 - 100% of the full fee for all other account holders

On the second membership renewal following the graduation date, all account holders will be charged 100% of the full fee.

4 Payment of fees

4.1 Currency, taxes and other charges

All APNIC fees are assessed and payable in Australian Dollars (AUD).

All fee payments must be made in cleared funds, without any deduction or set-off, and free and clear of any taxes, levies, imports, duties, charges, fees, and withholdings of any nature imposed by any bank, financial institution, Governmental, or other body. If any deductions are made, the relevant fees will be increased to ensure APNIC receives the full amount which was originally due and payable.

4.2 Failure to pay

Failure to pay APNIC fees will result in termination of the Member account.

A terminated account may be reactivated within three months of termination, subject to the payment of the Reactivation Fee and any other outstanding fees.

If a terminated Member account is not reactivated within three months of termination all resources held will be subject to de-registration from the APNIC Whois Database, and return to the APNIC free pool for future reallocation.
