Guide to IRT object in MyAPNIC

Table of Contents

1 Guide to manage the Incident Response Team (IRT) object in MyAPNIC

This guide will help you to manage the IRT object using MyAPNIC.

From **8 November 2010** IRT references are mandatory in the APNIC Whois Database. This means an '**irt**' object reference will be mandatory when any '**inetnum**', '**inet6um**' and **'aut-num'** objects are updated or created in the APNIC Whois Database.

Before you can create an IRT object you need to:

- Prepare your own "Network abuse email contact" and processes, or
- Find an upstream ISP willing to be the contact for abuse reports related to your network

Create an IRT object

From 8 November 2010, when you log in to MyAPNIC, you will be directed to create the IRT object [*Resources → IRTs→ Add IRT Object*]. A partially prefilled template will appear using your registered information. See the example below:

Note:

You can make changes to the template above; for example, you can change the address details.
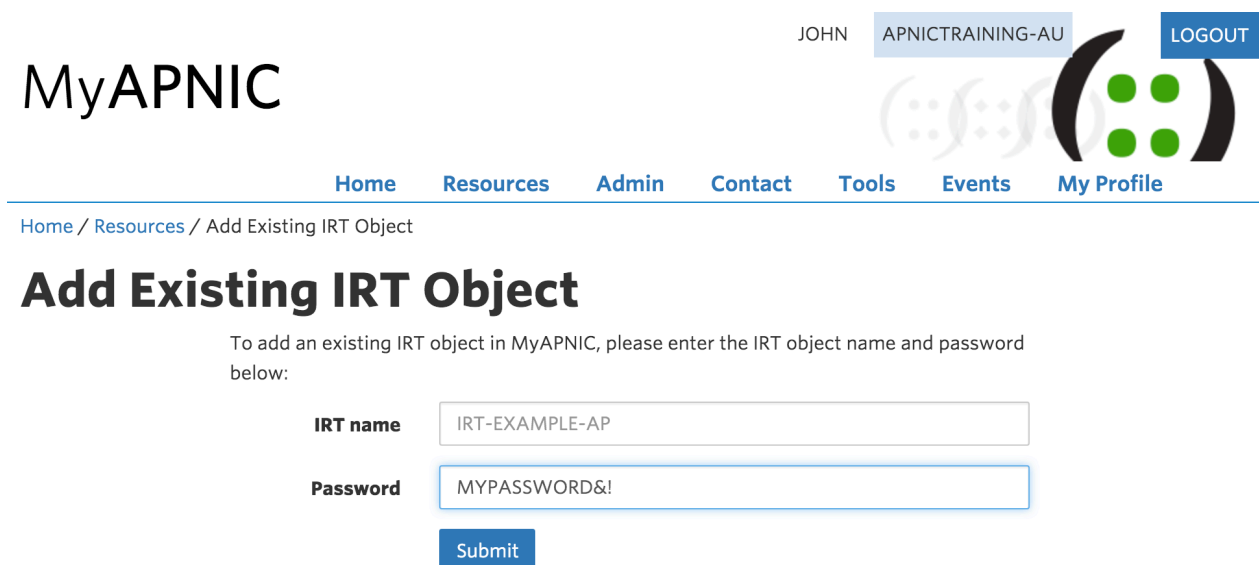

This object will be viewable in APNIC Whois Database.

Once you click on "Submit", a *confirmation screen* like this will appear.
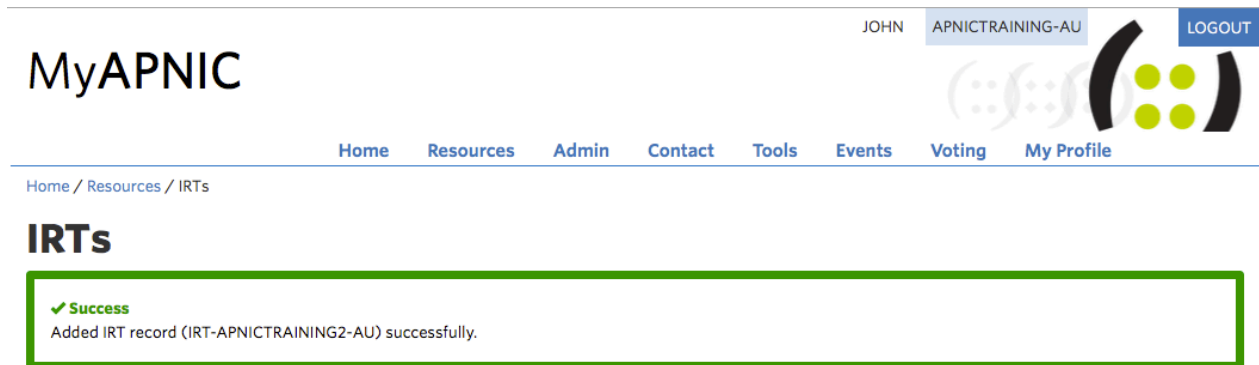

Add an existing IRT object

To add an existing IRT object(s) for your APNIC account, go to *Resources -> IRT* and click on "Add Existing IRT Object**".**

Update an existing IRT object

(1) To update an IRT object, go to *Resources -> IRTs* and click on the desired IRT object in the IRT List.

The following screen will appear:

Add	Update	Delete

Object type   irt

Search   IRT-APNICTRAINING2-AU

[Search]

irt   IRT-APNICTRAINING2-AU

address   6 Cordelia Street

e-mail   helpdesk@apnic.net

abuse-mailbox   helpdesk@apnic.net

admin-c   NR97-AP

[Update]

(2)   Once you have made the desired updates, click on "Update".

(3)   Once you click on "Submit update", a *confirmation screen* will appear.

Update multiple inetnum, inet6num, and aut-num objects

Note, you can use three methods to update your objects:

- Text file updates
- Bulk whois attribute updates
- Zone file upload

Text file updates

(1)   To make bulk updates to your inetnum, inet6num and autnum objects in MyAPNIC go to: *Resources → Bulk Whois Update*

Bulk Updates

(2)   To make bulk updates to your inetnum, inet6num and autnum objects in MyAPNIC go to: *Resources → Bulk Whois Update*

Bulk Update Requests

See the status of your current Bulk Whois Attribute Update requests.

Submit update request

You can do a bulk update of your inetnum, inet6num, and aut-num objects using the form below.

Whois type	Public ⬍
Object type	inetnum ⬍
Object attribute	mnt-irt ⬍ IRT-APNICTRAINING-AU ⬍
Resource range	61.45.248.0 - 61.45.255.255
	Submit

(a)   Once a proper IRT object is selected for the resource range, click "Submit".
(b)   If successful, the following screen will be displayed.
Text file updates

(1)   To do bulk updates for inetnum, inet6num, or aut-num objects, simply add the 'mnt-irt' attribute to each of the object templates.

Note:

All objects protected by APNIC-HM can only be updated by APNIC Hostmasters, that is, you can only make updates that are protected by your maintainer.

(2)   To upload the text file click on "Browse" and search for the text file. Once the text file has been uploaded click on "Submit".
